Reading Zoos Representations Of Animals And Captivity:

Reading Zoos Randy Malamud, 1998-05-01 A caged animal in the heart of the city thousands of miles from its natural habitat neurotically pacing in its confinement Zoos offer a convenient way to indulge a cultural appetite for novelty and diversion and to teach us albeit superficially about animals Yet what conversely do they tell us about the people who create maintain and patronize them and about animal captivity in general Rather than foster an appreciation for the lives and attributes of animals zoos in Randy Malamud's view reinforce the idea that we are by nature an imperial species that our power and ingenuity entitles us to violate the natural order by tearing animals from the fabric of their ecosystems and displaying them in an order of our own making In so doing he argues zoos not only contribute to the rapid disintegration of our ecosystems but also deaden our very sensibilities to constraint spatial disruption and physical pain Invoking an array of literary depictions of animals from Albee's Zoo Story and Virginia Woolf's diaries to the films of Harold Pinter and the poetry of Marianne Moore Reading Zoos links culture literature and nature in an engaging and accessible introduction to environmental ethics animal rights cultural critique and literary representation

Zoo Ethics Jenny Gray, 2017-07-03 Well run modern zoos and aquariums do important research and conservation work and teach visitors about the challenges of animals in the wild and the people striving to save them They help visitors to consider their impact and think about how they can make a difference Yet for many there is a sense of disquiet and a lingering question remains can modern zoos be ethically justified Zoo Ethics examines the workings of modern zoos and considers the core ethical challenges that face those who choose to hold and display animals in zoos aquariums or sanctuaries Using recognised ethical frameworks and case studies of wicked problems this book explores the value of animal life and the impacts of modern zoos including the costs to animals in terms of welfare and the loss of liberty It also considers the positive welfare and health outcomes of many animals held in zoos the increased attention and protection for their species in the wild and the enjoyment and education of the people who visit zoos A thoughtfully researched work written in a highly readable style Zoo Ethics will empower students of animal ethics and veterinary sciences zoo and aquarium professionals and interested zoo visitors to have an informed view of the challenges of compassionate conservation and to develop their own defensible ethical position

Animals, Museum Culture and Children's Literature in Nineteenth-Century Britain Laurence Talairach, 2021-05-27 Animals Museum Culture and Children's Literature in Nineteenth Century Britain Curious Beasts explores the relationship between the zoological and palaeontological specimens brought back from around the world in the long nineteenth century be they alive stuffed or fossilised and the development of children's literature at this time Children's literature emerged as dizzying numbers of new species flooded into Britain with scientific expeditions from giraffes and hippopotami to kangaroos wombats platypuses or sloths As the book argues late Georgian Victorian and Edwardian children's writers took part in the urge for mass education and presented the world and its curious creatures to children often borrowing from their museum culture and its objects to

map out that world This original exploration illuminates how children s literature dealt with the new ordering of the world offering a unique viewpoint on the construction of science in the long nineteenth century **Zoo Studies** Tracy

McDonald,Daniel Vandersommers,2019-06-19 Do both the zoo and the mental hospital induce psychosis as humans are treated as animals and animals are treated as humans How have we looked at animals in the past and how do we look at them today How have zoos presented themselves and their purpose over time In response to the emergence of environmental and animal studies anthropologists sociologists philosophers theorists literature scholars and historians around the world have begun to explore the significance of zoological parks past and present Zoo Studies considers the modern zoo from a range of approaches and disciplines united in a desire to blur the boundaries between human and nonhuman animals The volume begins with an account of the first modern mental hospital La Salpêtrière established in 1656 and the first panoptical zoo the menagerie at Versailles created in 1662 by the same royal architect the final chapter presents a choreographic performance that imagines the Toronto Zoo as a place where the human body can be inspired by animal bodies From beginning to end through interdisciplinary collaboration this volume decentres the human subject and offers alternative ways of thinking about zoos and their inhabitants This collection immerses readers in the lives of animals and their experiences of captivity and asks us to reflect on our own assumptions about both humans and animals An original and groundbreaking work Zoo Studies will change the way readers see nonhuman animals and themselves **Zoo Studies** Paul A.

