Teaching Media Ethics Sherry Baker, 2020-11-25 Both new instructors teaching media ethics for the first time and mature faculty who recognize that media ethics instruction deserves more than being worked into the professional classes find most of their instructional techniques come from observing their own instructors or from hunches The literature of media ethics appears to be long on principle and reasoning but short on how to transmit that body of wisdom to students already dazed by an assault on their right wrong world Accordingly this special issue is aimed at providing some correction to the problem by presenting a few ideas to help instructors whether they labor in the classroom or in the newsroom

Belmont Revisited James F. Childress, Eric M. Meslin, Harold T. Shapiro, 2005-10-03 Research with human subjects has long been controversial because of the conflicts that often arise between promoting scientific knowledge and protecting the rights and welfare of subjects Twenty five years ago the National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research addressed these conflicts The result was the Belmont Report Ethical Principles and Guidance for Research Involving Human Subjects a report that identified foundational principles for ethical research with human subjects respect for persons beneficence and justice Since the publication of Belmont these three principles have greatly influenced discussions of research with human subjects While they are often regarded as the single most influential set of guidelines for biomedical research and practice in the United States and other parts of the world not everyone agrees that they provide adequate guidance Belmont Revisited brings together a stellar group of scholars in bioethics to revisit the

findings of that original report Their responses constitute a broad overview of the development of the Belmont Report and the extent of its influence especially on governmental commissions as well as an assessment of its virtues and shortcomings Belmont Revisited looks back to reexamine the creation and influence of the Belmont Report and also looks forward to the future of research with a strong call to rethink how institutions and investigators can conduct research more ethically

The Ethics of War Saba Bazargan,Samuel C. Rickless,2017-01-23 Just War theory as it was developed by the Catholic theologians of medieval Europe and the jurists of the Renaissance is a framework for the moral and legal evaluation of armed conflicts To this day Just War theory informs the judgments of ethicists government officials international lawyers religious scholars news coverage and perhaps most importantly the public as a whole The influence of Just War theory is as vast as it is subtle we have been socialized into evaluating wars largely according to the principles of this medieval theory which according to the eminent philosopher David Rodin is one of the few basic fixtures of medieval philosophy to remain substantially unchallenged in the modern world Some of the most basic assumptions of Just War Theory have been dismantled in a barrage of criticism and analysis in the first dozen years of the 21st century The Ethics of War continues and pushes past this trend This anthology is an authoritative treatment of the ethics and law of war by both the eminent scholars who first challenged the orthodoxy of Just War theory as well as by new thinkers The twelve original essays span both foundational and topical issues in the ethics of war including an investigation of whether there is a greater good obligation that parallels the canonical lesser evil justification in war the conditions under which citizens can wage war

against their own government whether there is a limit to the number of combatants on the unjust side who can be permissibly killed whether the justice of the cause for which combatants fight affects the moral permissibility of fighting whether duress ever justifies killing in war the role that collective liability plays in the ethics of war whether targeted killing is morally and legally permissible the morality of legal prohibitions on the use of indiscriminate weapons the justification for the legal distinction between directly and indirectly harming civilians whether human rights of unjust combatants are more prohibitive than have been thought the moral repair of combatants suffering from PTSD and the moral categories and criteria needed to understand the proper justification for ending war

structures and processes Displacement by Development Peter Penz, Jay Drydyk, Pablo S. Bose, 2011-01-20 For decades policy makers in government development banks and foundations NGOs researchers and students have struggled with the problem of how to protect people who are displaced from their homes and livelihoods by development projects This book addresses these concerns and explores how debates often become deadlocked between managerial and movementist perspectives Using development ethics to determine the rights and responsibilities of various stakeholders the authors find that displaced people must be empowered so as to share equitably in benefits rather than being victimized They propose a governance model for development projects that would transform conflict over displacement into a more manageable collective bargaining process and would empower displaced people to achieve equitable results Their book will be valuable for readers in a wide range of fields including ethics development studies politics and international relations as well as policy making project management and community development *Dialogues on Ethical Vegetarianism* Michael
