Beyond Critique Pamela Fraser, Roger Rothman, 2017-04-06. Outgrowth of a panel discussion at the 2013 conference of the College Art Association in New York. The Books that Shaped Art History: From Gombrich and Greenberg to Alpers and Krauss Richard Shone, John-Paul Stonard, 2013-04-05. An exemplary survey that reassesses the impact of the most important books to have shaped art history through the twentieth century. Written by some of today's leading art historians and curators, this new collection provides an invaluable road map of the field by comparing and reexamining canonical works of art history. From mile marker's magisterial study of thirteenth-century French art, first published in 1898, to Hans Belting's provocative *Likeness and Presence: A History of the Image before the Era of Art*, the book provides a concise and insightful overview of the history of art told through its most enduring literature. Each of the essays looks at the impact of a single major book of art history, mapping the intellectual development of the writer under review, setting out the premises and argument of the book, considering its position within the broader field of art history, and analyzing its significance in the context of both its initial reception and its afterlife. An introduction by John Paul Stonard explores how art history has been forged by outstanding contributions to scholarship and by the dialogues and ruptures between them. **Seeing and Beyond** Deborah J. Johnson, David Ogawa, Kermit Swiler Champa, 2005. This volume is an exciting eclectic collection of essays in honor of Kermit S. Champa, a leading scholar of impressionism and critic of twentieth-century art. The lead essay by David Carrier is followed by others from several generations of scholars and museum curators trained by Professor Champa. Together they cover an extremely wide historical range from the eighteenth to the twenty-first centuries and honor Professor Champa's own scholarly rigor, methodological diversity, and intellectual breadth through topics ranging from art history to cultural studies. Jacket. **Aesthetics After Modernism** Diarmuid Costello, 2024. *Aesthetics after Modernism* argues for the ongoing relevance of aesthetics to art after modernism. In it, I show that even what are typically taken to be the hardest of hard cases engage us in recognisably aesthetic ways and as such remain amenable to aesthetic analysis. Why, if that is true, do so many art theorists, critics, and sometimes even artists appear to think otherwise? I trace the artworld's rejection of aesthetic theory to Clement Greenberg's success in co-opting the discourse of aesthetics, notably Kant's aesthetics, to underwrite his own formalism about modernist art. Not only has this led to Kant being tarred with the brush of Greenbergian formalism, it has also led critics and theorists of later art to miss the resources of the aesthetic tradition, perhaps especially Kant, for capturing what is distinctive about our cognitive relation to the kinds of art that interest them. There is a tendency simply to assume that Kant's aesthetics cannot speak to the more conceptual aspects of our interactions with art. I trace the legacy of Greenberg's modernism and formalism for later art criticism and theory before offering an interpretation of Kant's theory of

art that seeks to show otherwise I take Conceptual Art as my test case here is a form of art that often claims to forgo sensible properties altogether But if Kant s aesthetics can accommodate to our cognitive relation to art with no sensible features relevant to its appreciation as art then it should in principle withstand the challenge of any form of art **Great Art Critics (1750-2000)** J. Pedro Lorente,2020-04-01 The art world has become a point of contention within a range of debates and yet strangely enough while art criticism has been discussed at length very little is said about art critics Following in the footsteps of Lionello Venturi s History of Art Criticism in the current volume Lorente provides an updated reassessment of the great art critics from the Enlightenment down to the turn of the millennium Conceived as a didactic handbook with a recommended bibliography at the end of each chapter this concise work tells the history of a profession in permanent crisis while also paying homage to its most influential practitioners in different cultural contexts **Systems We Have Loved** Eve Meltzer,2013-07-02 By the early 1960s theorists like L vi Strauss Lacan Foucault and Barthes had created a world ruled by signifying structures and pictured through the grids of language information and systems Artists soon followed turning to language and its related forms to devise a new conceptual approach to art making Examining the ways in which artists shared the structuralist devotion to systems of many sorts Systems We Have Loved shows that even as structuralism encouraged the advent of conceptual art it also raised intractable problems that artists were forced to confront Considering such notable art figures as Mary Kelly Robert Morris Robert Smithson and Rosalind Krauss Eve Meltzer argues that during this period the visual arts depicted and tested the far reaching claims about subjectivity espoused by theorists She offers a new way of framing two of the twentieth century s most transformative movements one artistic one expansively theoretical and she reveals their shared dream or nightmare of the world as a system of signs By endorsing this view Meltzer proposes these artists drew attention to the fictions and limitations of this dream even as they risked getting caught in the very systems they had adopted The first book to describe art s embrace of the world as an information system Systems We Have Loved breathes new life into the study of conceptual art Weak Painting After Modernism Craig Staff,2023-09-01 This book examines the terms upon which painting in the United States sought to negotiate with the legacy of American formalist aesthetics and by extension the understanding of modernist painting it had become most readily associated with In so doing a separate set of possibilities for painting gradually began to emerge The salient debates and practices that collectively worked to establish such a response are approached through the philosopher Gianni Vattimo s idea of pensiero debole or so called weak thought To this end the proposed study both identifies and seeks to examine a type of weak painting which like Vattimo s idea took as its critical point of departure the exhaustion but not the vanishing of the project of modernism the belief in reason progress history the nation state etc Craig Staff explores particular instances wherein artists sought to extend the parameters of the object beyond what had been called into question namely the proclivity for modernist painting s strength to be understood as denoting amongst other things a perceived set of universal essences This book will be of interest to

