Mirror Writing:

Learning Disabilities and Brain Function William H. Gaddes, 2013-04-17 Some may say that this book is long overdue others including myself will state that the book appears at just the right time The latter is likely more true for it is doubtful that many in the professions would until now link issues of learning disabilities with those of neurophysiological dysfunction in the manner in which ultimately must be the case As a matter of fact there are those who deny the relationship completely Lee Wiederholt 1974 1 in his short but excellent review of the historical perspectives of learning disabilities traces the early interest in this problem to the work of Gall 1802 and to his successors Broca 1861 Jackson 1864 Bastian 1869 and a few others Each of these men would at the time of this writing be considered to have interests in the field of neurology although at the time of their investigations neurology per se was but a gleam in the eye of the anatomical beholder A relative detour then took place Cerebral palsy in the decades of the 1940s and 1950s caught the attention of researchers through the work of Winthrop Morgan Phelps orthopedist and George Deaver physiatrist and one or two other medically oriented individuals This was related to the writings of W J Little 1810 1894 It was however Kurt Goldstein Heinz Wemer both eminent German scientists and Alfred A

A Dictionary of Neurological Signs A.J. Larner, 2006-02-08 Although it has been mooted whether the dramatic technological advances in neurological practice i e neuroimaging might render the physical exam redundant others maintain the central importance of neurological examination in patient management A Dictionary of Neurological Signs seeks to elucidate the interpretation of neurological signs neurosemiology their anatomical physiological and pathological significance from the Preface The structured entries in this practical clinical resource provide a snapshot of a wide range of neurological signs Each entry includes definition of the sign brief account of the clinical technique required to elicit the sign description of the other signs which may accompany the index sign Where known the entries also include neuroanatomical basis of the sign explanation of pathophysiological and or pharmacological background neuropathological basis differential diagnosis and brief treatment details The Dictionary provides practical concise answers to complex clinical questions

Graphonomics H.S.R. Kao, R. Hoosain, G.P. Van Galen, 1986-09-01 Graphonomics is the newly created term for the science of handwriting and other graphic skills The Second International Conference on the Neural and Motor Aspects of Handwriting attracted contributions from experimental psychologists neuropsychologists neurologists linguists biophysicists and computer scientists from 12 countries This volume the proceedings of the conference features clinical studies of the neural basis of agraphia and dysgraphia from brain damaged patients The motor aspects of handwriting are further extended to new areas of interests Research on handwriting in the English Chinese and Japanese languages forms the first attempt in the field to investigate handwriting from the psycholinguistic perspective of different languages
