**Cost Accounting and Financial Management for**

**Construction Project Managers** Len Holm, 2018-09-03 Proper cost accounting and financial management are essential elements of any successful construction job and therefore make up essential skills for construction project managers and project engineers. Many textbooks on the market focus on the theoretical principles of accounting and finance required for head office staff like the chief financial officer (CFO) of a construction firm. This book's unique practical approach focuses on the activities of the construction management team including the project manager, superintendent, project engineer, and jobsite cost engineers and cost accountants. In short, this book provides a seamless connection between cost accounting and construction project management from the construction management practitioner's perspective. Following a complete accounting cycle from the original estimate through cost controls to financial close out, the book makes use of one commercial construction project case study throughout. It covers key topics like financial statements, ratios, cost control, earned value, equipment depreciation, cash flow, and pay requests. But unlike other texts, this book also covers additional financial responsibilities such as cost estimates, change orders, and project close out. Also included are more advanced accounting and financial topics such as supply chain management, activity-based accounting, lean construction techniques, taxes, and the developer's pro forma. Each chapter contains review questions and applied exercises, and the book is supplemented with an eResource with instructor manual estimates and schedules, further cases, and figures from the book. This textbook is ideal for use in all cost accounting and financial management classes on both undergraduate and graduate level construction management or construction engineering programs. *Create and Use Simple Spreadsheets (Excel 2003)*. A rich, hopeful, and indispensable guide that shows us how the world could be borderless, flourishing, free. Luke de Noronha co-author *Against Borders: The Case For Abolition*. Groundbreaking! This is learning at its most powerful: reframing thinking and activism with the aim of building justice. Bridget Anderson, Professor, University of Bristol. Borders must be abolished. Borders produce and are produced by carceral, racist, classist, sexist, and xenophobic regimes. Border Abolition Now demands transformative politics to dismantle these systems of oppression. Taking the key tenets of abolitionism and applying them to the debate around borders, the contributors bring a rich understanding of the history and context of carceral and policing systems. Heralding from different countries, disciplines, and activist struggles, they show how their theories are being realized through feminist decolonial praxis and how personal experiences of borders and organizing against them inform abolition. Expanding the debate to areas including asylum, detention camps, mobility, and climate change, Border Abolition Now offers new tools for anyone working to defend freedom of movement for all. Sara Riva is a Marie Skłodowska-Curie Research Fellow at the Spanish National Research Council and the University of Queensland. Simon Campbell is an activist researcher focusing on border

infrastructures state violence and abolitionist struggles against the border regime Brian Whitener is an Associate Professor of Spanish at the University at Buffalo and author of *Crisis Cultures The Rise of Finance in Mexico and Brazil* Kathryn Medien is a Lecturer in Sociology at The Open University
