Minnesota Studies In The Philosophy 3vol:

Philosophy of History Jouni-Matti Kuukkanen, 2020-11-12 With a recent surge of interest in the field a volume taking stock of important theoretical shifts in the philosophy of history is greatly needed A Philosophy of History fills this gap by weaving together a range of perspectives on the field which finds itself at a crossroads and asks where it is headed in the 21st century The book takes a concerted effort to go beyond the customary three fold distinction between the speculative analytic and narrativist approaches in philosophy of history It considers what comes after the enduring narrativist turn Chapters incorporate cutting edge discussions on the relevance of contemporary political phenomena such as populism the relation between science and history pragmatism and the paradigmatic challenge of the Anthropocene It also re evaluates the continued relevance of major historical thinkers like Leibniz and R G Collingwood and the endlessly fresh insights they can offer to key debates in the field today Philosophy of History is a much needed reappraisal of the philosophy and theory of history offering an up to date overview of major developments in the field and addressing the pressing questions of where to go next in a post analytical post narrativist world *Induction, Physics and Ethics* P. Weingartner, G. Zecha, 2012-12-06 Proceedings and Discussion of the 1968 Salzburg Colloquium in the Philosophy of Science Bas van Fraassen's Approach to Representation and Models in Science Wenceslao J. Gonzalez, 2014-02-19 This book analyzes Bas van Fraassen's characterization of representation and models in science In this regard it presents the philosophical coordinates of his approach and pays attention to his structural empiricism as a framework for his views on scientific representations and models These are developed here through two new contributions made by van Fraassen In addition there are analyses of the relation between models and reality in his approach where the complexity of this conception is considered in detail Furthermore there is an examination of scientific explanation and epistemic values judgments This volume includes a wealth of bibliographical information on his philosophy and relevant philosophical issues Bas van Fraassen is a key figure in contemporary philosophy of science as the prestigious Hempel Award shows His views on scientific representation offer new ideas on how it should be characterized and his conception of models shows a novelty that goes beyond other empiricists approaches of recent times Both aspects the characterization of scientific representation and the conception of models in science are part of a deliberate attempt to forge a structural empiricism an alternative to structural realism based on an elaborated version of empiricism *Catalog of Government Publications in the Research Libraries* New York Public Library. Reuben Clark, Jr., Library, 1974 Aristotle's Modal Logic Richard Patterson, 2002-08-22 Aristotle's Modal Logic first published in 1995 presents an interpretation of Aristotle's logic by arguing that a proper understanding of the system depends on an appreciation of its connection to the metaphysics Richard Patterson develops three striking theses in the book

First there is a fundamental connection between Aristotle's logic of possibility and necessity and his metaphysics and that this connection extends far beyond the widely recognised tie to scientific demonstration and relates to the more basic distinction between the essential and accidental properties of a subject Second Aristotle's views on modal logic depend in very significant ways on his metaphysics without entailing any sacrifice in rigour Third once one has grasped the nature of the relationship one can understand better certain genuine difficulties in the system of logic and appreciate its strengths in terms of the purposes for which it was created *Proceedings of the Aristotelian Society for the Systematic Study of Philosophy* Aristotelian Society (Great Britain), 1960 Includes Report of the executive committee for 1887 88 1914 15 list of members in each volume **Zeeman Topologies and the Causal Theory of Spacetime** Thomas A. The Nature of Time Ulrich Meyer, 2013-07-25 The theory of relativity convinced many philosophers that space and time are fundamentally alike and that they are mere aspects of a more fundamental space time In *The Nature of Time* Ulrich Meyer argues against this consensus view Instead of a spatial account of time that treats instants like positions in space he presents the first comprehensive defense of a modal account that emphasizes the similarities between times and the possible worlds in modal logic Modal accounts of time are naturally cast in terms of a tense logic that accounts for temporal distinctions in terms of primitive tense operators Tense logic was originally developed to provide a linguistic theory of verb tense in natural languages but here Meyer proposes that it can be treated as a metaphysical theory of the nature of time Contrary to popular belief such modal accounts of time do not commit us to the view that there is something metaphysically special about the present moment and they are easily reconciled with the theory of relativity **Les fonctions en psychologie** Françoise Parot, 2013-10-24 De quelles fa ons psychologie et biologie sont elles li es Les contributions de ce volume r unissent des chercheurs issus de diff rents champs scientifiques qui partagent le r sultat de leur travail sur des

problématiques aujourd'hui centrales en théorie de la psychologie les relations entre les fonctions psychologiques et les structures biologiques singulièrement neuronales le statut causal des fonctions en psychologie et leur rôle dans les explications la variabilité et la plasticité des fonctions Pour aborder ces questions aussi décisives que compliquées le livre propose d'abord une approche historique située dans un contexte épistémologique cette première partie est donc consacrée à la question du rapport entre structures et fonctions la question des localisations de fonctions dans les structures Dans une deuxième partie c'est le poids de la pensée biologique si puissante sur la psychologie du 20^e siècle qui est étudié historiquement avec une question fondamentale en arrière-plan les fonctions psychologiques sont-elles des fonctions biologiques Enfin est approfondie la nature explicative des fonctions en psychologie qu'expliquent-elles Comment Qu'est-ce qu'elles n'expliquent pas Un ouvrage de référence réunissant les différentes recherches scientifiques sur la psychologie expérimentale et clinique CE QU'EN PENSE LA CRITIQUE Un ouvrage riche et informel conseiller qui voudrait saisir de manière synoptique les différentes manières dont la psychologie a utilisé et utilise encore la notion de fonction et s'initier aux questions philosophiques et méthodologiques posées par ces usages Revue philosophique n° 2 2009 À PROPOS DE L'AUTEUR Françoise Parot est Professeure d'épistémologie et d'Histoire de la Psychologie à l'Université Paris Descartes Auteure d'un Dictionnaire de la psychologie PUF et d'une Introduction à la psychologie PUF elle a dirigé en 2008 l'ouvrage collectif Les fonctions en psychologie Mardaga
