explores how madness was defined and diagnosed as a condition of the mind in the Middle Ages and what effects it was thought to have on the bodies minds and souls of sufferers Madness is examined through narratives of miraculous punishment and healing that were recorded at the shrines of saints This study focuses on the twelfth century which has been identified as a Medieval Renaissance a time of cultural and intellectual change that saw among other things the circulation of new medical treatises that brought with them a wealth of new ideas about illness and health With the expanding authority of the Roman Church and the tightening of papal control over canonisation procedures in this period historians have claimed that there was a rationalisation of the miraculous In miracle records illnesses were explained using newly accessible humoral theories rather than attributed to divine and demonic forces as they had been previously The first book length study of madness in medieval religion and medicine to be published since 1992 this book challenges these claims and reveals something of the limitations of the so called medicalisation of the miraculous Throughout the twelfth century demons continue to lurk in miracle records relating to one condition in particular madness Five case studies of miracle collections compiled between 1070 and 1220 reveal that hagiographical representations of madness were heavily influenced by the individual circumstances of their recording and yet were shaped as much by hagiographical patterns that had been developing throughout the twelfth century as they were by new medical and theological standards *The Miracles of Mary in Twelfth-Century France*, 2024-12-15 Murder in a cathedral horrific illnesses and deformities narrow escapes from injury and death a vengeful dragon a wandering eyeball a bawdy monk and other sinners redeemed the accounts of miracles performed by the Virgin Mary gathered and translated in *The Miracles of Mary in Twelfth Century France* provide vivid glimpses into medieval life and beliefs Bruce L Venarde provides fluent translations of the first five collections of Marian miracle narratives from France written in the second quarter of the twelfth century and never before available in English The stories recorded in these collections by Herman of Tournai Hugh Farsit Haimo of Saint Pierre sur Dives John son of Peter and Gautier of Compi gne offer descriptions of travel living conditions medical knowledge conflict between and among lay and religious authorities and the burgeoning cult of the Virgin Mary which had only recently become important in Western Europe Including notes tables and maps that orient and illuminate the texts *The Miracles of Mary in Twelfth Century France* makes these riveting tales available to readers seeking a view into the medieval past *Magic, Miracles, and Medicine* Zachary B. Friedenberg, 2010-10-19 MIRACLES MAGIC AND MEDICINE is a study of medical frustration the inability of the physician to dispense medicine that worked Hundreds of biological medications were prescribed but no more than five or six actually improved the patients condition As a result patients turned to miracles magicians witch doctors astrology and the church For almost a thousand years the churchs answer to disease was prayer Spirits angels and demons lurked everywhere The Antichrist practiced witchcraft and sorcery and soothsayers predicted the future Flagellation was practiced and magician with their smoke and mirrors held sway Among the Romans cabbage was the cure for all disorders and eating the herb

dittany could extract an arrow It was only with the age of science that effective medications were discovered Those practicing witchcraft were accused of intimately consorting with the devil and his demons even having sex with them

A Cultural History of Medicine in the Age of Enlightenment Lisa Smith,2023-02-09 The Enlightenment as concept and time period was haunted by ambiguities about the relationships between mind and body humans and the natural world and reason and imagination The 18th century was inherently contradictory particularly when it came to ideas about medicine and the body The growing optimism that medicine and science could control nature and disease was counterbalanced by the hierarchies of gender race and class being fixed on the body Enlightenment ideals emphasized rationalism and expertise but they existed alongside religious

belief and everyday authority Focusing on Western Europe this volume examines disability and suffering emotional and physical sensations supernatural phenomena and scepticism medical authority and expertise biologization and power and bodily and environmental regulation Volume contributors have used a range of cultural history methodologies from material history to discourse analysis to examine the Enlightenment's tensions The book's chapters centre on topics Environment Food Disease Animals Objects Experiences Mind Brain and Authority that have encouraged contributors to reframe their assumptions about the history of medicine and the Enlightenment

Medical Saints Jacalyn Duffin, 2013-06-13 This book is an exploration of illness and healing experiences in contemporary society through the veneration of saints primarily the twin doctors Saints Cosmas and Damian It also follows the author's personal journey from her role as a hematologist who inadvertently served as an expert witness in a miracle to her research as a historian on the origins meaning and functions of saints Sources include interviews with devotees in both North America and Europe Cosmas and Damian were martyred around the year 300 A D in what is now Syria Called the Anargyroi without silver because they charged no fees they became patrons of medicine surgery and pharmacy as their cult spread widely across Europe The near eastern origin explains their popularity in Byzantine and Orthodox traditions and the concentration of their shrines in Eastern Europe Southern Italy and Sicily The Medici family of Florence also viewed the santi medici as patrons and their deeds were depicted by great Renaissance artists In medical literature they are now revered as patrons of transplantation Duffin's research focuses on how people have taken the saints with them as they moved within Italy and beyond It also shows that their veneration is not confined to immigrant traditions and that it fills important functions in health care and healing Duffin's conclusions are situated within scholarship in medicine medical history sociology anthropology and popular religion and intersect with the current medical debate over spiritual healing This work springs from medical history and Roman Catholic traditions however it extends to general observations about the behaviors of sick people and about the formal responses to individual illness from collectivities in religion medicine and indeed history
