Reading with Phonics Florence Barnes, 2007-02-06 Ever since the sight word method replaced phonics as the way to teach children to read and spell there have been arguments sometimes called the reading wars for and against phonics The author remembers far enough back to the days before all this started when teaching letters and sounds went without saying and parents could depend on the school system to teach their children to read Reading difficulties forced theorists to re think their strategies so they came up with a philosophy of reading that children would learn to read on their own because they want to learn to read There would be plenty of books classed as children's literature and teachers would be facilitators In Reading With Phonics the author discusses reading methods and arguments for and against phonics She tells about some of the children she has tutored since retiring from teaching An earlier book Learn To Read From Sounds with an accompanying cassette tape on which phonetically arranged words are read is also available from Trafford Publishing

Early Reading Instruction Diane McGuinness, 2006-01-20 Early Reading Instruction is a comprehensive analysis of the research evidence from early writing systems to computer models of reading In this book Diane McGuinness provides an innovative solution to the reading war the century old debate over the efficacy of phonics sound based versus whole word meaning based methods She has developed a prototype a set of elements that are critical to the success of a reading method McGuinness shows that all writing systems without exception are based on a sound unit in the language This fact and other findings by paleographers provides a platform for the prototype Other elements of the prototype are based on modern research For example observational studies in the classroom show that time spent on three activities strongly predicts reading success learning phoneme symbol correspondences practice at blending and segmenting phonemes in words and copying writing words phrases and sentences Most so called literacy activities have no effect and some like sight word memorization have a strongly negative effect The National Reading Panel 2000 summarized the research on reading methods after screening out thousands of studies that failed to meet minimum scientific standards In an in depth analysis of this evidence McGuinness shows that the most successful methods children reading a year or more above age norms include all the elements in the prototype Finally she argues because phonics type methods are consistently shown to be superior to whole word methods in studies dating back to the 1960s it makes no sense to continue this line of research The most urgent question for future research is how to get the most effective phonics programs into the classroom
