Minimum Wages In Central And Eastern Europe From Protection To Destitution:

Minimum Wages in Central and Eastern Europe Guy Standing, Daniel Vaughan-Whitehead, 1995 The ILO's Central and Eastern European Team has conducted a series of studies concerning the role of minimum wages in the countries of this rapidly transforming region in particular looking at ways in which this role should be revised Based on this research *Minimum Wages in Central and Eastern Europe* examines the most crucial issues in Bulgaria the Czech Republic Hungary Moldavia Poland Romania and Russia and compares their systems with those of western industrialized economies

Minimum Wages, Pay Equity, and Comparative Industrial Relations Damian Grimshaw, 2013-03-05 With growing concern about the conditions facing low wage workers and new challenges to traditional forms of labor market protection this book offers a timely analysis of the purpose and effectiveness of minimum wages in different European countries Building on original industry case studies the analysis goes beyond general debates about the relative merits of labor market regulation to reveal important national differences in the functioning of minimum wage systems and their integration within national models of industrial relations There is no universal position on minimum wage policy followed by governments and social partners Nor is it true that trade unions consistently support minimum wages and employers oppose them The evidence in this book shows that interests and objectives change over time and differ across industries and countries Investigating the pay bargaining strategies of unions and employers in cleaning security retail and construction this book's industry case studies show how minimum wage policy interacts with collective bargaining to produce different types of pay equity effects The analysis provides new findings of ripple effects shaped by trade union strategies and identifies key components of an egalitarian pay bargaining approach in social dialogue The lessons for policy are to embrace an interdisciplinary approach to minimum wage analysis to be mindful of the interconnections with the changing national systems of industrial relations and to interrogate the pay equity effects

Capitalism and Democracy in Central and Eastern Europe Grzegorz Ekiert, Stephen E. Hanson, 2003-09-15 This volume presents a shared effort to apply a general historical institutionalist approach to the problem of assessing institutional change in the wake of communism's collapse in Europe It brings together a number of leading senior and junior scholars with outstanding reputations as specialists in postcommunism and comparative politics to address central theoretical and empirical issues involved in the study of postcommunism The authors address such questions as how historical legacies of the communist regime be defined how their impact can be measured in methodologically rigorous ways and how the effects of temporal and spatial context can be taken into account in empirical research on the region Taken as a whole the volume makes an important contribution to the growing literature by utilizing the comparative historical method to study key problems of world politics

Social Dialogue in Central and Eastern Europe Giuseppe Casale, 1999 Comprises 17 papers which discuss tripartism social dialogue and industrial relations in the countries of Central and Eastern Europe

Globalization and the State in Central and Eastern Europe Jan

Drahokoupil, 2009 This book examines the transformation of the state in Central and Eastern Europe since the end of communism and adoption of market oriented reform in the early 1990s exploring the impact of globalization and economic liberalization on the region's states societies and political economy It compares the different policies and national strategies adopted by key Central and Eastern European states including the Czech Republic Poland Hungary and Slovakia showing how initial internally oriented strategies of market reform privileging domestic sources of investment had by the late 1990s given way to externally oriented strategies emphasising the promotion of competitiveness by attracting foreign investment It explores the reasons behind this convergence considering the influence of internal and external forces and the roles of interests institutions and ideas It argues that internationalization of the state is forged in the processes through which domestic groups linked to transnational capital attain domestic influence necessary to shape state policy and strategy These groups the comprador service sector in particular constitute and organize political social and institutional support of the competition state in the region Overall this book not only provides a detailed account of the political economy of post communist transformation in Central and Eastern Europe but also the processes by which states adapt to the forces of globalization

Labor Market Regulations in Low-, Middle- and High-Income Countries Mr. Martin

Schindler, Ms. Mariya Aleksynska, 2011-07-01 This paper documents a new database of labor market regulations during 1980-2005 in 91 countries including low middle and high income countries and contains information on unemployment insurance systems minimum wage regulations and employment protection legislation In this paper we provide details regarding the data methodology and sources Descriptive statistics indicate that there exists substantial heterogeneity in labor market institutions across regions and income groupings and that much of the sample variation is driven by institutional changes over time in low and middle income countries All indicators are at an annual frequency allowing for the dating of major changes in regulation and are based on data from a variety of sources including the ILO OECD and national agencies

