Miracle And A Privilege Recounting A Half Century Of Surgical Advance:

A Miracle and a Privilege Moore, Francis Daniels Moore, Miracle and a Privilege Francis D. Moore, 2002 **A**
Miracle and a Privilege Francis D. Moore, M.D., 1995-05-17 Francis Moore entered Harvard Medical School in September of 1935 seven years before penicillin became available During his remarkable career in surgery research and education Moore has witnessed and contributed to some of the most important biomedical advances of the century and his students now practice surgery worldwide In this autobiography he brings humor and warmth to the story of a lifetime at the forefront of medicine In this fascinating book Moore describes his work in radioactive isotope research burn therapy breast cancer treatment transplant science and understanding the process of convalescence Moore's colleagues have included such medical pioneers as George Thorn David Hume Thomas Starzl John Gibbon Steven Rosenberg Harold Urey and Nobel Prize winner Joseph Murray and he recounts the setbacks and victories of their work For example he writes of the adventure he had with Charles Hufnagel in which 25 dogs implanted with Hufnagel's experimental heart valves made their escape into the Connecticut countryside and had to be recovered by dog control officers wielding stethoscopes Yet Moore recalls with equal clarity the young mother who gave him a silver dollar for delivering her baby the husband who begged that his ailing wife be allowed to die with dignity and the desperately sick patients who made themselves available for experimental surgery and treatment In one of his early operations he relieved the pain anguish and threat to a wonderful small boy by removing the boy's diseased appendix He describes this capability as a miracle and a privilege The book includes a gripping account of the aftermath of the Cocoanut Grove nightclub fire in Boston in 1942 when Moore learned the horrific details of death by fire He recounts both his experience with M A S H units and battalion aid stations in Korea and the sudden request from the U S State Department that resulted in his treating King Ibn Saud of Saudi Arabia Moore's life story reflects his serious commitment to human well being as well as his appreciation for the wonder of human life Physicians medical students and all readers alike will find this book informative and inspirational Francis Daniels Moore M D is Moseley Professor of Surgery Emeritus Harvard Medical School and Surgeon in Chief Emeritus Peter Bent Brigham Hospital Boston **In Her Lifetime**
Committee to Study Female Morbidity and Mortality in Sub-Saharan Africa, Institute of Medicine, 1996-03-20 The relative lack of information on determinants of disease disability and death at major stages of a woman's lifespan and the excess morbidity and premature mortality that this engenders has important adverse social and economic ramifications not only for Sub Saharan Africa but also for other regions of the world as well Women bear much of the weight of world production in both traditional and modern industries In Sub Saharan Africa for example women contribute approximately 60 to 80 percent of agricultural labor Worldwide it is estimated that women are the sole supporters in 18 to 30 percent of all families and that their financial contribution in the remainder of families is substantial and often crucial This book provides a solid documentary base that can be used to develop an agenda to guide research and health policy formulation on female health

both for Sub Saharan Africa and for other regions of the developing world This book could also help facilitate ongoing collaboration between African researchers on women s health and their U S colleagues Chapters cover such topics as demographics nutritional status obstetric morbidity and mortality mental health problems and sexually transmitted diseases including HIV

Human Medical Experimentation Frances R. Frankenburg MD,2017-01-16 Intended for students and general readers alike this encyclopedia covers the history of human medical experimentation for better and worse from the time of Hippocrates to the present Thanks to medical experiments performed on human subjects we now have vaccines against smallpox rabies and polio Yet the advances that saved lives too often involved the exploitation of vulnerable populations Covering the history of human medical experimentation from the time of Hippocrates to today this work will introduce readers to the topic through a mixture of essays and ready reference materials The book covers the experiments themselves the people companies and government agencies that carried them out the relevant medical and sociopolitical background and the legislation and other protective measures that arose as a result The encyclopedia is divided chronologically into 6 periods pre 19th century the 19th century the pre World War II 20th century the World War II era the Cold War era and the post Cold War period to recent times Each period begins with an introductory essay and ends with a bibliography Alphabetically arranged entries in each section cover pertinent people experiments and topics The volume is enriched throughout with a wealth of primary sources such as physicians descriptions of their experiments Medical experiments are not just a thing of the past and readers will also learn about questions and debates related to contemporary efforts to advance medical science

Medicine and Health Science Jon Turney,2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company

Health Care in America John C. Burnham,2015-05-15 This comprehensive history of medicine and public health in America covers changes and developments over four centuries from the arrival of the first Europeans to the twenty first century

Living Donor Kidney Transplantation Jonas Wadström,Robert Gaston,2005-07-14 Living donor kidney LDK transplantation has become the definitive approach to the treatment of end stage renal failure providing a better quality of life and the best opportunity for survival when compared with dialysis or transplantation from a deceased donor A timely compendium of the modern day practice of LDK transplantation from a group of

