Magic Mountain [Der Zauberberg] Thomas Mann, 1927 Narrative Concepts and Techniques in International Literary Fiction Ken Ireland, 2025-04-15 The omnipresence of narrative in our real life experience and in the media world makes it a vital and relevant factor for study This book presents an easily accessible guide to a series of key narrative topics with concise entries in a transparent format of compact paragraphs allowing quick reference and omitting footnotes and endnotes to aid fluency It uses throughout a wide range of illustrative examples from Western and non Western literature stressing the universal relevance and application of narrative concepts and techniques These examples are intended to stimulate interest in less familiar non mainstream but important texts and to highlight unsuspected features in more familiar texts Engaging with texts from Africa and Asia the Americas and Australasia as well as from Britain and Europe it will appeal to students of comparative literature to creative writers whose awareness of available techniques and devices can prompt fresh ideas and approaches and will introduce general readers can be introduced to new areas of literary experience **The Birth of Tragedy** Friedrich Wilhelm Nietzsche, 2000 Yes what is Dionysian This book provides an answer a man who knows speaks in it the initiate and disciple of his god The Birth of Tragedy 1872 is a book about the origins of Greek tragedy and its relevance to the German culture of its time For Nietzsche Greek tragedy is the expression of a culture which has achieved a delicate but powerful balance between Dionysian insight into the chaos and suffering which underlies all existence and the discipline and clarity of rational Apollonian form In order to promote a return to these values Nietzsche undertakes a critique of the complacent rationalism of late nineteenth century German culture and makes an impassioned plea for the regenerative potential of the music of Wagner In its wide ranging discussion of the nature of art science and religion Nietzsche s argument raises important questions about the problematic nature of cultural origins which are still of concern today **Friedrich Nietzsche and Weimar Classicism (Studies in German Literature, Linguistics, and Culture)** Paul Bishop, Roger H. Stephenson, 2005 The book provides an overview of related scholarly literature discusses Nietzsche s aesthetic theory in The Birth of Tragedy recounts the composition of Thus Spoke Zarathustra and offers an interpretation of the aesthetic gospel in this central work A concluding chapter explores the continuities in aesthetic theory from Leucippus to Ernst Cassirer By demonstrating the constitutive function of the aesthetics of Weimar classicism in his philosophy this book opens up a fresh and original perspective on reading Nietzsche BOOK JACKET **Mendelssohn, Goethe, and the Walpurgis Night** John Michael Cooper, 2007 Mendelssohn Goethe and the Walpurgis Night is a book about tolerance and acceptance in the face of cultural political and religious strife Its point of departure is the Walpurgis Night The Night also known as Beltane or May Eve was supposedly an annual witches Sabbath that centered around the Brocken the highest peak of the Harz Mountains After exploring how a notoriously pagan celebration came to be named after the Christian missionary St Walpurgis ca 710-79 John Michael Cooper discusses the Night s treatments in several closely interwoven works by Goethe and Mendelssohn His

book situates those works in their immediate personal and professional contexts as well as among treatments by a wide array of other artists philosophers and political thinkers including Voltaire Lessing Shelley Heine Delacroix and Berlioz In an age of decisive political and religious conflict Walpurgis Night became a heathen muse a source of inspiration that was neither specifically Christian nor Jewish nor Muslim And Mendelssohn's and Goethe's engagements with it offer new insights into its role in European cultural history as well as into issues of political religious and social identity and the relations between cultural groups in today's world John Michael Cooper Southwestern University is the author of Mendelssohn's Italian Symphony Oxford University Press *Courtesans and Consumption* Nico J. D. Nagelkerke, 2012 **Columbia Dictionary of Modern European Literature** Jean Albert Bédé, William Benbow Edgerton, 1980 With more than 1800 critical entries on the writers and literatures of 33 languages this work presents the entire range of modern European writing from the symbolist and modernist works rooted in the last decades of the nineteenth century through the avant garde and existentialist movement to Barthes Blanchot Breton and continental thought pertinent today **The Sewanee Review**, 1929

A History of Gay Literature Gregory Woods, 1998-01-01 Account of male gay literature across cultures and languages and from ancient times to the present It traces writing by and about homosexual men from ancient Greece and Rome through the Middle Ages and Renaissance to the twentieth century gay literary explosion It includes writers of wide ranging literary status from high cultural icons like Virgil Dante Marlowe Shakespeare and Proust to popular novelists like Clive Barker and Dashiell Hammett and of various locations from Mishima's Tokyo and Abu Nuwas's Baghdad to David Leavitt's New York It also deals with representations of male male love by writers who were not themselves homosexual or bisexual men **The Senses of Modernism** Sara Danus, 2019-01-24 In *The Senses of Modernism* Sara Danus develops a radically new theoretical and historical understanding of high modernism The author closely analyzes Thomas Mann's *The Magic Mountain* Marcel Proust's *Remembrance of Things Past* and James Joyce's *Ulysses* as narratives of the sweeping changes that affected high and low culture in the age of technological reproduction In her discussion of the years from 1880 to 1930 Danus proposes that the high modernist aesthetic is inseparable from a technologically mediated crisis of the senses She reveals the ways in which categories of perceiving and knowing are realigned when technological devices are capable of reproducing sense data Sparked by innovations such as chronophotography phonography radiography cinematography and technologies of speed this sudden shift in perceptual abilities had an effect on all arts of the time Danus explores how perception notably sight and hearing is staged in the three most significant modern novels in German French and British literature *The Senses of Modernism* connects technological change and formal innovation to transform the study of modernist aesthetics Danus questions the longstanding acceptance of a binary relationship between high and low culture and describes the complicated relationship between modernism and technology challenging the conceptual divide between a technological culture and a more properly aesthetic one
