loss of life across the military and civilians alike However the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science Because of this not only Russian but unfortunately many European and American historians found themselves repeating the Soviet myths they had been fed The history of Soviet fighter aircraft did not escape this fate The tale of Stalin s so called Falcons who allegedly shot down dozens and even hundreds of Luftwaffe aircraft was persistently drummed into the heads of many generations of Russian people These heroes supposedly flew Soviet fighters whose technical characteristics were many times superior to their German counterparts with the result that Luftwaffe aces were reportedly afraid of meeting them in the air These primitive propaganda clich s became a model for describing the actions of Stalin s fighter aircraft In this stunning expos Stalin s Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft and the almost slave like conditions in which those aircraft were made

Ecological Security Dennis Clark Pirages, Theresa Manley DeGeest, 2003-07-28 Global environmental politics has emerged from its initial incarnation in the arena of low politics and is rapidly becoming a high politics concern Concern over water pollution air pollution deforestation and related basic environmental issues is giving way to a broader ecological security agenda In this pathbreaking book Dennis Clark Pirages and Theresa Manley DeGeest argue for dramatically broadening the context in which security priorities are established in an age of increasing globalization Addressing the very fundamental question of the sources of premature human deaths and associated insecurity both historically and in the contemporary world the authors observe that in the twentieth century starvation killed nearly as many people as did military conflict But disease was responsible for killing nearly fourteen times as many people as was warfare And in the contemporary world of the twenty first century environmental terrorism and biological warfare are blurring the traditional distinctions between natural disasters accidental deaths and military casualties Ecological Security moves the analysis of global environmental and resource issues to the next level by developing an eco evolutionary perspective for analyzing emerging problems associated with rapid globalization Preserving future ecological security will depend upon maintaining dynamic equilibriums among human populations and between them and pathogenic microorganisms other species and the sustaining capabilities of nature This eco evolutionary framework is used to anticipate and analyze emerging demographic ecological and technological discontinuities and dilemmas associated with rapid globalization The authors conclude by stressing the need for new kinds of global public goods to mitigate the harshest impacts of these rapid and interrelated changes
