Shakespeare's Mirrors Edward Evans, 2024-09-26 Clear mirrors and The Geneva Bible revolutionary innovations of the Elizabethan age inspired Shakespeare s drive towards a new purpose for drama Shakespeare reversed the conventional mirror metaphor for drama implying drama cannot reflect the substance of human nature and developed a method of characterization through metadrama self awareness and soliloquy to project St Paul s idea of conscience onto the Elizabethan stage This revolutionary method of characterization aesthetic existence beyond performance has long been sensed but remains frustratingly uncategorized Shakespeare s *Mirrors* charts the invention of a drama that staged the unstageable St Paul s metaphysical conception of human nature glimpsed through a looking glass darkly Chapters 4 and 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Mirror, Mirror Mark Pendergrast, 2009-04-28 Of all human inventions the mirror is perhaps the one most closely connected to our own consciousness As our first technology

for contemplation of the self the mirror is arguably as important an invention as the wheel Mirror Mirror is the fascinating story of the mirror's invention, refinement and use in an astonishing range of human activities from the fantastic mirrored rooms that wealthy Romans created for their orgies to the mirror's key role in the use and understanding of light. Pendergrast spins tales of the 2,500-year mystery of whether Archimedes and his burning mirror really set faraway Roman ships on fire, the medieval Venetian glassmakers who perfected the technique of making large flat mirrors from clear glass and for whom any attempt to leave their cloistered island was punishable by death, Isaac Newton whose experiments with sunlight on mirrors once left him blinded for three days, the artist David Hockney who holds controversial ideas about Renaissance artists and their use of optical devices and George Ellery Hale the manic depressive astronomer and telescope enthusiast who inspired and gave his name to the twentieth century's largest ground based telescope. Like mirrors themselves Mirror Mirror is a book of endless wonder and fascination.

Maps and Mirrors Steve Martinot, 2001. Maps and Mirrors explores the links and gaps between the aesthetic and the political at the intersection of philosophy and literature. Testing the major voices of aesthetic and literary theory, it raises important questions about the implicit political contexts and commitments of thinkers from Kant to de Man. Taken together, the essays provide a tour of the complexities and richness of contemporary modes of critique.