Developments in Central and East European Politics 2 Stephen White, Judy Batt, Paul G. Lewis, 1998

The Fundamentals of Minimum Wage Fixing François Eyraud, Catherine Saget, 2005 This manual draws on the ILO's comprehensive database containing the principal legal provisions and minimum wage fixing mechanisms in 100 countries The minimum wage has had a long and

turbulent history and this study sheds light on its intricacies by providing a thorough overview of the institutions and practices in different countries It outlines the main topics for debate concerning the effects of minimum wages on major social and economic variables such as employment wage inequality and poverty The book considers the various procedures countries use for implementation including the criteria employed to fix the minimum wage and how they are linked to specific country objectives It then measures the efficiency of the minimum wage and focuses on its impact on employment as a major political issue For the benefit of non specialists the validity of econometric models and their results are examined

In Defence of Labour Market Institutions J. Berg,D. Kucera,2008-02-22 Though labour market regulations have been blamed for the poor economic performance of many developing countries the evidence on which this argument rests is weak Through a survey of different labour market institutions in developing countries this book reaffirms the importance of labour market institutions in this era of globalization *Unemployment in Transition* Janice Bell,Tomasz Mickiewicz,2013-09-13

The emergence of open unemployment is an unavoidable consequence of postcommunist transition Some countries notably in the former Soviet Union initially slowed economic contraction But in the longer run slower reformers have generally sustained deeper and more prolonged recessions than faster reforming central European countries Moreover the initially low unemployment rates in the former Soviet Union are now rising and may stabilise at higher post transition equilibrium rates than in Central Europe *Youth Employment and the Future of Work* Council of Europe,Jonathan Evans,Wei

Shen,2010-01-01 Young people are particularly vulnerable to fluctuations in economic trends Youth employment is therefore high on the policy agenda of those concerned with promoting social inclusion While youth targeted employment policies tend to combine both demand side and supply side approaches it is important to recognise that traditional notions of work have more recently been challenged and reconceptualised The old assumptions about gender roles job security and planned careers have thus been transformed by the profound economic and social changes of recent decades The essays collected here were developed from papers first delivered at a research seminar on youth employment organised by the partnership between the Council of Europe and the European Commission in the field of youth They represent a diverse and at times provocative collection of analytic snapshots of the position of young people on the European labour market What emerges is a shared commitment to finding flexible responses to economic globalisation and a concomitant concern for promoting the rights interests and welfare of young people in both training placement and in the workplace P 4 of cover **Beyond a**

One-Dimensional State: An Emerging Right to Autonomy? Zelim Skurbaty,2005-01-01 The beginning of the 21st century is characterized by global structural changes and worldwide concern for the problems surrounding the relationships between states and minority groups Autonomy has become a code word for an all purpose means of inclusion of sub state groups in the three major functions that make for the essence of international law the allocation of competence the furtherance of common interest and the maintenance of international peace Since to be autonomous is to be a law to oneself

and autonomous agents are self governing agents the authors of this present volume try give an answer each from a particular professional perspective to one overriding question what conditions must be met in order to ensure that the autonomous agents govern themselves and govern effectively With a scholarly attention to analytical precision factual accuracy and scrupulous objectivity the authors of the present volume coming from such diverse fields as international law philosophy ethics economics political science detail and explore the protean character of autonomy as both a concept autonomy s subtypes autonomy vs other arrangements for the diffusion of power within heterogeneous societies new definitions of the concept etc and a practice the potential of autonomy in the peaceful resolution of ethnic conflicts comparative case studies ranging from Greenland to Eritrea from the Baltic States to South Asia For all their differences in background and style the authors share the common belief that autonomy if properly understood and applied holds considerable potential for ensuring an effective and harmonious co existence for diverse groups within modern states As such this book will hold particular appeal for all those students academics policymakers practitioners who are on a quest for empowering insights vis vis state minority modus vivendi and ways to mitigate inter group tensions by compromise

