Rosser, 2016-02-17 Legal and environmental concerns related to Indian law and tribal lands remain an understudied branch of both indigenous law and environmental law Native American tribes have a far more complex relationship with the environment than is captured by the stereotype of Indians as environmental stewards Meaningful tribal sovereignty requires that non Indians recognize the right of Indians to determine their own relationship to the land and the environment But tribes do not exist in a vacuum in fact they are deeply affected by off reservation activities and similarly tribal choices often have effects on nearby communities This book brings together diverse essays by leading Indian law scholars across the disciplines of indigenous and environmental law The chapters reveal the difficulties encountered by Native American tribes in attempts to establish their own environmental standards within federal Indian law and environmental law structures Gleaning new insights from a focus on tribal land and property law the collection studies the practice of tribal sovereignty as experienced by Indians and non Indians with an emphasis on the development and regulatory challenges these tribes face in the wake of climate change This volume will advance the reader's knowledge and understanding of these challenging issues

Indian Treaties in the United States Donald L. Fixico, 2018-05-03 This book examines the treaties that promised self government financial assistance cultural protections and land to the more than 565 tribes of North America including Alaska Hawaii and Canada Prior to contact with Europeans and later Americans American Indian treaties assumed unique dimensions often involving lengthy ceremonial meetings during which gifts were exchanged Europeans and Americans would irrevocably alter the ways in which treaties were negotiated for example treaties no longer constituted oral agreements but rather written documents though both parties generally lacked understanding of the other's culture The political consequences of treaty negotiations continue to define the legal status of the more than 565 federally recognized tribes today These and other aspects of treaty making will be explored in this single volume work which serves to fill a gap in the study of both American history and Native American history The history of treaty making covers a wide historical swath dating from the earliest treaty in 1788 to latest one negotiated in 1917 Despite the end of formal treaties largely by the end of the 19th century Native relations with the federal government continued on with the move to reservations and later formal land allotment under the Dawes Act of 1887 **Fish in the Lakes, Wild Rice, and Game in Abundance** James M.
