Finding Meaning in Life, at Midlife and Beyond David Guttman,2008-09-30

Having been mentored by Viktor E Frankl the founder of logotherapy Emeritus Professor David Guttman authored this book so general readers may understand this approach to finding meaning in life at the point when most of us begin deeply wondering over that question at midlife and beyond Especially in this day and age of multiple demands on our time and seemingly non stop obligations we too often find that it is only when the dust settles after a work day or work week or even after retirement when we begin to wonder What is the meaning of life The purpose This book is a new millennium venture into those questions and their answers using logotherapy written by a sage understudy who recalls Frankl with his logotherapy as the epitome of his theory even at 80 years old wise and witty exuding an energy enthusiasm and youthful spirit that belied his years by decades Aging does not diminish our power our energy and our quest for life but reshapes it with new understandings goals and needs But says Guttman we live in a technical and machine based world now in which there is a danger of losing our souls Here readers find a new creative perspective on aging and a fresh spiritual outlook This book will be of interest not only to general readers especially those at midlife and beyond but also to their families friends and students or professionals in the helping professions This unique work provides knowledge to find meaning in life derived from the fields of philosophy psychology religion and gerontology with case illustrations and vignettes to give readers both intellectual pleasure and practical guidance

Happiness is Overrated Raymond A. Belliotti,2004 Happiness Is Overrated begins with an historical overview of the development of the concept of happiness from Plato to contemporary writers

highlighting the best scholarship emerging from philosophy psychology and sociology Belliotti includes practical advice on how to attain happiness and addresses issues centered on the meaning of life Happiness he argues is not the greatest personal good or even a great good in itself In fact sometimes happiness isn't a good at all If we pursue worthwhile exemplary lives and find happiness along the way then we are lucky If we don't then we can take pride and derive satisfaction from a life well lived Ultimately the greatest personal good is realized in leading a robustly meaningful valuable life

Core Questions in Philosophy Elliott Sober, Joel Velasco, 2025-12-12 In this 9th edition of Core Questions in Philosophy Elliott Sober and Joel Velasco use an engaging lecture style format to show students how philosophy is best used to evaluate many different kinds of arguments and to construct sound theories Well known historical texts are discussed not as a means to honor the dead or merely to describe what various philosophers have thought but to engage with criticize and even improve ideas from the past In addition because philosophy cannot function apart from its engagement with the wider society traditional and contemporary philosophical problems are brought into dialogue with the physical biological and social sciences Text boxes highlight key concepts and review questions discussion questions and a glossary of terms are also included Core Questions in Philosophy has served as a premier introductory textbook for three decades with updates to each new edition Key updates to this 9th edition include A new concluding chapter on the meaning of life The integration of non Western thinkers throughout the book Expanded discussions on utilitarianism virtue ethics free will and epistemology Updated material from philosophy and empirical research throughout Revisions to the online list of recommended resources include Additional recommendations of supplementary readings with updated source links to all reading material New recommended videos and podcasts all organized by their relevance to each chapter in the book

Meaning in Life Michael Hauskeller, 2025-03-07 This book develops and defends a subjectivist account of meaning in life which holds that the only place that meaning can ever be found is in the way we experience the living of our lives Many philosophers consider that a life can only be meaningful if it meets certain objective standards For a life to be meaningful they insist it needs to make a difference and contribute something important something that is of value and not just for the person whose life it is In contrast this book contends that meaningfulness is not an objective quality of lives nor is it in some way dependent on such a quality Meaning is not like truth which is commonly thought to be an objective quality of propositions Statements or beliefs are not true simply because someone thinks or feels that they are true Something can appear true that is in fact false But a person cannot feel their life to be meaningful while in fact it is not because meaning does not depend on the presence of certain features without which no life can be rightly considered meaningful The book therefore concludes that many people live a meaningful life Meaning is not the prerogative of an elite minority It is not a measure of human accomplishments This book will be essential reading for philosophers and postgraduate students researching the meaning of life and is also suitable for use in teaching on philosophy courses at university level
