later the two new faiths had become so well established that their names were virtually synonymous with the polities they had entered as strangers. Although there have been numerous studies addressing this phenomenon in each field the difficulty of mastering the languages and literature of these two great cultures has prevented any sustained effort to compare the two influential religious traditions at their initial period of development. This book brings together specialists in the history and religion of Rome and China with a twofold aim. First it aims to show in some detail the similarities and differences each religion encountered in the process of merging into a new cultural environment. Second by juxtaposing the familiar with the foreign it also aims to capture aspects of this process that could otherwise be overlooked. This approach is based on the general proposition that when a new religious belief begins to make contact with a society that has already had long honored beliefs certain areas of contention will inevitably ensue and changes on both sides have to take place. There will be a dynamic interchange between the old and the new not only on the narrowly defined level of belief but also on the entire cultural body that nurtures these beliefs. Thus this book aims to reassess the nature of each of these religions not as unique cultural phenomena but as part of the whole cultural dynamics of human societies.

The Penny Cyclopaedia of the Society for the Diffusion of Useful Knowledge, 1839 **Frontier and Society in Roman North Africa** Dr. David Cherry, 1998

Analysing the cultural social and economic consequences of the Roman occupation of North Africa c 50 BC AD 250 this book offers a fresh look at the development and purpose of the north African frontier system The Subject-catalogue of the Oxford Union Society's Library Oxford Union. Library, 1883 **Proceedings of the Yorkshire Geological Society**

Yorkshire Geological Society, 1849 Includes list of members in each vol *Economy, Society and Culture* Peter Garnsey, Richard P. Saller, 1987-06-12 During the first stable period of the Principate roughly from 27 BC to AD 235 when the empire reached its maximum extent Roman society and culture were radically transformed. But how was the vast territory of the empire controlled? Did the demands of central government stimulate economic growth or endanger survival? What forces of cohesion operated to balance the social and economic inequalities and high mortality rates? Why did Roman governments freeze the official religion while allowing the diffusion of alien especially oriental cults? Are we to see in their attitude to Christianity a policy of toleration or simply confusion and a failure of nerve? These are some of the many questions posed in this book which offers the first overall account of the society economy and culture of the Roman empire. Addressed to non specialist readers no less than to scholars it breaks with the traditional historian's preoccupation with narrative and politics. As an integrated study of the life and outlook of the ordinary inhabitants of the Roman world it deepens our understanding of the underlying factors in this important formative period of world history.
