Room To Manoeuvre:

In the Name of the Poor Neil Webster, Lars Engberg-Pedersen, 2002-02 Current discourse on poverty reduction emphasises the roles of the state and the market This text stresses the importance of exploring and understanding the poor's own actions **Au Courant**, 1980 **Non-Governmental Organisations - Performance and Accountability** Michael Edwards, David Hulme, 2014-03-18 The last decade has seen some significant changes in international development and in the status of non governmental organisations operating in the field Not only has the number of NGOs virtually doubled many of them have seen a considerable growth in their budgets and have grown closer to governments and official aid agencies NGOs are acknowledged by many to be more effective agents of development than governments or commercial interests even as a magic bullet for development problems Despite these positive trends the real impact of the NGO sector is not well documented This is partly because NGO performance assessment and accountability methods are weak and partly because NGOs are caught up increasingly in the world of official aid which pushes them towards certain forms of evaluation at the expense of others This unique book takes a hard and critical look at these issues and describes how NGOs can and must improve the way they measure and account for their performance if they are to be truly effective **Public Relations and the Power of Creativity** Sarah Bowman, Adrian Crookes, Øyvind Ihlen, Stefania Romenti, 2018-10-04 This volume demonstrates a range of possibilities for creative thinking about public relations management and collaboration in different settings and with different purposes The chapters hint at opportunities point towards innovation and challenge our thinking about the power of creativity **Modern Governance** Jan Kooiman, 1993-01-20 This wide ranging text provides an overview of major developments in governance in contemporary society It illuminates recent theories about the relationship of the public and private sectors and the interaction of politics and society The main development in recent years is shown as a shift in the balance between government and society towards the private sector The book explores the ways in which new balances have been struck between state and market It examines such new ventures in public private interaction and endeavours to explain them in terms of coping with the dynamics complexities and diversities of modern society In doing so it develops the outline of a new theory of social political governance **Climate Change Adaptation and Development** Tor Håkon Inderberg, Siri Eriksen, Karen O'Brien, Linda Sygna, 2014-11-20 Climate change poses multiple challenges to development It affects lives and livelihoods infrastructure and institutions as well as beliefs cultures and identities There is a growing recognition that the social dimensions of vulnerability and adaptation now need to move to the forefront of development policies and practices This book presents case studies showing that climate change is as much a problem of development as for development with many of the risks closely linked to past present and future development pathways Development policies and practices can play a key role in addressing climate change but it is critical to question to what extent such actions and interventions reproduce rather than address the social and political structures and development

pathways driving vulnerability The chapters emphasise that adaptation is about much more than a set of projects or interventions to reduce specific impacts of climate change it is about living with change while also transforming the processes that contribute to vulnerability in the first place This book will help students in the field of climate change and development to make sense of adaptation as a social process and it will provide practitioners policymakers and researchers working at the interface between climate change and development with useful insights for approaching adaptation as part of a larger transformation to sustainability

The Agency of the Governed in the Global South Anke Draude, 2020-06-04
Research on global norm diffusion and institutional transfer has often neglected the agency of the governed This collection argues that limited statehood the lack of state capacities in most parts of the global South provides opportunities for the governed to raise their voices and be listened to Thus people on the receiving end of development cooperation state building or security interventions can significantly shape global dynamics of normative and institutional change Drawing on the emerging body of literature on the agency of the governed this book assesses the current dynamics of transfer and diffusion studies at the interstice of political science and social anthropology By focusing on the agency of the governed the authors integrate a broad spectrum of issues and debates from the proliferation of global norms to state and security building to international policy cooperation This book will be of interest to students and researchers of global politics and international relations particularly those focusing on the global South It was originally published as a special issue of the online journal Third World Thematics

