McNeill, George Vrtis, 2017-07-03 Over the past five hundred years North Americans have increasingly turned to mining to produce many of their basic social and cultural objects From cell phones to cars and roadways metal pots to wall tile and even talcum powder minerals products have become central to modern North American life As this process has unfolded mining has also indelibly shaped the natural world and North Americans relationship with it Mountains have been honeycombed rivers poisoned and forests leveled The effects of these environmental transformations have fallen unevenly across North American societies Mining North America examines these developments Drawing on the work of scholars from Mexico the United States and Canada this book explores how mining has shaped North America over the last half millennium It covers an array of minerals and geographies while seeking to draw mining into the core debates that animate North American environmental history generally Taken together the authors contributions make a powerful case for the centrality of mining in forging North American environments and societies Provided by publisher The American West , 1990 *The American West* Michael P. Butler, Michael J. Lansing, 2007-08-06 Tracing events from the pre history to the present day this book offers a concise and accessible history of the American West Explores the complex interactions between and among cultures in the American West Chronologically organized and informed by the latest scholarship Grounded in attention to race class gender and the environment the text focuses on social economic and political forces that shaped the lived experiences of diverse westerners and influenced the patterns of western history *Women Writers of the American West, 1833-1927* Nina Baym, 2012-08-17 This book recovers the names and works of women who wrote about the American West during the nineteenth and early twentieth centuries some of them long forgotten and others better known such as Willa Cather and Mary Austin Holley It reveals how the authors showed women making lives for themselves in the West how they represented the diverse region and how they represented

themselves **Mining Tycoons in the Age of Empire, 1870-1945** Raymond E. Dumett, 2009 The years of the late nineteenth and early twentieth centuries aptly described by Mark Twain as the Gilded Age witnessed an unprecedented level of technological change material excess untrammelled pursuit of profit and imperial expansion Within this dynamic and often ruthless environment many colorful characters strode across the world stage among them the great mining tycoons who constituted one of the major spearheads of global capitalistic expansion and colonial exploitation This volume which carries the epic story to the mid twentieth century provides a truly international perspective on the role of mining entrepreneurs investors and engineers in shaping the economic and political map of the globe in testing management techniques and in setting a vogue for extravagant displays of wealth among the world's rich **The American West at Risk** Howard G. Wilshire, Jane E. Nielson, Richard W. Hazlett, 2008-06-05 The American West at Risk summarizes the dominant human generated environmental challenges in the 11 contiguous arid western United States America's legendary even mythical frontier When discovered by European explorers and later settlers the west boasted rich soils bountiful fisheries immense dense forests sparkling streams untapped ore deposits and oil bonanzas It now faces depletion of many of these resources and potentially serious threats to its few renewable resources The importance of this story is that preserving lands has a central role for protecting air and water quality and water supplies and all support a healthy living environment The idea that all life on earth is connected in a great chain of being and that all life is connected to the physical earth in many obvious and subtle ways is not some new age fad it is scientifically demonstrable An understanding of earth processes and the significance of their biological connections is critical in shaping societal values so that national land use policies will conserve the earth and avoid the worst impacts of natural processes These connections inevitably lead science into the murkier realms of political controversy and bureaucratic stasis Most of the chapters in The American West at Risk focus on a human land use or activity that depletes resources and degrades environmental integrity of this resource rich but tender and slow to heal western U S The activities include forest clearing for many purposes farming and grazing mining for aggregate metals and other materials energy extraction and use military training and weapons manufacturing and testing road and utility transmission corridors recreation urbanization and disposing of the wastes generated by everything that we do We focus on how our land degrading activities are connected to natural earth processes which act to accelerate and spread the damages we inflict on the land Visit www.theamericanwestatrisk.com to learn more about the book and its authors **Chronology of the American West** Scott C. Zeman, 2002-05-28 This four part chronology presents the unfolding of the American West from 23 000 B C E to A D 2001 Not long ago the story of the American West was an uncomplicated tale Its theme was The Winning of the West and its plot simply followed Euro Americans as they galloped across the continent But throughout the last two decades historians like Scott C Zeman have begun to examine the story and separate the myths from the facts Today the history of the American West is about the land itself about conquest and colonization about migration and social change Its

heroes are not only white men but also women and children and peoples of African Asian Native American and European descent In this up to date chronology readers can explore hundreds of political social and cultural plot points from the arrival of the continent s first migrants more than 20 000 years ago to the Wounded Knee Massacre in 1890 and from the completion of the trans Alaska pipeline in 1977 to the shootings at Columbine High School in 2000 **Encyclopedia of Immigration and Migration in the American West** Gordon Morris Bakken,Alexandra Kindell,2006-02-24 To read some sample entries or to view the Readers Guide click on Sample Chapters Additional Materials in the left column under About This Book
