volume set explores all these issues and more in an unprecedented look at the world's children at the dawn of the 21st century. In recent years while many countries have enjoyed a higher standard of living and improved working conditions others have been torn apart by war and incapacitated by famine and are struggling to improve life for their children and their future. Recent concern over the world's children has resulted in a global attempt to define what constitutes an acceptable childhood. New attention has been paid not only to healthcare and secondary education but also to the right to play and increased access to technology. The UN's codification of children's rights has done much to expand our understanding of what is needed for healthy growth and development of children and youth. Organized by region, *The Greenwood Encyclopedia of Children's Issues Worldwide* is the first globally focused set of this magnitude offering extensive up to date coverage of these critical issues. Original chapters accessibly synthesize current data on key topics including education, play and recreation, child labor, family health, laws and legal status, religious life, abuse and neglect, and growing up in the 21st century.

Child Exclusion Among Internally Displaced Populations in Rift Valley and Nyanza Provinces of Kenya Kennedy Nyabuti Ondimu, 2010. Globally over 25 million people are displaced within their own countries by conflicts or human rights violations. In Kenya thousands of families are increasingly being displaced by the effect of inter-ethnic violence, environmental disasters and forced government eviction from forest reserves. The majority of these displaced communities end up squatting in informal settlements in the nearby urban centres or at the fringes of the forest zone where they are exposed to extreme poverty and deprivation. Since almost all the displaced families originate from the rural areas the act of displacement shatters the family based rural economy when they seek refuge in towns. Internally displaced children face many risks due to the violence and uncertainty surrounding both their family's flight and their life in the place of refuge. This report discusses the findings of the Child Exclusion Survey conducted among the internally displaced in Rift Valley and Nyanza provinces between January 2007 and August 2007. The main objective of the study was to examine the extent of child exclusion among IDPs in Kenya in relation to attaining the ideals of the 1989 Convention on the Rights of the Child and the Millennium Development Goals.