Rees,2023-06-01 Zoos and aquariums are culturally and historically important places where families enjoy their leisure time and scientists study exotic animals Many contain buildings of great architectural merit Some people consider zoos little more than animal prisons while others believe they play an important role in conservation and education Zoos have been the subject of a vast number of academic studies whose results are scattered throughout the literature This interdisciplinary volume brings together research on animal behaviour visitor studies zoo history human animal relationships veterinary medicine welfare education enclosure design reproduction legislation and zoo management conducted at around 200 institutions located throughout the world The book is neither pro nor anti zoo and attempts to strike a balance between praising zoos for the good work they have done in the conservation of some species while recognising that they face many challenges in making themselves relevant in the modern world Theorizing Animals Nik Taylor,Tania Signal,2011-04-21

Utilising ideas from post modernism and post humanism this book challenges current ways of thinking about animals and their relationships with humans Including contributions from across the social sciences the book encourages readers to reflect upon taken for granted ways of conceptualising human relationships with animals It will be of interest to those in the broad field of human animal studies as well as those within most social science and humanities disciplines including sociology anthropology philosophy and social theory *Ecocollapse Fiction and Cultures of Human Extinction* Sarah E.

McFarland,2021-01-28 This work analyzes 21st century realistic speculations of human extinction fictions that imagine future

worlds without interventions of as yet uninvented technology interplanetary travel or other science fiction elements that provide hope for rescue or long term survival Climate change fiction as a genre of apocalyptic and post apocalyptic writing usually resists facing the potentiality of human species extinction following instead traditional generic conventions that imagine primitivist communities of human survivors with the means of escaping the consequences of global climate change Yet amidst the ongoing sixth great extinction works that problematize survival provide no opportunities for social rebirth and speculate humanity's final end may address the problem of how to reject the impulse of human exceptionalism that pervades climate change discourse and post apocalyptic fiction Rather than following the preferences of the genre the ecocollapse fictions examined here manifest apocalypse where the means for a happy ending no longer exists In these texts diminished ecosystems specters of cannibalism and disintegrations of difference and othering render human self identity as radically malleable within their confrontations with the stark materiality of all life This book is the first in depth exploration of contemporary fictions that imagine the imbrication of human and nonhuman within global species extinctions It closely interrogates novels from authors like Peter Heller Cormac McCarthy and Yann Martel that reject the impulse of human exceptionalism to demonstrate what it might be like to go extinct

Animals and Society Margo DeMello, 2021-04-13 Human animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds It examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies Since existing social orders rely on the exploitation of animals to serve human needs the questions posed by human animal studies touch upon a wide range of fundamental issues Animals and Society provides a broad overview of this rapidly growing field Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals She considers interactions between animals and humans in social organizations such as the family the legal system and political and religious institutions A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism sexism and class privilege The book also examines how different human groups construct a range of identities for themselves and for others through animals This second edition of Animals and Society is fully updated and expanded throughout enhancing the book's relevance for student and activist readers alike It includes many new international examples all new case studies and updated supplementary readings

The Zoo and Screen Media Michael Lawrence, Karen Lury, 2016-09-24 This book is the first critical anthology to examine the controversial history of the zoo by focusing on its close relationship with screen media histories and technologies Individual chapters address the representation of zoological spaces in classical and contemporary Hollywood cinema documentary and animation amateur and avant garde film popular television and online media The Zoo and Screen Media Images of Exhibition and Encounter provides a new map of twentieth century human animal relations by exploring how the zoo that modern

apparatus for presenting living animals to human audiences has itself been represented across a diverse range of moving image media

Metamorphoses of the Zoo Ralph R. Acampora, 2010-06-14

Metamorphoses of the Zoo Animal Encounter After Noah is a volume dedicated to radically transformative approaches to spaces set aside as zoological parks or gardens. Historically these establishments served as symbols of power and venues for entertainment but today they have taken to portraying themselves as flagships of environmental education, scientific research and wildlife conservation. Along with the past century's turn in exhibition design toward increasingly naturalistic architecture, such portrayals have been received by many in an uncritically positive light. At the same time it remains clear that zoos are immensely popular attractions drawing hundreds of millions of visitors globally per year. This level of participation is consistent with the suggestion that humans harbor a strong sense of biophilia, one which moves them to seek out diverse life forms when their own territories become too biologically homogenous. From such a vantage it is no accident that zoos are most often situated in urbanizing areas.

Metamorphoses of the Zoo emphasizes creative and reconstructive analyses of zoos that do not simply advocate marginal reform or quick abolition. By focusing on issues such as interspecies progress and eco-psychological health, this unique collection will satisfy those in disciplines ranging from ecophilosophy to humanistic psychology to environmental studies.
