The book deals mainly with the security of the Islands claim for the autonomy and also the development of the Islands. The isolation and the remoteness of these islands from mainland India once made these islands almost defenseless and as a result these islands were prone to the conventional and non conventional external threats. This book possibly the only of its kind particularly on these islands provides enough knowledge to the readers about once very remote and inaccessible islands on above themes and surely enrich the knowledge of the social scientists defense policy makers administrators planners and even the public.

Finances, military occupation, government, and industrial development of India, discussed in a lecture, etc John Pitt KENNEDY (Lieut.-Colonel, Royal Engineers.), 1858 *Political Economy of Rural Development* Rosemary E. Galli, 1981-06-30 This volume is concerned with integrated social and economic development in the Third World. It directs special attention to the psychological manipulation of peasants in order to keep them on the land and where possible make them more productive. In Part One Henry Bernstein outlines and illustrates concepts for the analysis of contemporary peasantries. His introduction provides a general historical framework for understanding the relationship of contemporary peasantries to modernization. It is followed in Parts Two and Three by case studies of programs in Colombia, Mexico, Hannes Lorenzen and Ernest Feder, Tanzania, Bruno Musti de Gennaro and Bangladesh, Elizabeth Hartmann and James K Boyce. In Part Four Rosemary Galli offers a concluding essay on Rural Development and the Contradiction of Capitalist Development. In this book empirical evidence combines with personal experiences to cut through the rhetoric of those who consider the underdeveloped nation as an abstract unit. It reveals the variety of contemporary rural development strategies. From their synthesis emerges a picture of the internal political configuration of underdevelopment, the role of international capital and technology in rural areas and in assessment of the impact upon peasant farmers. This book persuasively argues that international agencies supporting and supported by national governments and elites promote development policies inimical to the welfare of rural cultivators.

Australia Wendy Patton,2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history *Public Works Appropriations for 1969 for Water and Power Resources Development and the Atomic Energy Commission* United States. Congress. House Appropriations,1968 *The Budget of the United States Government* United States,2004

Andrew Grant,Jesse Salah Ovadia,2022-03-01 There is no question that Africa is endowed with abundant natural resources of different magnitudes However more than a decade of high commodity prices and new hydrocarbon discoveries across the continent has led countless international organizations donor agencies and non governmental organizations to devote considerable attention to the potential of natural resource based development Natural Resource Based Development in Africa places a particular emphasis on the actors that help us understand the extent to which resources could be transformed into broader developmental outcomes Based on a wide variety of primary sources and fieldwork including in person interviews and participant observations this collection contributes to both scholarly and policy discussions around the governance and economic development roles of local entrepreneurs transnational firms civil society groups local communities and government agencies in Africa s natural resource sectors Natural Resource Based Development in Africa

explores the impact that these actors have on regional trends such as resource nationalism and local procurement policies as well as grassroots related issues such as poverty livelihoods gender equity development and human security

Development In Modern Africa Martin S. Shanguhya, Toyin Falola, 2019-10-08 Development in Modern Africa Past and Present Perspectives contributes to our understanding of Africa's experiences with the development process. It does so by adopting a historical and contemporary analysis of this experience. The book is set within the context of critiques on development in Africa that have yielded two general categories of analysis: skepticism and pessimism. While not overlooking the shortcomings of development, the themes in the book express an optimistic view of Africa's development experiences, highlighting elements that can be tapped into to enhance the condition of African populations and their states. By using case studies from precolonial, colonial, and postcolonial Africa, contributors to the volume demonstrate that human instincts to improve material, social, and spiritual worlds are universal. They are not limited to the Western world, which the term and process of development are typically associated with. Before and after contact with the West, Africans have actively created institutions and values that they have actively employed to improve individual and community lives. This innovative spirit has motivated Africans to integrate or experiment with new values and structures, challenges, and solutions to human welfare that resulted from contact with colonialism and the postcolonial global community. The book will be of interest to academics in the fields of history, African studies, and regional studies.

Sustainable Development Goals in Northeast India Subhash Anand, Madhushree Das, Rituparna Bhattacharyya, R. B. Singh, 2023-04-19 This book covers themes related to the geosphere, biosphere, sociosphere, and ecosphere, dealing with changing geographical, environmental, and socio-economic realities to plan a sustainable future for the northeast region (NER) of India. The NER consists of eight states: Assam, Arunachal Pradesh, Tripura, Nagaland, Manipur, Mizoram, Meghalaya, and Sikkim, and they carry political, economic, and social importance. The book integrates the past, present, and future of geospheric attributes, incorporating progress towards the Sustainable Development Goals (SDGs) to meet the demands for improving human wellbeing under diverse and challenging socio-economic, political, and environmental conditions. The key SDGs, such as food and agriculture, health, education, water, energy, and other overarching goals of the region, have yet to incorporate providing sustainable jobs and promoting equality and inclusive development, although there have been a few studies in that regard. The challenges to achieve SDGs in the NER are formidable compared to the rest of India. The NER has put a great deal of effort into achieving the SDGs, mainly in poverty (SDG 1), good health (SDG 3), education (SDG 4), gender (SDG 5), decent work (SDG 8), and reduced inequalities (SDG 10), similar to the rest of the country. However, the standard development indicators such as road length, access to health care, power consumption, and other measures are far below the national average. A multi-pronged strategy has played a pivotal role in the region, but a development strategy to attain the SDGs by 2030 must be more inclusive in empowering people with maximising self-governance, considering the resources, needs, and aspirations of the people. This book evaluates the performance of the SDGs.

and fills in the gaps It includes case studies focusing on different SDGs using advanced cartographic statistical and GIS techniques and methods It also provides unique findings that serve as valuable resources for planners and policy makers so that a sustainable future in Northeast India can be achieved
