A Philosophy of the Art School Michael Newall, 2018-10-31 Winner of the American Society for Aesthetics 2019 Outstanding Monograph Prize Until now research on art schools has been largely occupied with the facts of particular schools and teachers This book presents a philosophical account of the underlying practices and ideas that have come to shape contemporary art school teaching in the UK US and Europe It analyses two models that hidden beneath the diversity of contemporary artist training have come to dominate art schools The first of these is essentially an old approach a training guided by the artistic values of a single artist teacher The second dates from the

1960s and is based around the group crit in which diverse voices contribute to an artist's development. Understanding the underlying principles and possibilities of these two models which sit together in an uneasy tension gives new insights into the character of contemporary art school teaching demonstrating how art schools shape art and artists how they can be a potent engine of creativity in contemporary culture and how they contribute to artistic research. *A Philosophy of the Art School* draws on first hand accounts of art school teaching and is deeply informed by disciplines ranging from art history and art theory to the philosophy of art education and creativity.

Experimental Philosophy Joshua Alexander, 2014-02-11 Experimental philosophy uses experimental research methods from psychology and cognitive science in order to investigate both philosophical and metaphysical questions. It explores philosophical questions about the nature of the psychological world, the very structure or meaning of our concepts of things and about the nature of the non-psychological world, the things themselves. It also explores metaphysical questions about the nature of philosophical inquiry and its proper methodology. This book provides a detailed and provocative introduction to this innovative field focusing on the relationship between experimental philosophy and the aims and methods of more traditional analytic philosophy. Special attention is paid to carefully examining experimental philosophy's quite different philosophical programs, their individual strengths and weaknesses and the different kinds of contributions that they can make to our philosophical understanding. Clear and accessible throughout, it situates experimental philosophy within both a contemporary and historical context, explains its aims and methods, examines and
