## Miscellanea Mathematica:

*Miscellanea Mathematica* Charles Hutton, 1775      **Miscellanea Mathematica** Peter Hilton, Friedrich Hirzebruch, Reinhold Remmert, 2012-12-06 Mathematics has a certain mystique for it is pure and exact yet demands remarkable creativity This reputation is reinforced by its characteristic abstraction and its own individual language which often disguise its origins in and connections with the physical world Publishing mathematics therefore requires special effort and talent Heinz G tze who has dedicated his life to scientific publishing took up this challenge with his typical enthusiasm This Festschrift celebrates his invaluable contributions to the mathematical community many of whose leading members he counts among his personal friends The articles written by mathematicians from around the world and coming from diverse fields portray the important role of mathematics in our culture Here the reflections of important mathematicians often focused on the history of mathematics are collected in recognition of Heinz G tze's lifelong support of mathematics

Mechanics' Magazine and Journal of Enigneering, Agricultural Machinery, Manufactures, and Shipbuilding ,1846      *The Mechanics' Magazine, Museum, Register, Journal, and Gazette* ,1846      *Iron Perry Fairfax Nursey*,1846      *On Autobiographical Memory* Anita Kasabova,2009-05-27

The aim of this book is to provide an account of autobiographical memory the memory of episodes in the subject s autobiography and to answer the following questions what happens when we remember something Why do we remember some things rather than others The main assumptions in this book are that autobiographical memory is an active structure of a representational nature and that autobiographical memory is a construct of the imagination enabled by a semantic principle the ground consequence relation Anita Kasabova reconstructs the epistemological accounts of memory by the Prague philosopher and mathematician Bernard Bolzano and the Prague physiologist Ewald Hering as well as the phenomenological accounts by Edmund Husserl and Roman Ingarden and discusses various accounts put forward within analytic philosophy She examines the trace theory and its relation to the phenomenology of autobiographical memory and the different temporal perspectives that characterize this form of memory Kasabova formulates a philosophical explication of how autobiographical memory works dealing with issues such as what are the defining features of autobiographical memory how is it structured and how does it function what is a recollection and what are the necessary and for the most part sufficient conditions for a recollection to occur Kasabova argues that such conditions are a sense of self and a sense of connectedness of the self that is semantic rather than causal the subject s sense of ownership of past experiences and the capacity of imagination for mental time travel and thinking about past episodes you have to be able to produce representations not bound to the current situation It is argued that access to the subject s personal past cannot occur otherwise than by construction in imagination In order to reproduce a past experience in the present imagination is necessary for representing a past episode as if it were present Other necessary conditions for autobiographical memory are time awareness a continuous temporal reference frame a successive temporal order and the capacity to refer back to previous positions in time Finally semantic relations of part whole and ground consequence are crucial for explaining autobiographical memory It is argued that the part whole relation is the principle of the memory trace and that the grounding relation co ordinates the subject s perspective on past episodes in recollective statements Kasabova argues that autobiographical memory is basically semantic as it is grounded by and constructed through a sense making relation expressed by the explanatory conjunct because we recall certain experiences or actions rather than other because we are sensitive to the reasons for having experienced it The new book by Anita Kasabova fills a gap between traditional philosophical armchair speculations about memory and contemporary cognitive theories which have grown out of extensive

experimental research The book's main idea that autobiographical memory is not a mere recollection but rather an active reconstruction of our past memories is not an entirely new one Anita Kasabova however provides a new take on this idea by revealing that the theories of Bolzano Hering and Husserl not only bear historical significance but properly reconstructed they might be viewed as an important contribution to the contemporary interdisciplinary studies of memory An appreciable achievement of the book is the chosen conceptual framework it makes the idiosyncratic language of Bolzano and Husserl accessible to contemporary cognitive scientists as well as making the recent cognitive theories understandable for the traditional philosophical scholars Even if this were the only achievement of Anita Kasabova and it is not it would represent her monograph as a book of a great merit for a large community of memory scholars Assoc Prof Lilia Gurova Department of Cognitive Science and Psychology New Bulgarian University

**Mind, Values, and Metaphysics** Anne Reboul, 2014-08-13

This book addresses five main topics of metaphysics in its first section formal objects and truth makers tropes properties and predicates varieties of relations and the notion of explanation in metaphysics The second part of this volume focuses on the history of philosophy with an emphasis on Austrian philosophy the ideas of Bolzano Wittgenstein Locke and Bergson amongst others are explored in the papers presented here This is the first volume in a two volume set that originates from papers presented to Professor Kevin Mulligan covering the subjects that he contributed to during his career including ontology mind and value history and philosophy of mind and philosophy of language This volume contains thirty two chapters written by researchers from across Europe North America and North Africa These papers cover topics in metaphysics ranging from Lehrer and Tolliver's discussion of truth and tropes to Johansson's defence of the distinction between thick and thin relations and Persson and Sahlin's presentation of the difficulties inherent in applying the concept of explanation in metaphysics Papers on the history of philosophy include a look at Bolzano's formative years and his conception of mathematics De Libera examines Brentano's adverbial theory of judgment and Fissette traces the history of the Philosophical Society of the University of Vienna in the late 19th and early 20th century Marion contests the trendy pragmatist accounts that lump Wittgenstein and Heidegger together and there are analyses of Locke and Bergson's work amongst the many papers presented here This volume contains three chapters in French and one in Spanish The second volume of this set looks at ethics values and emotions epistemology perception and consciousness as well as philosophy of mind and philosophy of language
