Mirrors for Princes Michael Keeley, 2024 Mirrors for Princes is a history of the business book Predating modern leadership and management literature by thousands of years common to cultures throughout the world mirrors for princes as this genre was known taught kings queens sultans and other rulers how to lead their subjects Machiavelli's The Prince and Aristotle's tips for tyrants in The Politics are but the best known examples Often written for general audiences this literature also taught readers to copy the virtues of fabled leaders and to follow the lead of their own rulers After falling out of favor for the last two centuries the genre found new life in modern mirrors for managers which are riddled with the same self-serving clichés This book seeks to familiarize readers with the clichés of mirrors for princes so they can more easily recognize them in both academic and popular literature on leadership

Micromachined Mirrors Robert Conant, 2013-04-17 Micromachined Mirrors provides an overview of the performance enhancements that will be realized by miniaturizing scanning mirrors like those used for laser printers and barcode scanners and the newly enabled applications including raster scanning projection video displays and compact high speed fiber optic components There are a wide variety of methods used to fabricate micromachined mirrors each with its advantages and disadvantages There are however performance criteria common to mirrors made from any of these fabrication processes For example optical resolution is related to the mirror aperture the mirror flatness and the scan angle Micromachined Mirrors provides a framework for the design of micromirrors and derives equations showing the fundamental limits for micromirror performance These limits provide the micromirror designer tools with which to determine the acceptable mirror geometries and to quickly and easily determine the range of possible mirror optical resolution and scan speed