A Chance for the World Bank Jozef Ritzen, 2005-03-15 This book is an authoritative and radical

manifesto for urgently needed changes in development cooperation A Chance for the World Bank provides an overview of the challenges faced by the World Bank and explores how it has organized itself to deal with its mission It proposes that unless radical steps are taken by the World Bank the first decade of the century will witness a ever widening gulf between the poor and rich countries

Female Agency in the Urban Economy Deborah Simonton, Anne Montenach, 2013-04-17 This innovative new book is overtly and explicitly about female agency in eighteenth century European towns However it positions female activity and decisions unequivocally in an urban world of institutions laws regulations customs and ideologies Gender politics complicated and shaped the day to day experiences of working women Town rules and customs as well as police and guilds regulations affected women s participation in the urban economy most of the time the formally recognized and legally accepted power of women which is an essential component of female agency was very limited Yet these chapters draw attention to how women navigated these gendered terrains As the book demonstrates exclusion is too strong a word for the realities and pragmatism of women s everyday lives Frequently guild and corporate regulations were more about situating women and regulating their activities rather than preventing them from operating in the urban economy Similarly corporate structures which were under stress found flexible strategies to incorporate women who through their own initiative and activities put pressure on the systems Women could benefit from the contradictions between moral and social unwritten norms and economic regulations and could take advantage of the tolerance or complicity of urban authorities towards illicit practices Women with a grasp of their rights and privileges could defend themselves and exploit legal systems with its loopholes and contradictions to achieve economic independence and power

How Change Happens in the Private Sector Kate Raworth, Liam Wren-Lewis, 2015 Oxfam believes that private sector actors can change their strategies policies and behaviour to have a more positive impact on poverty reduction and to do less harm to poor people There are clear cases where companies have changed in these ways How and why did those changes happen In order to answer this question we chose two examples of major companies that changed for the better We got as close as possible to the source of that change to understand the factors that led to it At the end of each case study we summarise the five main factors that we think brought about change and consider the implications of these for civil society organisations that want to generate more pro poor change of this kind in the private sector

Life without a Ground: A Praxis of Being-in-the-World Daniil Koloskov, 2024-07-18 This book argues for the pragmatist thesis of the primacy of praxis on a phenomenological basis Demonstrating the relevance of phenomenology it provides a systematic overview of the contemporary pragmatic landscape taking into account not only a family of neo pragmatic approaches but also the current pragmatic readings of phenomenology This volume offers an innovative formulation of the primacy of practice thesis based on the genetic reformulation of Heidegger s notions of disclosure Dasein and average intelligibility Das Man Investigating the dynamic interrelation among those notions the author arrives at the phenomenological conception of forms of life or average background practices and

argues that a form of life is not a pragmatic condition of meaningfulness but an outcome of the dynamic process of meaning formation This text concludes that the formation of meaning has no overarching origin but sources from the bundle of disparate practical spaces and is anarchic in nature It appeals to students and researchers working in phenomenology and philosophical anthropology Tell Me, Where Are We Going and How Do We Get There? Ulf Lubienetzki, Heidrun Schüler-Lubienetzki, 2022-09-02 Learn the basics and techniques of a special form of conversation in this descriptive textbook facilitation Find out how facilitation supports communication and cooperation in groups and unleashes the potential existing in the group This book is a translation of the original German 1st edition *Sag mal Wo geht s lang und wie kommen wir dahin* by Ulf Lubienetzki Heidrun Schüler Lubienetzki published by Springer Verlag GmbH Germany part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors **Trade and Transitions** Marsha Chandler, Robert Howse, Michael Trebilcock, 2004-01-14 Faced with increased levels of international competition and mounting budget deficits some developed Western economies have responded by introducing trade restrictions This book uses a comparative analysis of eight leading industrial nations including Japan the United States West Germany and Britain to demonstrate that such policies are mistaken Alternatives to trade restrictions including subsidies for industries and labour market policy instruments are also shown to have their drawbacks and the book emphasises the need for countries to find and exploit policies which fulfil their own political and social needs but which are least injurious to their trading partners
