European countries such expansion took place in a context of heterogeneous and poorly structured markets in societies which stand out for its reliance on domestic workers to provide care work in the household as paid workers in both formal and informal arrangements Care and Care Workers A Latin American Perspective will be a useful tool for sociologists anthropologists social workers gerontologists and other social scientists dedicated to the study of the growing demand for care services worldwide as well as to decision makers dealing with public policies related to care services Society cannot function without the unpaid and poorly and informally paid work of caregivers Having the data and this book presents this data allows public policy to be based on the realities rather than on the prejudices habits or structural injustices of a previous time about gender roles class ethnicity race migrant status This volume not only presents the data then but also shows how some countries have begun to innovate to provide solutions to the problem that some people are overburdened by care while others do little of it Scholars and activists in Latin American countries lead the way in showing both how resistance remains and how to innovate So the rest of the world has much to learn from this volume Excerpt from the Foreword by Professor Joan C Tronto
