Never Pure Steven Shapin,2010-06-01 Steven Shapin argues that science for all its immense authority and power is and always has been a human endeavor subject to human capacities and limits Put simply science has never been pure To be human is to err and we understand science better when we recognize it as the laborious achievement of fallible imperfect and historically situated human beings Shapin s essays collected here include reflections on the historical relationships between science and common sense between science and modernity and between science and the moral order They explore the relevance of physical and social settings in the making of scientific knowledge the methods appropriate to understanding science historically dietetics as a compelling site for historical inquiry the identity of those who have made scientific knowledge and the means by which science has acquired credibility and authority This wide ranging and intensely interdisciplinary collection by one of the most distinguished historians and sociologists of science represents some of the leading edges of change in the scholarly understanding of science over the past several decades **Beginner's Guide to**

Lessing Yearbook Arno Schilson, Richard E. Schade, Herbert Rowland, 2002 The Lessing Yearbook the official publication of the Lessing Society is a valuable source of information on German culture literature and thought of the eighteenth century Articles are in German or English Essays in this volume explore a wide variety of subjects pertaining to class and gender identity formation and art in Lessing's work as well as Lessing's philosophy on music and poetry

The Victorians and the Eighteenth Century Francis O'Gorman, Katherine Turner, 2017-07-05 Disrupting the common assumption that the Victorians regarded their eighteenth century predecessors with little interest or with disdain the essays in *The Victorians and the Eighteenth Century* propose a re examination of these relationships Together they expose some of the significant and complex ways in which key aspects and texts of the eighteenth century were situated read and transacted within the post Romantic nineteenth century Individual essays examine the influence of the work of Pope and the eighteenth century novelists such as Johnson Chatterton and Rousseau on a range of Victorian writers and cultural productions including Dickens Eliot Oliphant Ruskin historical fiction late Victorian art criticism The English Men of Letters series and the Oxford English Dictionary The contributors challenge long held views about Victorian uses of the past and offer new insights into how the literature and culture of the eighteenth

century helped shape the culture and identity of the nineteenth century. This collection of essays by an impressive array of scholars with a Preface by David Fairer represents a unique approach to this area of literary history and offers new perspectives on the nature and methodology of periodization. While it is obviously of great interest to students of eighteenth century and Victorian literature, it will also appeal to readers more broadly concerned with questions of literary influence, periodization and historiography.

Fictions of Reality in the Age of Hume and Johnson Leopold Damrosch, 1989. During the second half of the eighteenth century the most powerful literary work in Britain was nonfictional philosophy, history, biography and political controversy. Leo Damrosch argues that this tendency is no accident: at the beginning of the modern age, writers were consciously aware of the role of cultural fictions and they sought to ground those fictions in a real world beyond the text. Their political conservatism, often neglected by modern scholars, was an extensively thought-out response to a world in which meaning was inseparable from consensus and in which consensus was increasingly under attack. Damrosch finds strong affinities between writers who are usually described as antagonists. The first chapter places Hume and Johnson in dialogue, showing that their responses to the challenge of their age have deep similarities and that their thinking points forward in significant ways to twentieth-century pragmatism. Subsequent chapters explore the interrelationship of the fictive and the real in a wide range of works by Boswell, Gibbon, White, Burke and Godwin. In its combination of literary, philosophical and cultural criticism, this book will appeal to scholars in many fields as well as to nonacademic readers interested in intellectual history.

John Marshall Richard Brookhiser, 2018-11-13. The life of John Marshall, Founding Father and America's premier chief justice. In 1801, a genial and brilliant Revolutionary War veteran and politician became the fourth chief justice of the United States. He would hold the post for 34 years, still a record. Expounding the Constitution he loved, before he joined the Supreme Court it was the weakling of the federal government, lacking in dignity and clout. After he died, it could never be ignored again. Through three decades of dramatic cases involving businessmen, scoundrels, Native Americans and slaves, Marshall defended the federal government against unruly states, established the Supreme Court's right to rebuke Congress or the president and unleashed the power of American commerce. For better and for worse, he made the Supreme Court a pillar of American life. In *John Marshall*, award-winning biographer Richard Brookhiser vividly chronicles America's greatest judge and the world he made.
