*The Resettlement of British Columbia* Cole Harris, 2011-11-01 In this beautifully crafted collection of essays Cole Harris reflects on the strategies of colonialism in British Columbia during the first 150 years after the arrival of European settlers. The pervasive displacement of indigenous people by the newcomers, the mechanisms by which it was accomplished and the resulting effects on the landscape, social life and history of Canada's westernmost province are examined through the dual lenses of post colonial theory and empirical data. By providing a compelling look at the colonial construction of the province, the book revises existing perceptions of the history and geography of British Columbia. In their entirety, this eloquent collection of nine essays constitutes a provocative and unique investigation into the meaning of colonialism and geographical change in the province. *Geography of British Columbia* Brett McGillivray, 2011-11-01 Why is British Columbia unique within Canada? What are the physical processes that have made this province so rugged and that have produced such wonderful variation in climate and vegetation? Why did non-Natives come to British Columbia and what impact did they have on First Nations? Why were there so few treaties in this province? Why did so many Asians come to this province and then leave for other parts of Canada or return home? How were resources developed in the past and how are those resources developed today? British Columbia has a rich and varied resource base. Forestry, fishing, mining, energy, agriculture and tourism are discussed in terms of their physical characteristics, historical development and present-day importance to the province. For many of these resources, the legacy of exploitation and poor management has been the basis of present-day crises. Other resources such as tourism are steadily increasing, bringing employment and growth to some regions more than others and often running into conflict with the long-established extractive industries. The book is divided into two parts. The first focuses on processes of change and development to the landscape and the people of British Columbia and examines natural hazards, physical processes, European historical geography, First Nations peoples and Asian immigration. The second part contains a detailed examination of the economic geography of the province as well as addressing the present-day issues of urbanization, economic development and resource management. **Mining in Southern British Columbia** Lawrence Kaye Hodges, 1897 **Wrigley's British Columbia Directory**, 1922 Mines Register, 1918 **The Canadian Engineer**, 1904 *Frontier Days in British Columbia* Garnet Basque, 2006-04-20 BC's best history writers bring the province's early days to life in these pages.
