Geography of the 'New' Education Market Chris Taylor, 2018-02-06 This title was first published in 2000 A series of major reforms during the 1980s and 1990s have led to the transformation of the Education System in England and Wales The new system is now based on market principles in schooling resources Parents now have the opportunity to state a preference over the school they would like their children to attend This fascinating book sets out the new geographies of education focusing on the spatial organization of the new market system Using Geographical Information Systems GIS it examines patterns of competition and choice based on pupil home postcodes and relates these to the decision making process of parents It also makes comparisons between different LEAs and schools in urban and rural areas analyzing the constraints created by space and geography In considering the effectiveness and impact of this new form of provision the book plays an important role in understanding and appreciating the impact of the education market upon social mobility and community structure

Population Matters A G Champion, 1993-06-28 The purpose of this book is to examine the scale and significance of the local dimensions of these developments and the implications for central government complementing the existing literature which focuses almost entirely on the overall national picture It

contains a set of ten original studies which demonstrate the existence of marked geographical variations in population profiles and trends and highlight the main implications and responses The focus is primarily on those policy areas where there needs to be a local scale mechanism for decision making and implementation such as education labour recruitment housebuilding needs social services and health care

Britain's Population Steven Jackson, 2013-01-11 Britain's Population addresses issues relating to the demographic characteristics of British society Many of the contemporary features of the population relate to changes in the past particularly the ups and downs in attitudes to marriage and family formation The history of these trends is considered including the baby boom of the 1960s when three million children were added to the population within the space of ten years Jackson argues that the impact of this bulge generation can still be identified and will become of increasing importance when the generation reaches retirement age Current trends in fertility are influenced by the changing structure of the labour market and by the delay in marriage and child bearing to later life The 1990s has been the era of the double income no kids yet partners and the thirty something mother In this book Stephen Jackson highlights how the plight of single mothers the problem of funding pensioners and the future of the welfare state all depend on demographic trends in society

Collaborative Planning Patsy Healey, 2020-03-06 Reviews of 1st edition A major carefully argued contribution which should raise the discourse among planning theorists to a new level a level reserved for a book that succeeds in the ambitious task of weaving together into one fabric theories of planning and theories in planning

Rachelle Alterman and Tamy Stav Town Planning Review A visionary and important work A McArthur Planning and Design A brilliant exposition of the development of theoretical concepts of planning in the second half of the 20th century A Gilg Perspectives in Rural Policy and Planning Spatial and environmental planning is an essential feature of all but the very simplest of societies Its form and role and the principles on which it should be based however have become increasingly controversial questions In this important book Patsy Healey draws on a wide range of new thinking in social political and spatial theory to provide a framework for planning which is rooted in the institutional realities of our increasingly fragmented societies but designed to foster communication and collaborative action The second edition includes a major new chapter assessing recent developments in theory and practice

Methods of Environmental Impact Assessment Peter Morris, Riki Therivel, 2001 Written by experts this text deals with how environmental impact assessment should be carried out for specific environmental components such as air and water

Complex Policy Planning Philip Haynes, 2018-08-13 First published in 1999 this book examines recent developments in the application of chaos and complexity theory to the applied social sciences and the implications for the government planning of social care services The study argues that there are fundamental limitations to traditional government political and managerial planning structures Chaos and complexity theory shows that the effects of time and space are critical aspects for planners to consider Small changes in isolated social or individual factors can have larger scale effects on the future validity of a policy programme In particular rigid linear

statistical calculations like the Government Standard Spending Assessment can undermine the ability of local authorities to make realistic plans. It is proposed that government political strategies and managerial methods of analysis need to better understand the complexity of information available to them. New political and institutional typologies are required if planning activity is to evolve to be of optimal social value.

Creative Approaches to Planning and Local Development Abdelillah Hamdouch, Torill Nyseth, Christophe Demaziere, Anniken Førde, José Serrano, Nils Aarsæther, 2016-07-15. This book project highlights creative approaches to planning and local development. The dynamic complexity, diversity and fluidity which characterize contemporary society represent challenges for planning and development endeavours. While research and policy work has extensively focused on large cities and on metropolitan regions, there has been relatively little work on smaller places. This book shows that if these new challenges affect all places and regions, small and medium sized towns (SMSTs) are suffering many specific problems that call imperatively for the design and implementation of very imaginative creative approaches to planning and local development. What could enhance creativity in local development and planning? Is it possible to talk about creative capacity building at the level of a town that might release imaginative and innovative activities? Under what local and non local conditions is creativity being initiated and flourishing? What are the major obstacles and in what way can these be contained in order to safeguard pockets of creative action? Interdisciplinary and with case studies from France, Norway and other European countries, this volume presents a wide range of approaches and territorial contexts of small cities and towns in which spatial dynamics and the consequences of the city region for urban planning theory and practice in Europe are highlighted with a special focus on the challenges for and understanding of planning and development of SMSTs. It provides a significant body of critical comparative and contextual perspectives on the quest for urban sustainability and resilience in SMSTs, therefore emphasizing collaborative and potentially innovative approaches that can be detected but also the shortcomings, pitfalls and traps that can lie behind the approaches aimed at concerting ecological, economic and socio-cultural concerns and the discourses promoting them.

Rural Racism Neil Chakraborti, Jon Garland, 2013-05-13. Rural issues are currently attracting unprecedented levels of interest with the debates surrounding the future of traditional rural customs and practice becoming a significant political concern. However, the problem of racism in rural areas has been largely overlooked by academics, practitioners and researchers who have sought almost exclusively to develop an understanding of racism in urban contexts. This book aims to address this oversight by examining notions of ethnic identity, otherness and racist victimisation that have tended to be marginalised from traditional rural discourse.
