The New World ,1894 *Mind* ,1893 A quarterly review of philosophy God and Intelligence Fulton J. Sheen,2014-01-10 In this book Fulton Sheen addresses what G K Chesterton called the most tremendous question in the world perhaps the only question in the world how man through the power of reason can know the nature of God Tracing the course of philosophy from the Middle Ages to modern times he shows Thomistic realism to be an adequate response to modern ideals Emphasizing reason as a way of attaining knowledge of God Bishop Sheen identifies the current age of agnosticism with its simultaneous distrust of reason In a lucid tone he analyzes the modern attack on intelligence while presenting Scholastic philosophy as the solution to modern problems Bishop Sheen succeeds in actualizing St Thomas to such a degree that he ends up proving that Scholastic philosophy speaks to the world today as freshly as it did to the world of the 13th century Catholics will appreciate the book as an astute criticism of modern theory and coherent introduction to St Thomas while non Catholics will find it useful for its strict reliance on reason and not dogma in the pursuit of philosophical knowledge

Farewell to Reality Jim Baggott,2021-11-15 From acclaimed science author Jim Baggot a lively provocative and intellectually gratifying critique of modern theoretical physics The Economist In this stunning new volume Jim Baggott

argues that there is no observational or experimental evidence for many of the ideas of modern theoretical physics super symmetric particles superstrings the multiverse the holographic principle or the anthropic cosmological principle These theories are not only untrue it is not even science It is fairy tale physics fantastical bizarre and often outrageous perhaps even confidence trickery This book provides a much needed antidote Informed comprehensive and balanced it offers lay readers the latest ideas about the nature of physical reality while clearly distinguishing between fact and fantasy With its engaging portraits of many central figures of modern physics including Paul Davies John Barrow Brian Greene Stephen Hawking and Leonard Susskind it promises to be essential reading for all readers interested in what we know and don t know about the nature of the universe and reality itself