Complications in Pediatric Surgery Michael G. Caty,2008-11-24 Addressing the need of pediatricians and pediatric surgeons for a one stop comprehensive text on pediatric surgery *Complications in Pediatric Surgery* covers each case a physician may encounter upon treating the pediatric surgical patient from fetus to adolescent *Complications in Pediatric Surgery* provides separate and concise chapters each of

The Organ Thieves Chip Jones,2020-08-18 The Immortal Life of Henrietta Lacks meets Get Out in this startling powerful Kirkus Reviews investigation of racial inequality at the core of the heart transplant race In 1968 Bruce Tucker a black man went into Virginia s top research hospital with a head injury only to have his heart taken out of his body and put into the chest of a white

businessman Now in The Organ Thieves Pulitzer Prize nominated journalist Chip Jones exposes the horrifying inequality surrounding Tucker's death and how he was used as a human guinea pig without his family's permission or knowledge The circumstances surrounding his death reflect the long legacy of mistreating African Americans that began more than a century before with cadaver harvesting and worse It culminated in efforts to win the heart transplant race in the late 1960s Featuring years of research and fresh reporting along with a foreword from social justice activist Ben Jealous this powerful book weaves together a medical mystery a legal drama and a sweeping history its characters confronting unprecedented issues of life and death under the shadows of centuries of racial injustice Edward L Ayers author of The Promise of the New South *Spare Parts* Paul Craddock, 2021-08-26 Compelling Christopher Hart The Sunday Times A fascinating book Daily Mail

We think of transplant surgery as one of the medical wonders of the modern world but it's a lot older than you think As ancient as the pyramids its history is even more surprising In *Spare Parts* cultural historian Paul Craddock takes us on a fascinating journey and unearths incredible untold stories from Indian surgeons regrafting lost noses in the sixth century BC to the seventeenth century architect who helped pioneer blood transfusions to the French seamstress whose needlework paved the way for kidney transplants in the early 1900s Expertly weaving together philosophy science and cultural history *Spare Parts* explores how transplant surgery has constantly tested the boundaries between human animal and machine It shows us that the history and future of transplant surgery is tied up with questions not only about who we are but also what we are and what we might become

By turns delightful and disturbing A thoroughly engrossing read that I couldn't put down LINDSEY FITZHARRIS author of *The Facemaker* and *The Butchering Art* *Spare Parts* is a fascinating read filled with adventure delight and surprise RAHUL JANDIAL surgeon and author of *Life on a Knife's Edge* This is a joyful romp through a fascinating slice of medical history WENDY MOORE author of *The Knife Man* [Humanism in Surgery](#) Jonathan McFarland, Susana Magalhaes, Jacek Mostwin, René Genadry, 2025-08-12 Medical Humanities and Narrative Medicine have been increasingly relevant in view of the challenges that new health technologies and the digital world pose to truly person centered healthcare By Narrative Medicine we understand the practice of healthcare with narrative skills that allow professionals to recognize the suffering of others and of themselves be able to interpret verbal and non verbal narratives of illness and be motivated to act in a way that respects the Person of the Patient and of the Professional Surgery like other medical specialties requires space for reflection and debate on the meaning of humanism and its impact on the quality of care This requirement is more pressing in this area because it has escaped inquiry by Medical Humanities and Narrative Medicine We believe that this is due to the nature of the surgical activity carried out in an enclosed place characterized by the use of sophisticated technologies including robotics and artificial intelligence and inaccessible to patients relatives In addition the patients own expectations about surgery reinforce the technological and

highly specialized nature of this area often marked by the neglect of the relational context with clear prejudice to the parties involved and the activity itself. Although this gap has been identified, there has been no space for reflection on the humanization of care in surgery. This book is therefore innovative precisely because it responds to the previously mentioned shortcomings, offering its readers the opportunity to reflect on Humanism in Surgery.

[The Man Who Touched His Own Heart](#) Rob Dunn, 2015-02-03

The secret history of our most vital organ, the human heart. [The Man Who Touched His Own Heart](#) tells the raucous, gory, mesmerizing story of the heart from the first explorers who dug up cadavers and plumbed their hearts' chambers through the first heart surgeries, which had to be completed in three minutes before death arrived to heart transplants and the latest medical efforts to prolong our hearts' lives, almost defying nature in the process. Thought of as the seat of our soul, then as a mysteriously animated object, the heart is still more a mystery than it is understood. Why do most animals only get one billion beats? And how did modern humans get to over two billion, effectively letting us live out two lives? Why are sufferers of gingivitis more likely to have heart attacks? Why do we often undergo expensive procedures when cheaper ones are just as effective? What do Da Vinci, Mary Shelley, and contemporary Egyptian archaeologists have in common? And what does it really feel like to touch your own heart or to have someone else's beating inside your chest? Rob Dunn's fascinating history of our hearts brings us deep inside the science, history, and stories of the four chambers we depend on most.

