Population Consumption And The Environment Religious And Secular Responses:

Population, Consumption, and the Environment Harold Coward, 1995-11-16 This book concentrates on the different ways in which the major world religions view the problems of overpopulation and excess resource consumption and how they approach possible solutions After examining the natural background and the human context the book moves on to consider both religious and secular approaches It analyzes how a particular religion's scriptures comment on the nature of people the environment people's place in the environment and their roles and responsibilities The historical dimension is derived from reviewing a particular religion's record in teaching about these issues often demonstrating how broader issues are addressed Practical lessons are learned from religious guidelines that deal with current problems and offer solutions The authors consider Aboriginal spirituality Judaism Christianity Islam Hinduism Buddhism and Chinese religions The secular approaches include secular ethics North South relations market forces the status of women and international law Population, Consumption, and the Environment

Harold G. Coward, 1995-01-01 Shows how the major world religions view the environmental problems of over population and excess resource consumption and how they approach possible solutions

Population Growth, Resource Consumption, and the Environment Rick Searle, 2006-01-01 A public policy summary of the academic chapters presented at the 1993 Whistler Conference Population Consumption and the Environment in which scholars from the world religions and the aboriginal traditions as well as scientists demographers philosophers and economists from Canada the U S Africa Japan and India examined the double sided problem of population pressure and excess consumption and the resulting degradation of the environment **The Oxford Handbook of Religion and Ecology**

Roger S. Gottlieb, 2006-11-09 The last two decades have seen the emergence of a new field of academic study that examines the interaction between religion and ecology Theologians from every religious tradition have confronted world religions past attitudes towards nature and acknowledged their own faiths complicity in the environmental crisis Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings The proposed handbook will serve as the definitive overview of these exciting new developments Divided into three main sections the book's essays will reflect the three dominant dimensions of the field Part one will explore traditional religious concepts of and attitudes towards nature and how these have been changed by the environmental crisis Part II looks at larger conceptual issues that transcend individual traditions Part III will examine religious participation in environmental politics Handbook of Global Environmental Policy and Administration

Dennis Soden, Brent R. Steel, 1999-07-16 Presenting case studies involving Rwanda Nepal Australia Japan and Mexico including real time policy and administrative questions this versatile reference text provides a wide perspective on national and international environmental problems and policies featuring discussions with a regional emphasis as well as global significance Pooling the work of over 60 international contributors in disciplines ranging

from anthropology to political science the Handbook of Global Environmental Policy and Administration illustrates how environmental concerns are incorporated into administrative functions and policy processes *Encyclopedia of Global Population and Demographics* James Ciment, Immanuel Ness, 2014-01-21 This up to date and comprehensive encyclopedia focuses on the population in each of the 194 countries of the world Emphasis is on the world's population at the end of the twentieth century and on predictions for the next fifty years This will be the authoritative source of information for students scholars librarians government officials and journalists *Ethics for a Small Planet* Daniel C. Maguire, Larry L. Rasmussen, Reinhold Niebuhr Professor Emeritus of Social Ethics Larry L Rasmussen, 1998-01-01 A radical new look at the religious economic and political roots of terracide and how things can change for the better *Fifty Years of Religious Studies in Canada* Harold Coward, 2014-11-07 In Canadian universities in the early 1960s no courses were offered on Hinduism Buddhism or Islam Only the study of Christianity was available usually in a theology program in a church college or seminary Today almost every university in North America has a religious studies department that offers courses on Western and Eastern religions as well as religion in general Harold Coward addresses this change in this memoir of his forty five year career in the development of religious studies as a new academic field in Canada He also addresses the shift from theology classes in seminaries to non sectarian religious studies faculties of arts and humanities the birth and growth of departments across Canada from the 1960s to the present the contribution of McMaster University to religious studies in Canada and Coward's Ph D experience there the Centre for Studies in Religion and Society at the University of Victoria and the future of religious studies as a truly interdisciplinary enterprise Coward's retrospective while not a history as such documents information from his varied experience and wide network of colleagues that is essential for a future formal history of the discipline His story is both personally engaging and richly informative about the development of the field *Measuring and Evaluating Sustainability* Sarah E. Fredericks, 2013-08-15 The indexes used by local national and international governments to monitor progress toward sustainability do not adequately align with their ethical priorities and have a limited ability to monitor and promote sustainability This book gives a theoretical and practical demonstration of how ethics and technical considerations can aid the development of sustainability indexes to overcome this division in the literature and aid sustainability initiatives Measuring and Evaluating Sustainability develops and illustrates methods of linking technical and normative concerns during the development of sustainability indexes Specifically guidelines for index development are combined with a pragmatic theory of ethics that enables ethical collaboration among people of diverse ethical systems Using the resulting method of index development the book takes a unique applied turn as it ethically evaluates multiple sustainability indexes developed and used by the European Commission researchers and local communities and suggests ways to improve the indexes The book emphasizes justice as it is the most prevalent ethical principle in the sustainability literature and most neglected in index development In addition to the ethical principles common to international

sustainability initiatives the book also employs a variety of religious and philosophical traditions to ensure that the ethical evaluations performed in the text align with the ideals of the communities using the indexes and foster cross cultural ethical dialogue This volume is an invaluable resource for students researchers and professionals working on sustainability indicators and sustainability policy making as well as interdisciplinary areas including environmental ethics environmental philosophy environmental or social justice ecological economics businesses sustainability programs international development and environmental policy making

