Mini Nations And Macro Corporations:

Handbook on Small Nations in the Global Economy D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009 These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development multinational enterprises are the key drivers of international competitiveness Alan M Rugman University of Reading UK Globalization has made every country small The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well This volume is both timely and relevant Small country studies should become mainstream for scholars in business economics and politics Rob van Tulder RSM Erasmus University the Netherlands This book provides a fresh and clear eyed view of the relationship between multinationals and location advantages of countries It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness The authors address crucial issues demanding the attention of teachers researchers practitioners and political leaders Philippe Gugler University of Fribourg Switzerland This unique extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries It advances the notion that small nations increasingly need to rely on both home grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition The expert contributors explore the roles of firms in a range of small successful open economies driven by such multinational enterprises across the globe They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate this Handbook proves to be a fascinating read for academics students and researchers with an interest in business and management economics and international economics

Globalization of Small Economies as a Strategic Behavior in International Business Sergio A. Castello, Terutomo Ozawa, 2014-05-01 This book postulates the proposition that small economies exhibit a higher degree of outward orientation and structural adaptability compared to their larger counterparts within the context of the European Union and two case studies i.e. Catalonia and New Zealand The number of nations has doubled in the last half of the century to around 200 independent economic units Moreover the break up of the former Soviet bloc into a large number of small independent nations in Central and Eastern Europe and the continued threat of separatist groups i.e. Canada Spain and Sri Lanka have sparked economists interest to focus on the size of nations once again This book offers a more comprehensive measurement of smallness than the conventional one for the analysis of the globalization strategies and flexibility of

countries to overcome smallness Small independent economic units when economically successful tend to be more export focused in manufacturing likely to specialize in differentiated manufactures more actively involved with direct overseas businesses more sensitive in strategically managing exchange rates likely to be in a better position to achieve price stability more actively involved in international trade through varying degrees of economic integration likely to have a higher degree of flexibility more actively involved to forge a complementary government firm relationship and likely to have a higher degree of corporatism

Global Strategic Management Jędrzej George Frynas, Kamel Mellahi, 2011-03-17 Emphasising the essential techniques of business best practices this title offers thorough analysis and discussions on concepts such as environmental analysis strategy development and strategy implementation

Global Shipping in Small Nations S. Tenold, M. Jes Iversen, E. Lange, 2011-12-12 This anthology aims to explain why some Nordic shipping companies became world leaders while others failed to respond effectively to the challenges and opportunities of globalization The authors analyse political and institutional patterns alongside the various corporate responses to the many upheavals of global shipping

Global Capitalism and Climate Change Hans A. Baer, 2012-06-28 Many progressive scholars particularly in the social sciences have increasingly come to acknowledge that anthropogenic climate change constitutes yet another contradiction of global capitalism This book constitutes an effort to develop a critical social science of climate change one that posits its roots in global capitalism with its emphasis on profit making a treadmill of production and consumption heavy reliance on fossil fuels and commitment to ongoing economic expansion It explores the systemic changes necessary to create a more socially just and sustainable world system that would possibly start to move humanity toward a safer climate and discusses the role of a burgeoning climate movement in this effort

Language in International Business Mary Yoko Brannen, Terry Mughan, 2016-11-07 Tracing the treatment of language in international business as represented in the Journal of International Business Studies this seminal collection critically explores the conceptualizations of language that have been adopted or ignored by international business scholars over the years and showcases nine articles that have played an important role in establishing and advancing the field In today's increasingly globalized context of business significantly richer theories from interdisciplinary perspectives are needed to explain the complexity of the interplay between multiple facets of language and how they affect day to day operations With insights from linguistics psychology and organizational theory Language in International Business provides an assessment of scholarly efforts to uncover the profound impact that language has on global business today and proposes some important ways in which this nascent field of language in international business may be further advanced Chapter 9 is licensed under a Creative Commons Attribution NonCommercial NoDerivs 3.0 Unported License The Journal of International Business Studies JIBS is an official publication of the Academy of International Business and is the top ranked journal in the field of international business The goal of JIBS is to publish insightful innovative and impactful research on international

Technology Transfer and Economic Growth in Sub-Saharan African Countries Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals

Corporate Criminal Liability and Compliance Management Systems Santiago Wortman Jofre, 2019-08-26 In Corporate Criminal Liability and Compliance Management Systems A Case Study of Spain Santiago Wortman Jofre offers a case study where he examines the way in which Spain understands and implements Compliance Management Systems Corporate criminal liability has become a matter of controversy in civil law countries since it challenges the traditional principle of *societas delinquere non potest* by which corporations cannot be held criminally responsible However corporations have taken a new position in the world's political agenda as evidenced by the 2017 G20's High Level Principles on the Liability of Legal Persons for Corruption The new trend in criminal law advocates for the criminal responsibility of legal persons and pushes for the implementation of Compliance Management Systems as deterrent for corporate criminality Santiago Wortman Jofre then presents evidence on the role of criminal justice and the importance of positive stimuli requirements as effective incentives to drive companies to implement compliance programs