Transition and Institutions Giovanni Andrea Cornia,Vladimir Mikhailovich Popov,2001 This book is the first comprehensive assessment of the mortality crisis which has affected most economies in transition but which has remained so far largely unexplained It reconciles long term and short term explanations of the crisis and makes use of special micro data sets never used before By providing a rigorous multidisciplinary analysis of this upsurge in mortality rates the book hopes to contribute to the launch of vigorous policies to tackle this societal problem *The Bulgarian Economy* Derek C Jones,Jeffrey Miller,2019-01-22 First published in 1997 this volume examines how Bulgaria has been an early starter but a slow and often erratic mover in the path of stabilization and systemic transition This book provides a most useful account of the development to date and of the costs associated with Bulgarian strategy or lack of empirical analysis and theoretical reflections especially in comparison with other transition economies It will be of great interest to any scholar official or businessman involved not only with Bulgaria but more generally with post communist countries *Forging Ahead, Falling Behind* Open Media Research Institute,1997 This second annual survey by the Open Media Research Institute presents some 100 contributions on political developments in the 27 countries of the former socialist bloc Sections on individual countries include a map key statistics brief discussions of domestic and foreign policy issues excerpts from important documents and profiles of major personalities Some contributors provide general articles on regional economic developments and the processes involved with building democratic institutions Annotation copyrighted by Book News Inc Portland OR

Inequality, Growth, and Poverty in an Era of Liberalization and Globalization Giovanni Andrea Cornia,2004-03-18 Within country income inequality has risen since the early 1980s in most of the OECD all transitional and many developing countries More recently inequality has risen also in India and nations affected by the Asian crisis Altogether over the last

twenty years inequality worsened in 70 per cent of the 73 countries analysed in this volume with the Gini index rising by over five points in half of them. In several cases the Gini index follows a U shaped pattern with the turn around point located between the late 1970s and early 1990s. Where the shift towards liberalization and globalization was concluded the right arm of the U stabilized at the steady state level of inequality typical of the new policy regime as observed in the UK after 1990. Mainstream theory focusing on rises in wage differentials by skill caused by either North South trade migration or technological change poorly explains the recent rise in income inequality. Likewise while the traditional causes of income polarization high land concentration unequal access to education the urban bias the curse of natural resources still account for much of cross country variation in income inequality they cannot explain its recent rise. This volume suggests that the recent rise in income inequality was caused to a considerable extent by a policy driven worsening in factorial income distribution wage spread and spatial inequality. In this regard the volume discusses the distributive impact of reforms in trade and financial liberalization taxation public expenditure safety nets and labour markets. The volume thus represents one of the first attempts to analyse systematically the relation between policy changes inspired by liberalization and globalization and income inequality. It suggests that capital account liberalization appears to have had on average the strongest disequalizing effect followed by domestic financial liberalization labour market deregulation and tax reform. Trade liberalization had unclear effects while public expenditure reform often had positive effects.

The Politics of Labor in a Global Age
Christopher Candland, Rudra Sil, 2001-09-20

The Politics of Labor in a Global Age is one of the first works to analyse and compare recent shifts in patterns of industrial relations across late industrializing and post socialist economies. The volume features original and timely essays on labor relations at national local and workplace levels as economic and political actors cope with the similar challenges associated with economic adjustment measures and the impact of globalization. The authors reveal that while globalization has threatened the position of organized labor and prompted business and state elites to accommodate greater labor market flexibility the legacies of past institutions remain evident in distinctive trends in labor politics within and across late industrializing and post socialist settings. The comparisons suggest that globalization is best understood not as a source of convergence but as a set of common pressures that are mediated by specific historical inheritances that spur varied responses on the part of industrial relations actors and that facilitate quite diverse institutional outcomes.
