presentation of historical and contemporary plein air works *Conversations with Nature* Kevin Macpherson, Jeannette Stutzman, Jennifer King, 2018-03 *Conversations with Nature* is designed to be an illuminating guide to a classic medium and the most popular universal subject landscape painting. Most importantly, this book will teach you how to see as an artist. You'll learn to create alluring landscapes bathed with light engulfed in air and presented from nature's own shapes, patterns, and colors. Plein air painting, Impressionism, Oil Painting, Landscape painting, Oil painting supplies, Kevin Macpherson, Nature Artist, Fine Artist, Landscapes, Art Book, Instructional Art Book *Landscapes in Oil* Ken Salaz, 2019-03-19 *Landscapes in Oil* is the first ever comprehensive guide to classical landscape painting reinterpreted for the twenty-first century. Drawing from the tradition established by American painters of the Hudson River School, artists like Thomas Cole, Frederic Church, and George Inness, author and painter Ken Salaz reveals great masters' philosophy and methods, updating their approaches for the contemporary landscape painter. Beginning painters are given the basic tools and step-by-step demonstrations; intermediate painters are challenged with unpublished techniques that allow them to break through to the next level; and advanced painters learn to apply their skills under unified theories. *Landscapes in Oil* devotes a chapter to each of the fundamental elements of landscape painting: drawing, value, color, composition, and light quality, and offers critical advice on selecting tools and materials, choosing colors, and structuring your palette for best results. Emphasizing the necessity of plein air drawing and painting, Salaz demonstrates how to translate small, quick studies made outdoors into full-scale studio paintings. He provides detailed step-by-step breakdowns of the creation of four of his own paintings, focusing not only on application but also on the ideas that underpin every decision a landscape painter must make. The scores of landscape masterworks, past and present, that illustrate this book have been carefully chosen for their aesthetic power and because each embodies a specific aspect of the landscape painter's craft. For Salaz, landscape painting is a noble pursuit, and the goal of the landscape artist is not to paint pretty pictures but to create compelling images that express human beings' profound connection to nature in all its diversity and grandeur. At a time when classical landscape is enjoying a renaissance in art schools, ateliers, and galleries across North America, this book is an essential resource for beginning and experienced painters alike.

The Artist in Nature M. Stephen Doherty, 2002 Collects the Painter of Light's plein air works, discussing the plein air tradition and providing a biographical essay that explores the artist's personal, artistic, and spiritual experiences as they relate to his approach to nature painting.

Landscape Painting Mitchell Albala, 2009-11-17 Because nature is so expansive and complex, so varied in its range of light, landscape painters often have to look further and more deeply to find form and structure, value, patterns, and an organized arrangement of shapes. In *Landscape Painting*, Mitchell Albala shares his concepts and practices for translating nature's grandeur, complexity, and color dynamics into convincing representations of space and light. Concise, practical, and inspirational, *Landscape Painting* focuses on the greatest challenges for the landscape artist, such as Simplification and Massing. Learn to reduce nature's complexity by looking beneath the surface of a subject to

discover the form s basic masses and shapes Color and Light Explore color theory as it specifically applies to the landscape and learn the various strategies painters use to capture the illusion of natural light Selection and Composition Learn to select wisely from nature s vast panorama Albala shows you the essential cues to look for and how to find the most promising subject from a world of possibilities The lessons in Landscape Painting based on observation rather than imitation and applicable to both plein air and studio practice are accompanied by painting examples demonstrations photographs and diagrams Illustrations draw from the work of more than 40 contemporary artists and such masters of landscape painting as John Constable Sanford Gifford and Claude Monet Based on Albala s 25 years of experience and the proven methods taught at his successful plein air workshops this in depth guide to all aspects of landscape painting is a must have for anyone getting started in the genre as well as more experienced practitioners who want to hone their skills or learn new perspectives