[Empire of the Scalpel](#) Ira Rutkow, 2022-03-08

From a renowned surgeon and historian with five decades of experience comes a remarkable history of surgery's development, spanning the Stone Age to the present day, blending meticulous medical studies with lively and skillful storytelling. There are not many events in life that can be as simultaneously life-frightening and life-saving as a surgical operation. Yet in America, tens of millions of major surgical procedures are performed annually, but few of us pause to consider the magnitude of these figures because we have such inherent confidence in surgeons. And despite passionate debates about healthcare and the endless fascination with surgical procedures, most of us have no idea how surgeons came to be, because the story of surgery has never been fully told. Now [Empire of the Scalpel](#) elegantly reveals the fascinating history of surgery's evolution from its earliest roots in Europe through its rise to scientific and social dominance in the United States. From the 16th-century saga of Andreas Vesalius and his crusade to accurately describe human anatomy while appeasing the conservative clergy who clamored for his burning at the stake to the hard-to-believe story of late 19th-century surgeons' apathy to Joseph Lister's innovation of antiseptics and how this indifference led to thousands of unnecessary surgical deaths, [Empire of the Scalpel](#) is both a global history and a uniquely American tale. You'll discover how in the 20th century the US achieved surgical world supremacy, heralded by the Nobel Prize-winning, seemingly impossible feat of transplanting a kidney and how the heart-lung machine was developed along with much more. Today, the list of possible operations is almost infinite, from knee and hip replacement to heart bypass and transplants to fat reduction and rhinoplasty, and Rutkow draws on his five-decade career to show us how we got here. Authoritative.

captivating and comprehensive *Empire of the Scalpel* portrays the evolution of surgery in all its dramatic and life enhancing complexity and shows that its history is truly one awe inspiring triumph after another

American Paintings at Harvard Theodore E. Stebbins, Melissa Renn, 2008-01-01 This volume features nearly 500 paintings watercolors pastels and miniatures from Harvard University's storied yet little known collection of American art These works many unpublished are drawn from the Harvard Art Museums the University Portrait Collection the Peabody Museum of Archaeology and Ethnology and other entities and date from the early colonial years to the mid 19th century Highlights include a rare group of 17th century portraits along with important paintings by Robert Feke John Singleton Copley Charles Willson Peale Gilbert Stuart and Washington Allston in addition to works depicting western and Native American subjects by Alexandre de Batz Henry Inman and Alfred Jacob Miller among others Each work is accompanied by scholarly commentary that draws on extensive new research as well as a complete exhibition and reference history An introduction by Theodore E Stebbins Jr describes the history of the collection Lavishly illustrated in color this compendium is a testament to the nation's oldest collection of American art and an essential resource for scholars and collectors alike

Success in Academic Surgery Herbert Chen, Lillian S. Kao, 2011-10-13 How does one become a successful academic surgeon The Association for Academic Surgery has been teaching this to medical students residents and young faculty for the over 20 years and this is the first time the experience and lessons learned have been summarized in a book format *Success in Academic Surgery Part 1* reinforces the curriculum of the Association for Academic Surgery courses and also provides guidance to individual surgeons who have not had the opportunity to attend these courses Thus this book is a valuable reference for medical students surgical residents and young surgical faculty

Reminiscences on Surgery, History and Humanities Luis Horacio Toledo-Pereyra, 2007-09-18 The importance of medical history in the annals of surgery has been frequently underemphasized There is so much we can learn from the deeds and examples of our predecessors There is so much we can admire in their lives and contributions There is so much we can use to guide our professional development This book introduces writings on the history

The Rise and Fall of Modern Medicine James Le Fanu, 2012-11-06 In the years following World War II medicine won major battles against smallpox diphtheria and polio In the same period it also produced treatments to control the progress of Parkinson's rheumatoid arthritis and schizophrenia It made realities of open heart surgery organ transplants test tube babies Unquestionably the medical accomplishments of the postwar years stand at the forefront of human endeavor yet progress in recent decades has slowed nearly to a halt In this judicious examination of medicine in our times which has won the Los Angeles Times Book Prize medical doctor and columnist James Le Fanu both surveys the glories of medicine in the postwar years and analyzes the factors that for the past twenty five years have increasingly widened the gulf between achievement and advancement the social theories of medicine ethical issues and political debates over health care that have hobbled the development of vaccines and discovery of new miracle cures While fully demonstrating the extraordinary progress effected

by medical research in the latter half of the twentieth century Le Fanu also identifies the perils that confront medicine in the twenty first century From a respected science writer important information that has been overlooked or ignored by many physicians New Republic Provocative and engrossing and informative Houston Chronicle A How To Guide For Medical Students Michael J. Englesbe, Michael O. Meyers, 2016-11-17 This book will be a how to guide for medical students interested in pursuing a career in academic surgery It will discuss personal traits and rationale for going into academic surgery It will review accomplishments as a medical student that are key components of beginning an academic career and highlight what makes a student competitive for a surgical program Sections will be devoted to mentorship research experience and personal experiences that lead to success The editors will also focus on gender and work life balance issues that often are perceived as barriers to a career in academic surgery It will also provide key dates and sample application information for students to use as templates **Proceedings, American Philosophical Society (vol. 149, no. 4, 2005) ,**
