management and their practical application in different conditions It gives an account of honeybees as a world resource both in producing honey and other hive products and as pollinators that increase yields of seed and fruit crops It tries for the first time to present an integrated picture with a brief summary of its history of world beekeeping in various continents It is the authors intention that readers will experiment with new ways in which beekeeping methods and equipment might be improved still further and with the application of new technologies and materials seek fresh conceptual approaches to beekeeping problems

Renaissance and Baroque Bronzes from the Fitzwilliam Museum, Cambridge Victoria Avery, Jo Dillon, Fitzwilliam Museum, 2002 In the introductory essay to the catalogue of bronzes from the Fitzwilliam Museum Dr Avery provides the first detailed account of Boscawen himself of the loans and gifts he made to the Museum during his lifetime and his sister s extraordinarily generous bequest Foreword

The Bronze Object in the Middle Ages Ittai Weinryb, 2016-04-18 This book presents the first full length study in English of monumental bronzes in the Middle Ages Taking as its point of departure the common medieval reception of bronze sculpture as living or animated the study closely analyzes the practice of lost wax casting cire perdue in western Europe and explores the cultural responses to large scale bronzes in the Middle Ages Starting with mining smelting and the production of alloys and ending with automata water clocks and fountains the book uncovers networks of meaning around which bronze sculptures were produced and consumed The book is a path breaking contribution to the study of metalwork in the Middle Ages and to the re evaluation of medieval art more broadly presenting an understudied body of work to reconsider what the materials and techniques embodied in public monuments meant to the medieval spectator

Fine Art Metal Casting Richard Rome, Hamish Young, 2003 Mould making and the lost wax casting of metals for fine art are long established techniques which involve both artistic and material science considerations The methods described in Fine Art Metal Casting cross a broad range of disciplines from ceramics and glass through to jewellery and areas of conservation archaeology and palaeontology where replicas must be made This book provides a unique all encompassing visually based demonstrative source which will prove invaluable for art craft and design based practitioners art historians and curators scientists and conservators and researchers and students
