consideration of what sound is and how animals use sounds to communicate Music is not a human invention but we do elaborate sound communication more than other animals in our production of both speech and musical performances The discussion continues with noise an important topic that is poorly understood A well informed musician will refrain from making noise and understand Ambrose Bierce when he stated Of all noise music is the less offensive I include acoustic and electronic instruments in my discussions of music creation In my world electronics dominate every aspect of work and play and most music I create and listen to was created stored and distributed electronically The art and science of recording is an important study for all 21st century musicians Increased sophistication about the nature of sound the art of combining musical sounds and the effect on the listener s brain are all required for music to advance beyond noise toward a more effective means of human communication Stephen Gislason 2016 **The Complete Book of 1900s Broadway Musicals**
