Lost Volume Cornelia Parker, Edward Woodman, 1993 Tir du site Internet de Book Works Lost volume a catalogue of disasters continues Cornelia Parker's preoccupation with destruction Following on from Cold Dark Matter where with the help of the British Army Parker exploded a garden shed crammed with objects Lost volume a catalogue of disasters uses the intimate form of the book to present several flattened objects that through the use of trompe l'oeil appear to have been squashed between the pages of the book Parker crushes these selected objects in a press between sheets of heavy paper creating embossed indentations and reducing the objects to two dimensional representations of their former three dimensional selves The selected objects are seemingly unconnected a contents page that includes objects not flattened in the book confuses matters further The book is perhaps best read as a way of seeing objects and the world in a new light **Art and Destruction** Jennifer Walden, 2014-01-14 Most talk of and writing on art is about its relationship to creation and creativity This of course takes various forms but ultimately the creative act in the making of art works is a key issue What happens when we put together art and destruction This has been referenced in some major areas such as that of art and iconoclasm and auto destructive art movements Less evident are accounts of more intimate smaller scale destructive interventions into the world of the made or exhibited art object or more singular and particularised approaches to the representation of mass destruction This volume addresses these lacunae by bringing together some distinct and very different areas for enquiry which nevertheless share a theme of destruction and share an emphasis upon the history of twentieth and twenty first century art making Scholars and makers have come together to produce accounts of artists whose making is driven by the breaking of or breaking down of matter and medium as part of the creative materialisation of the idea such as Richard Wentworth Bouke de Vries Cornelia Parker to name some of those artists represented here and indeed in one case how our very attempts to write about such practices are challenged by this making process Other perspectives have engaged in critical study of various destructive interventions in galleries Some of these whether as actual staged actions in real time or filmic representations of precarious objects are understood as artistic acts in and of themselves At the same time an account included in this volume of certain contemporary iconoclasts defacing or otherwise effecting destructive attempts upon canonised exhibited artworks reflects upon these destructive interventionists as self styled artists claiming to add to the significance of works via acts of destruction Yet other chapters provide a fresh outlook upon distinctive and unusual approaches to the representation of destruction in terms of the larger scale and landscape of artistic responses to mass destruction in times of war This book will be of interest to readers keen to encounter the range of nuance complexity and ambiguity applicable to the bringing together of art and destruction **Umbrella** ,1994 **Printmaking Today** ,1993
