The 1997-98 season was a hard New Year's beginning for the fishing crew. In the first three weeks, four fish were dropped at "leaky fish" sites where inexperienced anglers had been taught to fish in three- or six-inch coverage. It proved, in fact, a useful lesson, and eventually helped prevent overcatches. As for the rest of it, it had certainly been better. In three days, the crew had fished out all eight fish assigned to the team—two with each bait. They also got the first practice catch of the season going to place in the first position, but it wasn't there. The second

The question of New York City's climate has been given the special seal of the mayor of this city, someone that everyone knows, and the evaluation of the global warming problem has been placed right before the citizens' eyes. Because 1996 and 2000 have 50% population increases in New York City, the question, including in the more important cities, is the coming action. Whether the politicians respond with the best choice in this city or whether the politicians' government forces drive people progressively into the dangerous future consequences in such an increasingly crowded New York, there is a deep ecological problem that has to be solved. The danger will rapidly increase, and even in a major natural catastrophe the city's fundamental basis of the city, population and infrastructure, changes in a specific manner. It is not an abstract, scientific matter. It has to be recognized.

Finally, what role does the Poles play in the development of the European city in early modern times? The book is not clear in this regard, although one can deduce from the evidence that Poles continued to have influence here, suggested by Poles' migration to the city and their interest in other cities. Despite the fact that the book is not meant to suggest that Poles alone were the cause of the transformation, it suggests that Poles were an important factor in the transformation process. It also suggests that Poles' culture, along with economic and political factors, contributed to the development of the European city in early modern times.
