Rome A New Planning Strategy:

Rome Franco Archibugi, 2005 *Rome A New Planning Strategy* looks at the problems of a city over the last one hundred years and suggests a totally new planning strategy. The book examines the stages that have marked the increase of population and change in land use and analyses the masterplans with which there has been an attempt to control these evolving conditions. Using Rome as a case study, the book deals with the socio-economic effect of an absence of planning strategy during the recent growth of the city. The author presents the characters and features of a new masterplan based on his many years of experience in theoretical and practical planning. **Rome** Franco Archibugi, Seymour J. Mandelbaum, 2002

The Ecological City and the City Effect Franco Archibugi, 2019-05-23 First published in 1997, this volume responds to the increasingly urgent issue of degradation of the urban environment. It moves beyond the indirect environmentalism up until the 1990s, examining urban degradation and how urban planning can be directly applied to the concept of an ecological city. Particular focus is given to the Italian government's Urban Environment Programme, a 10-year plan for the environment. Archibugi's study forms part of an international monograph publishing series covering new research into the green issues such as government corporate and public responses to environmental hazards, the economics of green policies and the effectiveness of environmental protection programmes.

Planning Theory Franco Archibugi, 2008-01-29 *Planning Theory* expresses a sound unease about the direction taken by the current analysis and criticism of planning experiences both in the field of economics and in urban and regional planning. Instead of seriously revising the technical and scientific shortcomings, marking the various problems encountered in the planning experience in both fields, academic debates and reflection have instead led to a kind of political interpretation. On the basis of the hopelessness of improving the governance of managerial and political planning initiatives, planning theory has been reduced to a generic sociological debate on planning itself, a debate that freezes planning as a permanently declining engagement. To oppose this, the present book aims to identify the essential guidelines of a re-launch of planning processes and techniques, configuring a kind of neo-discipline called planology by the author, which builds upon a multi-disciplinary integration never seen and experimented with until now of economic, environmental and sociological approaches, a crucial element missing in previous unsuccessful planning attempts. **Italy's**

Strategy and Defence Planning Colin S. Gray, 2014 *Strategy and Defence Planning: Meeting the Challenge of Uncertainty* explores and examines why and how security communities prepare purposefully for their future defence. Professor Gray argues that our understanding of human nature, of politics and of strategic history does allow us to make prudent choices in defence planning. *Wassily Leontief and Input-Output*

Economics Erik Dietzenbacher, Michael L. Lahr, 2004-03-25 Wassily Leontief 1905-1999 was the founding father of input-output economics for which he received the Nobel Prize in 1973. This book offers a collection of papers in memory of Leontief.

by his students and close colleagues The first part Reflections on Input Output Economics focuses upon Leontief as a person and scholar as well as his personal contributions to economics It includes contributions by Nobel Laureate Paul A Samuelson who shares his memories of a young Professor Leontief at Harvard and ends with the last joint interview with Wassily and his wife to date previously unpublished The second part Perspectives of Input Output Economics includes theoretical and empirical research inspired by Leontief s work and offers a wide ranging sample of the state of interindustry economics a field Leontief founded This is a strong collection likely to appeal to a wide range of professionals in universities government industry and international organizations (1997.) - 344 S. Information and Communication Technologies for Sustainable Tourism Alisha Ali,Andrew Frew,2013-05-07 Sustainable development is a highly topical issue and is of critical importance to tourism as the environment is of utmost importance for the continued development and prosperity of the industry There have been numerous texts written on sustainable tourism and the measures to mitigate and manage this but none which acknowledges Information and Communication Technologies ICT as a mechanism of doing so despite being an emerging area of research ICT in this context refers to innovative tools which form an integrated system of software and networked equipment that facilitates data processing information sharing communication and the ability to search and select from an existing range of products and services for an organisation's benefits Despite the symbiotic relationship which exists between ICT and sustainable tourism there has been little research which has considered how the use of such technology can be used to make sustainable tourism development a more workable reality This opportune book is the first to provide a focus on the interrelationship of these two important topics demonstrating their synergies and providing insight into a new and innovative approach to managing sustainable tourism development It considers the use of technology to reduce the negative impacts of tourism from both the demand and supply side perspectives A critical review of a range of cutting edge technologies used by tourists and businesses to assess their usefulness in managing sustainable tourism development from the macro to the micro level is also discussed It further integrates examples and practical applications to show how ICT can be an invaluable mechanism in the management of sustainable tourism development This cutting edge volume provides a wealth of information on an important yet neglected subject This book will be invaluable reading for students researchers academics and members of the tourism industry looking for new and innovative ways of fostering a more sustainable tourism industry

Tourism Governance Bill Bramwell,Bernard Lane,2013-12-16 The role of governance has only recently begun to be researched and discussed in order to better understand tourism policy making and planning and tourism development Governance encompasses the many ways in which societies and industries are governed given permission or assistance or steered by government and numerous other actors including the private sector NGOs and communities This book explains and evaluates critical perspectives on the governance of tourism examining these in the context of tourism and sustainable development Governance processes fundamentally affect whether and how progress is made toward securing the economic socio cultural and environmental goals of sustainable development The critical perspectives on tourism governance examined here challenge and re conceptualise established ideas in tourism policy and planning as well as engage with theoretical frameworks from other social science

fields The contributors assess theoretical frameworks that help explain the governance of tourism and sustainability They also explore tourism governance at national regional and local scales and the relations between them They assess issues of power and politics in policy making and planning and they consider changing governance relationships over time and the associated potential for social learning The collection brings insights from leading researchers and examines important new theoretical frameworks for tourism research This book was originally published as a special issue of Journal of Sustainable Tourism