Biodiversity Conservation Ethics in Major Religions H. S. A. Yahya, 2010-10 Covering three broader issues biodiversity conservation religious doctrine and environment the book Biodiversity Conservation Ethics in Major Religions is the result of a unique approach It attempts to initiate scientific discourse through the fabric of religions Spread across 15 chapters the book covers the essence of 10 religions on biodiversity encompassing a wide range of issues related to conservation The book promises to be a useful resource for biodiversity students researchers and protected area managers and also for religious scholars who are invited to look at the broader themes of religions beyond theology

Traer, 2010-08 Doing Environmental Ethics offers a way to face our ecological crisis that draws on environmental science economic theory international law and religious teachings as well as philosophical arguments It engages students in constructing ethical presumptions based on our duty to other persons and species and also to ecosystems our character

Religion and Ethnicity in Canada Paul Bramadat, David Seljak, 2009-10-10 As the leading book in its field Religion and Ethnicity in Canada has been embraced by scholars teachers students and policy makers as a breakthrough study of Canadian religio ethnic diversity and its impact on multiculturalism A team of established scholars looks at the relationships between religious and ethnic identity in Canada s six largest minority religious communities Hindus Buddhists Sikhs Jews Muslims and practitioners of Chinese religion The chapters also highlight the ethnic diversity extant within these traditions in order to offer a more nuanced appreciation of the variety of lived experiences of members of these communities Together the contributors develop consistent themes throughout the volume among them the changing nature of religious practice and ideas current demographics racism and the role of women Chapters related to the public policy issues of healthcare education and multiculturalism show how new ethnic and religious diversity are challenging and changing Canadian institutions and society Comprehensive and insightful Religion and Ethnicity in Canada makes a unique contribution to the study of world religions in Canada A Cross-Cultural Dialogue on Health Care Ethics Harold Coward, Pinit

Ratanakul, 2006-01-01 The ethical theories employed in health care today assume in the main a modern Western philosophical framework Yet the diversity of cultural and religious assumptions regarding human nature health and illness life and death and the status of the individual suggest that a cross cultural study of health care ethics is needed A Cross Cultural Dialogue on Health Care Ethics provides this study It shows that ethical questions can be resolved by examining the ethical principles present in each culture critically assessing each value and identifying common values found within all traditions It encourages the development of global awareness and sensitivity to and respect for the diversity of peoples and their values and will advance understanding as well as help to foster a greater balance and a fuller truth in consideration of the human condition and what makes for health and wholeness *Why Religion and Spirituality Matter for Public Health* Doug Oman, 2018-05-08 This volume reviews the exploding religion spirituality R S and health literature from a population health perspective It emphasizes the distinctive Public Health concern for promoting health and preventing disease in societies nations and communities as well as individuals Part I offers a rigorous review of mainstream biomedical and social scientific theory and evidence on R S health relations Addressing key gaps in previous literature it reviews evidence from a population health viewpoint surveying pertinent findings and theories from the perspective of Public Health subfields that range from Environmental Health Sciences to Public Health Nutrition to Health Policy Management and Public Health

Education In Part II practitioners describe in detail how attending to R S factors enhances the work of clinicians and community health practitioners R S provides an additional set of concepts and tools to address opportunities and challenges ranging from behavior and institutional change to education policy and advocacy Part III empowers educators analyzing pedagogical needs and offering diverse short chapters by faculty who teach R S health connections in many nationally top ranked Schools of Public Health International and global perspectives are highlighted in a concluding chapter and many places throughout the volume This book addresses a pressing need for Public Health research practice and teaching A substantial evidence base now links religious and spiritual R S factors to health In the past 20 years over 100 systematic reviews and 30 meta analyses on R S health were published in refereed journals But despite this explosion of interest R S factors remain neglected in Public Health teaching and research Public Health lags behind related fields such as medicine psychology and nursing where R S factors receive more attention This book can help Public Health catch up It offers abundant key resources to empower public health professionals instructors and students to address R S serving at once as a course text a field manual and a research handbook

The National Environmental Policy Act Lynton Keith Caldwell, 1998 The National Environmental Policy Act has grown more not less important in the decades since its enactment No one knows more about NEPA than Lynton Caldwell And no one has a clearer vision of its relevance to our future Highly recommended David W Orr Oberlin College What has been achieved since the National Environmental Policy Act was passed in 1969 This book points out where and how NEPA has affected national environmental policy and where and why its intent has been frustrated The roles of Congress the President and the courts in the implementation of NEPA are analyzed Professor Caldwell also looks at the conflicted state of public opinion regarding the environment and conjectures as to what must be done in order to develop a coherent and sustained policy