End-of-Art Philosophy in Hegel, Nietzsche and Danto Stephen Snyder, 2018-11-04 This book examines the little understood end of art theses of Hegel Nietzsche and Danto The end of art claim is often associated with the end of a certain standard of taste or skill However at a deeper level it relates to a transformation in how we philosophically understand our relation to the world Hegel Nietzsche and Danto each strive philosophically to overcome Cartesian dualism redrawing the traditional lines between mind and matter Hegel sees the overcoming of the material in the ideal Nietzsche levels the two worlds into one and Danto divides the world into representing and non representing material These attempts to overcome dualism necessitate notions of the self that differ significantly from traditional accounts the redrawn boundaries show that art and philosophy grasp essential but different aspects of human existence Neither perspective however fully grasps the duality The appearance of art's end occurs when one aspect is given priority for Hegel and Danto it is the essentialist lens of philosophy and in Nietzsche's case the transformative power of artistic creativity Thus the book makes the case that the end of art claim is avoided if a theory of art links the internal practice of artistic creation to all of art's historical forms

"Artwriting, Nation, and Cosmopolitanism in Britain " Mark A. Cheetham, 2017-07-05 Arguing in favour of renewed critical attention to the nation as a category in art history this study examines the intertwining of art theory national identity and art production in Britain from the early eighteenth century to the present day The book provides the first sustained account of artwriting in the British context over the full extent of its development and includes new analyses of such central figures as Hogarth Reynolds Gilpin Ruskin Roger Fry Herbert Read Art Language Peter Fuller and Rasheed Araeen Mark A Cheetham also explores how the Englishing of art theory which came about despite the longstanding occlusion of the intellectual and theoretical in British culture did not take place or have effects exclusively in Britain Theory has always travelled with art and

vice versa Using the frequently resurgent discourse of cosmopolitanism as a frame for his discourse Cheetham asks whether English traditions of artwriting have been judged inappropriately according to imported criteria of what theory is and does This book demonstrates that artwriting in the English tradition has not been sufficiently studied and that English Art Theory is not an oxymoron Such concerns resonate today beyond academe and the art world in the many heated discussions of resurgent Englishness

Master Narratives and their Discontents James Elkins, 2013-10-18 In this bracing engagement with the many versions of art history James Elkins argues that the story of modernism and postmodernism is almost always told in terms of four narratives Works of art are either seen as modern or postmodern or praised for their technical skill or because of the politics they appear to embody These are master narratives of contemporary criticism and each leads to a different understanding of what art is and does Both a cogent overview of the state of thinking about art and a challenge to think outside the art historical box Master Narratives and their Discontents is the first volume in a series of short books on the theories of modernism by leading art historians on twentieth century art and art criticism

Eyesight Alone Caroline A. Jones, 2005 Even a decade after his death Clement Greenberg remains controversial One of the most influential art writers of the twentieth century Greenberg propelled Abstract Expressionist painting in particular the monumental work of Jackson Pollock to a leading position in an international postwar art world On radio and in print Greenberg was the voice of the new American painting and a central figure in the postwar cultural history of the United States Caroline Jones's magisterial study widens Greenberg's fundamental tenet of opticality the idea that modernist art is

apprehended through eyesight alone to a broader arena examining how the critic's emphasis on the specular resonated with a society increasingly invested in positivist approaches to the world. Greenberg's modernist discourse Jones argues developed in relation to the rationalized procedures that gained wide currency in the United States at midcentury in fields ranging from the sense data protocols theorized by scientific philosophy to the development of cultural forms such as hi fi that targeted specific senses one by one. Greenberg's attempt to isolate and celebrate the visual was one manifestation of a large scale segmentation or bureaucratization of the body's senses. Working through these historical developments Jones brings Greenberg's theories into contemporary philosophical debates about agency and subjectivity. *Eyesight Alone* offers artists, art historians, philosophers and all those interested in the arts a critical history of this generative figure bringing his work fully into dialogue with the ideas that shape contemporary critical discourse and shedding light not only on Clement Greenberg but also on the contested history of modernism itself.

Artists, art historians and art lovers alike can gain fresh insight into how written descriptions of painting and sculpture affect the experience of art.
