**Romford Heritage** Suzanne E. Evans, Brian Evans, 2002 Local history of Romford **Infamous Essex Women** Dee Gordon, 2009-01-01 Here are Essex Girls in a different light to the stereotype of modern public expectation Murderers mayhem makers swindlers witches smugglers and lustful adulteresses have played a part in the darker side of the county's history From the thirteenth century onwards Essex has produced more than its fair share of infamous women Some got their comeuppance some profited from their infamy and others were misguided or with the benefit of hindsight misjudged The reader will find a plethora of women to hate ridicule or secretly admire in Dee Gordon's new book Some of the characters featured here might horrify or mystify others will provoke empathy or disbelief but all tales are authenticated by hours of research Read learn squirm and smile Greater London Local History Directory and Bibliography Peter Marcan, 1988

**Front-line Essex** Michael Foley, 2005-09-29 Before the First World War Essex was a very different county from that which we know today The economy was largely based on agriculture and the people rarely travelled beyond its borders or even out of their towns or villages The war opened up a whole new world for the people of Essex Men from the county enlisted in Kitchener's Army and travelled abroad and many troops came into the camps and barracks which sprang up Some of these were men from across the empire who came to fight for the mother country Essex was a key area during the war situated on the east coast it was thought that the enemy could potentially use it as a site for invasion so many defences were set up all round the county Essex was subjected to great danger and harsh times by the enemy in the form of air raids from Zeppelins and later from aeroplanes This book sets out the experiences of the county against what was happening in the broader theatre of war **Birmingham's Industrial Heritage** Ray Shill, 2003-10-17 Birmingham was a renowned manufacturing centre by the 18th century and the city rapidly grew into the primary industrial centre of the Midlands An

account of Birmingham's heyday of heavy industry is recorded and the story is brought up to date with the story of the decline of heavy industry and its subsequent replacement by design technology and computing The proposed redevelopment of Rover's Longbridge site as a science park is symptomatic of this change     London's Industrial Heritage Geoff Marshall,2013-03-01 Did you know that apart from Lancashire the greatest concentration of Boulton the world's first plastic material was synthesised in the East End there was even a gasworks opposite the Palace of Westminster Clerkenwell was a centre for watch and clock makers the River Thames used to be full of colliers bringing coal from Newcastle Joseph Bramah invented his water closet and hydraulic pump here and Henry Maudslay made machines to make machines Many household names began in London Schweppes Crosse Blackwell and Vauxhall motor cars The list of fascinating facts goes on In this the first book of its kind on the subject Geoff Marshall provides an enthralling overview of London's industrial face through history     **Waterloo Sunrise** John Davis,2024-03-26 This is an urban history of London during the pivotal years of the 1960s and 1970s when the metropolis was transformed from an industrial city that the Victorians might have recognised to an embryonic modern world city Previous work on London in these years has tended to focus upon the 1960s in particular the Swinging London phenomenon Mary Quant Carnaby Street and the King's Road Chelsea all appear in these pages but it is argued that the swinging moment of the mid sixties was a passing symptom of a much broader transformation from an industrial to a service based city and it is that transformation which this book examines London is too complex and diverse a city to be comprehended in a simple linear narrative this book adopts instead an innovative approach to urban history by which London life and London's transformation are examined through a number of case studies looking at specific themes and areas of the city Consumerism and the experience economy home ownership and gentrification deindustrialisation and deprivation racial tension and unemployment the attrition of public services and the steady loss of confidence in public agencies national and local emerge as overarching themes from the individual case studies in this book Their combined effect it is argued was to prepare the ground for the Britain that Margaret Thatcher is usually held to have created after 1979 without Thatcher herself having anything to do it     **Sources for the History of London 1939-45** Heather J. Creaton,1998     Tracing Your Family History on the Internet Chris Paton,2011-06-13 A genealogist's practical guide to researching family history online while avoiding inaccurate incomplete or misleading information The internet has revolutionized family history research every day new records and resources are placed online and new methods of sharing research and communicating become available Never before has it been so easy to research family history and to gain a better understanding of who we are and where we came from But as British genealogist Chris Paton demonstrates in this straightforward practical guide while the internet is an enormous asset it is also something to be wary of Researchers need to take a cautious approach to the information they acquire on the web Where did the original material come from Has it been accurately reproduced Why was it put online What has been left out and what is still to come As he leads researchers through the multitude of resources

that are now accessible online with an emphasis on UK and Ireland sites Chris Paton helps to answer these questions He shows what the internet can and cannot do and he warns against the various traps researchers can fall into along the way

