*The Miscomprehension of Televised Communications* AAAA Education Foundation, inc, 1980 The Comprehension and Miscomprehension of Print Communication Jacob Jacoby, Wayne D. Hoyer, 2013-11-26 First Published in 1987 To writers and visualizers this study sets a range of expectations for comprehension and miscomprehension pointing the finger of caution that even what seems the simplest of language can be misunderstood but also calling forth their best efforts because this benchmark study shows that some communications can be much more successful than others and there is usually room for improvement To advertisers the study says that perhaps we often take comprehension too much for granted being satisfied when consumers respond with something in the general area of our message rather than in the precise area of what is meant To academicians the study gives reliable reference points for thought and dialogue among themselves and the advertising and publishing communities It underlines what intuitive editors and writers have always known but have not always practiced that words and ideas are fragile handle with care if you hope to deliver them intact from one mind to another

**Television and Political Advertising** Frank Biocca, 2013-12-16 This volume represents one of the first major scholarly effort to unravel the psychological and symbolic processing of political advertising Utilizing survey experimental qualitative and semiotic methodologies to study this phenomenon the contributors to Television and Political Advertising trace how political ads help to interpret the psychological reality of the presidential campaign in the minds of millions of voters A product of the National Political Advertising Research Project this interdisciplinary effort is valuable to researchers in advertising communication and consumer psychology since it helps define future work on the relationship between television politics and the mind of the voter This volume Television and Political Advertising Psychological Processes is the first of two and covers such topics as Models and Theories for Viewing Political Television Psychological Processing of Issues Images and Form Differential Processing of Positive and Negative Advertising and The Psychological Contexts of Processing

**Analyzing Media** James W. Chesebro, Dale A. Bertelsen, 1998-10-01 For the past 25 years critics of communication have focused on the content and form of verbal and nonverbal communication while for the most part neglecting what traditionally has been considered a technical rather than a critical issue the impact of how messages are produced or formatted in the various media Topics such as the sexual and violent content of television and films the meaning of pornography and the persuasive efforts of advertisers largely have been examined with the use of social science methodologies that ignore the behavioral and message generating implications of specific media systems themselves Filling a significant void in the literature this volume eschews the notion of communication technologies as neutral conduits and instead depicts them as

active and creative determinants of meaning In doing so it offers an illuminating examination of the dynamic relationships among communication cognition and social organization Providing a framework for the chapters that follow the first section of the book presents a history of human communication from a technological perspective explores the integral role of communication technologies in everyday life and isolates the ways in which criticism can function as an assessment system Three specific technological cultures that define human communication are identified the oral the literate and the electronic The authors identify structural features and discuss the social implications of each They also provide descriptions interpretations and evaluations of these technological cultures and show how criticism changes when the media of transmission is taken into account The book concludes with a cogent discussion of a range of topics surrounding media criticism such as its pedagogical implications how multiple selves can exist in a world of varied communication technologies the integration of communication technologies and how media studies should be incorporated into the disc

Tellis, 2003-11-20 Recently nominated one of five finalists selected for the 2005 Berry AMA Book Prize for best book in marketing Tellis has done a remarkable job He has brought together an amazingly diverse literature Unlike some other sources that claim to be able to measure the effects of advertising Tellis's thoroughness and ability to understand and convey results of various experiments and statistical analyses helps the reader to separate the wheat from the chaff Any student of advertising whether new to the field or a seasoned veteran executive or researcher should read this book Alan G Sawyer University of Florida Effective Advertising How When and Why Advertising Works reviews and summarizes an extensive body of research on advertising effectiveness In particular it summarizes what we know today on when how and why advertising works The primary focus of the book is on the instantaneous and carryover effects of advertising on consumer choice sales and market share In addition the book reviews research on the rich variety of ad appeals and suggests which appeals work and when how and why they work The first comprehensive book on advertising effectiveness Understanding Effective Advertising reviews over 50 years of research in the fields of advertising marketing consumer behavior and psychology It covers all aspects of advertising and its effect on sales including sales elasticity carryover effects content effects and effects of frequency Author Gerard J Tellis distills three decades of academic and professional experience into one volume that successfully dismisses many popular myths about advertising such as Advertising has a powerful influence on consumers and often generates consumer need The effects of advertising persist for decades If an ad fails initially repetition will ensure its ultimate success Ads need only one to three exposures to succeed Advertising by argument is the most effective method The best ads are unique and original Advertising is very profitable Tellis then provides alternatives and establishes the following truths about advertising Advertising is vitally important for

free markets but its action is subtle and its discovery is fragile The effects of advertising are short lived If ads are not initially effective repetition will not make them more effective Scientific principles can show which ads work though firms often ignore advertising research and persist with ineffective ads Advertising by emotion may have the most effective appeal Templates can yield very effective ads Advertising is often unprofitable Effective Advertising will be an important addition to courses at the graduate or undergraduate level in advertising marketing communication and journalism It will also be an invaluable reference for professionals and researchers working in these fields

Attitudes In and Around Organizations Arthur P. Brief, 1998-06-08 How do the attitudes people bring with them to the workplace attitudinal baggage affect thoughts feelings and actions in organizations How are the attitudes of those outside an organization stockholders customers suppliers government officials and the public at large affected by the organization Attitudes In and Around Organizations provides a concise summary of what we know about attitudes and suggests what we might discover by adopting novel means both conceptual and methodological for studying attitudes in and around organizations Arthur P Brief provides an overview of the job satisfaction literature including a redefinition of job satisfaction In addition he examines the various means by which attitudes have been measured attitude formation and change and the resistance of attitudes to change efforts Groups whose attitudes are organizationally relevant customers for example are examined in order to illustrate how organizations affect the attitudes of people beyond their boundaries and to determine how organizations can influence salient attitudes in their environments The concluding chapter offers the reader a view of the future and suggests ideas for future research Students researchers consultants and organizational decision makers will find this a relevant engaging and thought provoking resource
