This book represents a fascinating look at 25 small houses belonging to international architects who've demonstrated their ability to take full advantage of every square foot available. In it, we learn how the movement is challenging consumerism, overwork, and environmental destruction, and facilitating a more meaningful understanding of home. This book highlights that the tiny house movement is more than a lifestyle choice; and that the movement challenges the consumerist lifestyle. In Canada and the United States, we are taught that bigger is

better and that constant growth in our personal wealth accumulation and in the economy is a sign of our success We sacrifice well being and life satisfaction because of our relationship with stuff This leads to personal debt and unsustainability in our relationships communities and the environment This is the first book to examine the tiny house movement as a challenge to consumer culture by demonstrating its potential to offer individual collective and societal change