Dauer,Edward A. Dauer,2002 *Essex Journal* ,1999 Border Towns Buses of London Country Transport (North of the Thames) 1969-2019 Malcolm Batten,2024-04-30 London Transport was created in 1933 with monopoly powers Not only did it have exclusive rights to run bus and tram and trolleybus services in the Greater London area it also ran services in a Country Area all around London Green Line express services linked the country towns to London and in most cases across to other country towns the other side of the metropolis This country area extended north as far as Hitchin east to Brentwood south to Crawley and west to Windsor But what of the towns at the edge of the country area Here the green London Transport buses would meet the bus companies whose operations extended across the rest of the counties of Essex Bedfordshire Buckinghamshire etc In some cases the town was at a node where more than one company worked in At Luton there was a municipal fleet Elsewhere such as at Aylesbury there were local independent operators who had a share in the town services It would all change from 1970 when the London Transport Country Area was transferred to the National Bus Company to form a new company named London Country Bus Services This would later be split into four separate companies Deregulation in 1985 and privatisation in the 1990s led to further changes in the names and ownership of bus companies Consolidation since then has seen the emergence of national bus groups Stagecoach First Group Arriva and Go Ahead replacing the old names and liveries But retrenchment by these companies has given an opportunity for new independent companies to fill the gaps This book takes the form of an anti clockwise tour around the perimeter of the London Country area north of the Thames featuring a number of key towns starting at Tilbury and ending at High Wycombe illustrating some of the many changes to bus companies that have occurred **The Local Historian** ,2007 **Humphry Repton** Tom Williamson,2020-09-17 Humphry Repton 1752 1818 remains one of England s most interesting and prolific garden and landscape designers Renowned for his innovative design proposals and distinctive before and after images captured in his famous Red Books Repton s astonishing career represents the link between the simple parklands of his predecessor Capability Brown and the more elaborate structured and formal landscapes of the Victorian age This lavishly illustrated book based on a wealth of new research reinterprets Repton s life working methods and designs and examines why they proved so popular in a rapidly changing world **Brit(ish)** Afua Hirsch,2018-02-01 From Afua Hirsch co presenter of Samuel L Jackson s major BBC TV series *Enslaved* the Sunday Times bestseller that reveals the uncomfortable truth about race and identity in Britain today You re British Your parents are British Your partner your children and most of your friends are

British So why do people keep asking where you re from We are a nation in denial about our imperial past and the racism that plagues our present Brit ish is Afua Hirsch s personal and provocative exploration of how this came to be and an urgent call for change The book for our divided and dangerous times David Olusoga      **Abandoned & Vanished Canals of England** Andy Wood,2014-06-15 A resurgence in canal restoration has seen many English canals reopen in the past three decades but many are still abandoned some even vanished under roads railways and buildings      The History of the London Underground Map Caroline Roope,2022-09-21 Few transportation maps can boast the pedigree that London s iconic Tube map can Sported on t shirts keyrings duvet covers and most recently downloaded an astonishing twenty million times in app form the map remains a long standing icon of British design and ingenuity Hailed by the art and design community as a cultural artifact it has also inspired other culturally important pieces of artwork and in 2006 was voted second in BBC 2 s Great British Design Test But it almost didn t make it out of the notepad it was designed in The story of how the Underground map evolved is almost as troubled and fraught with complexities as the transport network it represents Mapping the Underground was not for the faint hearted it rapidly became a source of frustration and in some cases obsession often driving its custodians to the point of distraction The solution when eventually found would not only revolutionise the movement of people around the city but change the way we visualise London forever Caroline Roope s wonderfully researched book casts the Underground in a new light placing the world s most famous transit network and its even more famous map in its wider historical and cultural context revealing the people not just behind the iconic map but behind the Underground s artistic and architectural heritage From pioneers to visionaries disruptors to dissenters the Underground has had them all as well as a constant stream of often disgruntled passengers It is thanks to the legacy of a host of reformers that the Tube and the diagram that finally provided the key to understanding it have endured as masterpieces of both engineering and design      **Theatres of Memory** Raphael Samuel,2012-09-11 When Theatres of Memory was first published in 1994 it transformed the debate about what is to be considered history and questioned the role of heritage that lies at the heart of every Western nation s obsession with the past Today in the age of Downton Abbey and Mad Men we are once again conjuring historical fictions to make sense of our everyday lives In this remarkable book Samuel looks at the many different ways we use the unofficial knowledge of the past Considering such varied areas as the fashion for retrofitting the rise of family history the joys of collecting old photographs the allure of reenactment societies and televised adaptations of Dickens Samuel transforms our understanding of the uses of history He shows us that history is a living practice something constantly being reassessed in the world around us
