Talking to the Other Side Todd Jay Leonard, 2005 Since its birth in 1848 Spiritualism as a religion, science and philosophy has experienced great highs and lows. At the center of this purely American made modern religious movement are mediums, the people who are able to communicate in some way with spirit entities that are no longer on the earth plane. Based on three years of on-site investigation and a plethora of data and research collected on the modern Spiritualist movement in America, *Talking to the Other Side* focuses upon the ethno-religious aspects of the religion, mediumship and the mediums themselves. The first four chapters offer an expansive review of the history of religion in America, mediumship and the Spiritualist movement. Chapters 5-7 comprise the research and data that were compiled and analyzed based on fieldwork, analysis, a comprehensive questionnaire, personal interviews and published literature on the topic of Spiritualism and mediumship. According to Spiritualist mediums, people don't die, bodies do. *Talking to the Other Side* offers a contemporary look into the lives and backgrounds of the mediums who bridge this world and the spirit world, connecting those who have passed over with those they left behind. *A Companion to Anabaptism and Spiritualism, 1521-1700* John Roth, James Stayer, 2007 This handbook of Anabaptism and Spiritualism provides an informative survey of recent scholarship on the Radical Reformation from the 1520s to the end of the eighteenth century. Each chapter offers a narrative summary that engages current research and suggests directions for future study.

The Rise of Political Advisors in the Westminster System Yee-Fui Ng, 2018-04-17 Political advisors have risen in significance in Westminster countries and have been increasingly thrust into the limelight by headline scandals and through their characterisation in various television series. This increased prominence has led to greater scrutiny of their role and influence. This book demonstrates that the introduction of political advisors into the structure of the executive has led to the erosion of the Westminster doctrine of ministerial responsibility. Adopting a comparative approach, the book analyses the rise in the power and significance of political advisors in the Westminster jurisdictions of the United Kingdom, Australia, New Zealand and Canada. It shows the fundamental shift of the locus of power from the neutral public service to highly political and partisan ministerial advisors. Tracing the divergent paths for legal and political regulation of political advisors, Yee Fui Ng illuminates the tensions that they pose within the Westminster system in terms of the media, politics and faction opposition interfaces. Providing insights for those researching or engaged in politics and public administration, this work will interest scholars and students of politics and public law, policy and administration.

The South Indian Pentecostal Movement in the Twentieth Century Michael Bergunder, 2008-06-06 Making up approximately 20 percent of South India's Protestants, Pentecostals are an influential part of India's Christian culture, yet there is a distinct lack of scholarly focus on this increasingly large group.

This careful well informed study by Michael Bergunder ably fills that gap After a brief historical introduction to the worldwide growth of Pentecostalism Bergunder delves into the history of the South Indian Pentecostal movement in the first section The second section gives a systematic profile of the current movement in South India based on a wide range of source materials and on formal interviews with nearly two hundred leading pastors and evangelists Bergunder finishes his work with prospects for the future Three appendixes and an extended bibliography offer ample ground for further research

loss of hope and residents right to the city It also investigates the epistemology and methodology of urban design using the descriptive analytical approach to evaluate methods of self criticism to address the problems and enhance urban planning and design The literature regarding ten minute neighborhoods is reviewed along with a comparative content analysis of online articles and the resultant principles are tested through site observation It is found that happiness can be promoted by the principle of ten minute pedestrian access to essential services which can viably guide the reformation of urban planning This work recommends that urban planning should be based on the ten minute neighborhood thus improving the future prospects of utopianism in Egypts unknown cities Recently in the first decade of the twenty first century there was a definite human crisis that emerged in the Egyptian cities at the level of local urban communities which reflects on the whole city and the attached ones The problem seems to be in the transformation of some urban sites in the metropolitan and small cities to become dystopian places regarding the dynamic impact of the anti utopian people The concept of anti utopians stands as an intermediate step between livable cities and dystopian communities through the transformation that occurs due to the lack of strategic plans by the administrators and or the experts with a special mention to the plans for poor people Therefore from our perspective there is an urgent need to say that the majority of Egyptian cities should be declared as domains of humanitarian disasters which are caused by human hazards rather than the natural disasters e g earthquakes volcanoes floods whirlwinds and hurricanes Thus the first headmost city that will announce its failure in the structural and human scene will get the self respect and worlds estimate as well
