Reading the Illegible Craig Douglas Dworkin, 2003 A poet takes another's text excises this prints over that cancels erases rearranges defaces and generally renders the original unreadable at least in its original terms What twentieth century writers and artists have meant by such appropriations and violations and how the illegible results are to be read is the subject Craig Dworkin takes up in this ambitious work *Reading the Illegible* explores such formal and structural manipulations in a wide range of exemplary cases John Cage's and Jackson MacLow's practices of writing through other texts the intentional cancellations of text by book artist Ken Campbell and conceptual artist Marcel Broodthaers Susan Howe's experiments in typography and cultural transmission visual complexity in Charles Bernstein Stan Brakhage and Rosemarie Waldrop the sedimentary texts of post minimalist artist Robert Smithson and poets Steve McCaffery and Christopher Dewdney the tactics of erasure employed by the poet Ronald Johnson and book artist Tom Phillips In his scrutiny of these works and with reference to a rich variety of contextual materials from popular and scientific texts to visual artworks political and cultural theories and experimental films Dworkin proposes a new way of apprehending the radical formalism of such unreadable texts His method seeks to unveil what Dworkin describes as the politics of the poem what is signified by its form enacted by its structures implicit in the philosophy of language how it positions its reader and other questions relating to the poem as material object In doing so he exposes the mechanics and function of truly radical formalism as a practice that moves beyond aesthetic considerations into the realm of politics and ideology Thus this book asks us to reconsider poetry as a physical act and helps us to see how the range of a text's linguistic and political maneuvers depends to a great extent on the material conditions of reading and writing as well as on the mechanics of reproduction

Experimental Natalia Cecire, 2019-12-30 A compelling revision of the history of experimental writing from Pound and Stein to Language poetry disclosing its uses and its limits In this bold new study of twentieth century American writing and poetics Natalia Cecire argues that experimental writing should be understood as a historical phenomenon before it is understood as a set of formal phenomena This seems counterintuitive because at its most basic level experimental writing can be thought of as writing which breaks from established forms Touching on figures who are not typically considered experimental such as Stephen Crane Jacob Riis Busby Berkeley Ursula K Le Guin and Gottlob Frege *Experimental* offers a fresh look at authors who are often treated as constituting a center or an origin point of an experimental literary tradition in the United States including Gertrude Stein Ezra Pound William Carlos Williams and Marianne Moore In responding to a crisis of legitimization in the production of knowledge this tradition borrows and transforms the language of the sciences Drawing upon terminology from the history of science Cecire invokes the epistemic virtue which tethers ethical values to the production of knowledge in order to organize diverse turn of the century knowledge practices feeding into experimental writing Using these epistemic virtues as a structuring concept for the book's argument Cecire demonstrates that experimental writing as we now understand it does not do experiments as in follow a method but rather performs epistemic virtues Experimental texts embody the epistemic virtues of flash objectivity precision and contact associated respectively with population sciences neuroanatomy natural history and toolmaking and anthropology Yet which virtues take precedence may vary widely as may the literary forms through which they manifest Bringing it up to the 1980s Cecire reveals the American experimental literary tradition as a concerted and largely successful rewriting of twentieth century literary history She shows how the Language poets a group of primarily white experimental writers restored to the canon what they saw as modernism's true legacy whose stakes were simultaneously political and epistemological it produced a poet who was an intellectual and a text that was experimental

The Geometry of Modernism Miranda B. Hickman, 2005 Addressing both the literature and the visual arts of Anglo American modernism *The Geometry of Modernism* recovers a crucial development of modernism's early years that until now has received little sustained critical attention the distinctive idiom composed of geometric forms and metaphors generated within the early modernist movement of Vorticism formed in London in 1914 Focusing on the work of Wyndham Lewis leader of the Vorticist movement as well as Ezra Pound H D and William Butler Yeats Hickman examines the complex of motives out of which Lewis initially forged the geometric lexicon of Vorticism and then how Pound H D and Yeats later responded to it and the values that it encoded

enlisting both the geometric vocabulary and its attendant assumptions and ideals in transmuted form in their later modernist work Placing the genesis and appropriation of the geometric idiom in historical context Hickman explores how despite its brevity as a movement Vorticism in fact exerted considerable impact on modernist work of the years between the wars in that its geometric idiom enabled modernist writers to articulate their responses to both personal and political crises of the 1930s and 1940s Informed by extensive archival research as well as treatment of several of the least known texts of the modernist milieu *The Geometry of Modernism* clarifies and enriches the legacy of this vital period **James Joyce Quarterly** ,2002 [Bibliographic Index](#) ,2007 *Questions of Poetics* Barrett Watten,2016-07 Object Lessons Subject Formations Notes Bibliography Index **The Ecology of Modernism** Joshua Schuster,2015-10-15 *The Ecology of Modernism* explores the unexpected absence of an environmental ethic in American modernist and avant garde poetics given its keen concern with an environmental aesthetic and explains why American modernism was never green Examining the relationships of key modernist writers poets and musicians to nature industrial development and pollution Joshua Schuster posits that the curious failure of modernist poets to develop an environmental ethic was a deliberate choice and not an inadvertent omission [Hart Crane](#) Brian M. Reed,2006-04-02 This volume studies the relation between globalization and inequalities in emerging societies by linking Area and Global Studies aiming at a new theory of inequality beyond the nation state and beyond Eurocentrism *The British National Bibliography* Arthur James Wells,2005
