Creating Authenticity Alexander Geurds, Laura Van Broekhoven, 2013-11-27 Authenticity and authentication is at the heart of museums concerns in displays objects and interaction with visitors These notions have formed a central element in early thought on culture and collecting Nineteenth century explorers commissioned museum collectors and pioneering ethnographers attempted to lay bare the essences of cultures through collecting and studying objects from distant communities Comparably historical

archaeology departed from the idea that cultures were discrete bounded entities subject to divergence but precisely therefore also to be traced back and linked to a more complete original form in the even deeper past. Much of what we work with today in ethnographic museum collections testifies to that conviction. Post structural thinking brought about a far reaching deconstruction of the authentic. It came to be recognized that both far away communities and the deep past can only be discussed when seen as desires, constructions and inventions. Notwithstanding this undressing of the ways in which people portray their cultural surroundings and past claims of authenticity and quests for authentication remain omnipresent. This book explores the authentic in contemporary ethnographic museums as it persists in dialogues with stakeholders and how museums portray themselves. How do we interact with questions of authenticity and authentication when we curate, study artefacts, collect, repatriate and make representations? The contributing authors illustrate the divergent nature in which the authentic is brought into play, deconstructed and operationalized. Authenticity, the book argues, is an expression of a desire that is equally troubled as it is resilient.

Archaeology of Identity Margarita Diaz-Andreu, Sam Lucy, 2007-05-07 Bringing together a wealth of scholarship which provides a unique integrated approach to identity. The Archaeology of Identity presents an overview of the five key areas which have recently emerged in archaeological social theory: gender, age, ethnicity, religion, status. This excellent book reviews the research history of each area, the different ways in which each has been investigated and offers new avenues for research and exploring the connections between them. Emphasis is placed on exploring the ways in which material culture structures and is structured by these aspects of individual and communal identity, with a particular examination of social practice. Useful for social scientists in sociology, anthropology and history, under and postgraduates will find this an excellent addition to their course studies.

The Oxford Handbook of Medieval Christianity John H. Arnold, 2014-08-21 The Oxford Handbook of Medieval Christianity takes as its subject the beliefs, practices and institutions of the Christian Church between 400 and 1500AD. It addresses topics ranging from early medieval monasticism to late medieval mysticism, from the material wealth of the Church to the spiritual exercises through which certain believers might attempt to improve their souls. Each chapter tells a story but seeks also to ask how and why Christianity took particular forms at particular moments in history, paying attention to both the spiritual and otherworldly aspects of religion and the material and political contexts in which they were often embedded. This Handbook is a landmark academic collection that presents cutting edge interpretive perspectives on medieval religion for a wide academic audience, drawing together thirty key scholars in the field from the United States, the UK and Europe. Notably, the Handbook is arranged thematically and focusses on an analytical rather than narrative approach, seeking to demonstrate the variety, change and complexity of religion throughout this long period and the numerous different ways in which modern scholarship can approach it. While providing a very wide ranging view of the subject, it also offers an important agenda for further study in the field.