Nordic Model Analyses: S. T. Evensen, 2016-05-31 The crux of this book is that it can

help build Vision and processes for improvements by stances on positive development syndromes versus special interests scenarios That may even open up to serendipity In contrast there are specific econometric models and adjacent historic data which lack contact with today's diverse events of real life i.e. behavioural aspects and the risk of changes It is much too easy to build a scenario based on game theory and or accepting others algorithm based on interpretation of behaviour and risk of changes defined by so called elasticities By embracing the financial economy a ring of well positioned econometricians has gained power Worldwide especially in small Nordic countries where seeking consensus based on historic data is a common practice New insight tends to arrive too late unforeseen events will continue to surprise Such countries are easily exploited by elite circulation and fragmentation of decision making benefiting special interests The GAP between the financial and the real economy will grow Hidden agendas and asymmetric information will thrive The results are losses of resources plus disintegration for a large majority of enterprises and citizens One may say that the demise of the old fashioned Nordic model is embedded in the gullibility of its inmates They look up to authorities and lack the needed oversight agility and sense of urgency to adapt and change To rock the boat and reinvent the Nordic model is much needed It can be attained by focusing on the real economy and the behaviour of its inmates

Inspiring Stewardship Didier Cossin, Ong Boon Hwee, 2016-05-10 Transform from leader to steward to drive growth and make an impact Inspiring Stewardship helps leaders drive sustainable development and growth by balancing short and long term objectives amidst competing interests By examining a range of exceptional individual and organisational stewards alongside insights from quantitative studies this book unlocks the contributions you can make to enhance your influence and secure your legacy Profiles of leaders from Ratan Tata to Bill Gates illustrate what stewardship really means and the attributes and characteristics of steward leaders Are they fundamentally different Where do they get their exceptional drive and resilience Why do they shoulder such huge responsibility Risks rewards motivations and actions are explored in depth to give you a real world view of stewardship and to show you how to embody these principles in your own everyday life The notion of stewardship has never been more relevant to business than it is today as managers struggle to balance present and future interests This book provides clarity direction and guidance for more purpose driven action Understand the concepts and principles of stewardship Discover characteristics of steward leaders across cultures Learn how stewards have shifted the course of their organisations Examine the capabilities that deepen organisational resilience Today ownership of firms is increasingly fragmented investment structures are more and more complex and the time horizons of investors executives and owners do not always coincide Inspiring Stewardship helps you break through the tension and drive sustainable growth through adaptability and good leadership

Business and Government Relations in Africa Robert A. Dibia, 2017-07-06 This book looks at the regulatory regimes that have an impact on business and provides a number of case studies of the relationships between government and economic development around the African continent highlighting different processes and practices It will be of interest both

to students at an advanced level academics and reflective practitioners It addresses the topics with regard to business government relations and will be of interest to researchers academics policymakers and students in the fields of African politics comparative politics public policy business and politics sustainable development and sustainability economic development and managerial economics *Governments, Globalization, and International Business* John H.

Dunning,1997-07-24 It is a cliché to say that we live in a globalized world in which investment flows communications and the operations of multinationals from all parts of the world have changed the character of the international business environment But the easy concept of globalization poses as many questions as it answers and it is the purpose of this book to address these challenges In *Governments Globalization and International Business* a prestigious group of international scholars explore in detail the consequences of globalization defined as the deepening structural interdependence of the world economy In Part 1 John Dunning Richard Lipsey Susan Strange and Stephen Kobrin analyse these changes from different disciplinary perspectives and intellectual backgrounds The basic question they address is what are the consequences of globalization on the nature form and level of domestic economic activity In doing so they also consider the increasing mobility of knowledge and information the role of international corporations and the sovereignty of the nation state in the modern borderless world In Part 2 the different experiences and policies of a number of economies are assessed in a series of country studies These include the G7 countries as well as the developing East Asian economies Latin America and smaller developed countries In the final part John Stopford and Edward Graham stand back and look at the changing role of National and Supranational governance In doing so they underscore a fundamental tenet of the volume that globalization requires national governments to re evaluate various factors of their systemic governance Yet despite apparently convergent trends they argue there are no universal prescriptions for the way governments should respond to globalization and the policy challenge is a more complex one than merely more or less government Computerworld ,1985-02-18 For more than 40

Countries H. Rothgang,Steffen Schneider,2015-03-23 The democratic nation state of the post war era has undergone major transformations since the 1970s and political authority has been both internationalized and privatized The thirteen chapters of this edited collection deal with major transformations of governance arrangements and state responsibilities in the countries of the OECD world A unified conceptual and explanatory framework is used to describe trajectories of state change to explain the internationalization or privatization of responsibilities in the resource law legitimacy and welfare dimensions of the democratic nation state and to probe the state's role in the today's post national constellation of political authority As the contributions show an unravelling of state authority has indeed occurred but the state nevertheless continues to play a key

role in emerging governance arrangements Hence it is not merely a victim of globalization and other driving forces of change

Competitiveness in the Real Economy Rui Vinhas da Silva, 2016-05-23 Value aggregation to goods and services is unbelievably important to the balance of trade of modern nations yet it receives minute attention by economists and policy makers alike In *Competitiveness in the Real Economy* Rui Vinhas da Silva shows that the nature and dynamics of contemporary global competition requires a sharper focus on value aggregation He provides a rounded integrative and multi disciplinary perspective linking national competitiveness economics and management The emphasis is on a transversal philosophy of value aggregation as a key driver of national competitiveness across sectors in the real economy and from production to the consumption of goods and services The links between exports inflows of foreign direct investment FDI and country competitiveness are examined along with the role of exports and the attraction of FDI inflows in building national GDP The author emphasises that culture the notion of being cosmopolitan and understanding aspirational and discriminatory consumers with high disposable income are key drivers of success in the global economy Acknowledging that the complexity of problems comes from diversity of global actors the author highlights the limitations of current economics in responding to contemporary challenges His concern about the management sciences and management learning is that solutions do not lie in the formulation and prescription of universal laws but are contextually laden and derive from an informed intuition that is partly taught and partly experiential The book addresses the implications of all this for how the management skills needed for competitive advantage might best be developed
