**Reflection and the Stability of Belief** Louis E. Loeb,2010-09-15 A unifying theme of Loeb s work is epistemological that Descartes and Hume advance theories of knowledge that rely on a substantial naturalistic component adopting one or another member of a cluster of psychological properties of beliefs as the goal of inquiry and the standard for assessing belief forming mechanisms Thus Loeb shows a surprising affinity between the epistemologies of the two figures surprising because they are often thought of as polar opposites in this respect Descartes and Hume are unique in that their philosophical texts are accessible beyond just a narrow audience in the history of philosophy their ideas continue to be a vital part of the field at large This volume will thus appeal to advanced students and scholars not just in the history of early modern philosophy but in epistemology and other core areas of the discipline

**Strengthening American Democracy** John R. Baker,2024-04-18 Many experts have observed a world wide trend toward democratic deconsolidation reflected in America through declining trust in government at all levels and the rise of authoritarian thinking The trend is rooted in extreme partisan polarization which serves as fertile soil for the rise of anti democratic movements and tendencies This book aims to combat that disturbing trajectory offering readers the tools to engage in and aspire toward a more responsive and accountable democracy Its 46 brief and accessible articles outline a number of institutional structural process oriented and policy related challenges to American democracy In most cases specific proposals for reform are discussed encouraging the reader to think about how to make tangible progress toward a more perfect Union      **Music in Contemporary Philosophy** Martin Scherzinger,2016-01-08 This book examines the functional place of music in contemporary European philosophy of the 20th and 21st centuries The chapters explore the musical dimensions of lesser known figures as well as well known philosophical figures in relation to their lesser known musical dimensions Edmund Husserl Martin Heidegger Jean Fran ois Lyotard Jacques Ranci re and Alain Badiou for example are central figures in debates concerning phenomenology postmodernism and political philosophy Their musical writings however have been largely overlooked Of those discussed here whose musical writings have gained some currency Ernst Bloch Theodor W Adorno Jean Luc Nancy Edward Said and Slavoj i ek music mostly constitutes but a partial aspect of their overall philosophical output These chapters attempt to supplement the gap raising more prominently than hitherto the question concerning music in this philosophical milieu The collection represents some of the distinctive recent work of an emerging generation of American based music scholars tackling the relationship between philosophy and music in a qualitatively new way While this intellectual output cannot be easily summarized one detects certain features If what was once called New Musicology in the 1990s can be characterized by a turn to literary theory and philosophy treated as sources of mostly nonjudgmental inspiration we find here instead a new body of work that turns the tables on the relation between music and philosophy Instead of bringing philosophy to musicology this work critically analyzes how music inhabits

philosophy itself and then assesses the ethical and political dimensions of these philosophical positions and their relation to lived history This book was originally published as a special issue of Contemporary Music Review     *Constructing Identity in and around Organizations* Majken Schultz, Steve Maguire, Ann Langley, Haridimos Tsoukas, 2012-01-19 Constructing Identity in and around Organizations is the second volume in Perspectives on Process Organization Studies a series which explores an emerging approach to the study of organizations that focuses on understanding activities interactions and change as essential properties of organizations rather than structures and state an approach which prioritizes activity over product change over persistence novelty over continuity and expression over determination The constructing of identities those processes through which actors in and around organizations claim accept negotiate affirm stabilize maintain reproduce challenge disrupt destabilize repair or otherwise relate to their sense of selves and others has become a critically important topic in the study of organizations This volume attempts to amplify and possibly refract contemporary debates amongst identity scholars that question established notions of identity as essence entity or thing It calls for alternative approaches to understanding identity and its significance in contexts in and around organizations by conceptualizing it as process that is being continually under construction Based in diverse theoretical and philosophical traditions and contexts contributions by leading scholars to this volume offer new perspectives on how individual and organizational identities evolve and come to be constructed through ongoing activities and interactions
