Handbook of Applied Behavior Analysis John Austin,James Carr,2000-05-01 Applied Behavior Analysis ABA is a highly functional discipline

that instead of searching for abstract internal causes for human behavior looks to external factors that can be influenced. Once identified these factors can be manipulated to make meaningful positive improvements in the lives of real people through positive behavior change. Not surprisingly behavior analysis has been applied to a wide range of human activities from helping troubled teens to organizing industry to maximizing sports performance. ABA interventions for these diverse problems are often creative and they tend to be effective. In this volume some of the field's foremost practitioners offer their expert perspective on a range of topics within ABA. Each chapter is fully referenced and contains a set of reading objectives to facilitate deeper understanding and further discussion of its subject area. While these discussions will be of particular interest to academic behavior analysts and graduate students, clinicians and other practitioners will find the research review helpful and informative.

Survey of Occupational Injuries and Illnesses, 1999. Towards Efficient Regulation of Air Pollution from Coal-Fired Power Plants. Robert O. Mendelsohn, 2019-10-29. Originally published in 1979, this book discusses the model developed to deal with air pollution from coal-fired power plants but it broadly also illustrates how available scientific information can be organized to improve our understanding of pollution control. This information enables economists to discuss the relevant consequences of specific air pollution abatement strategies. In order to demonstrate the usefulness of a computer-based environmental model, the model is applied to a specific case study. The object of the case study is the control of air pollution from a coal-fired electrical generating station in New Haven, USA. The research contained in this volume advances applied risk analysis by combining the insights of economics and environmental sciences.
