The Oxford Handbook of Engineering and

Technology in the Classical World John Peter Oleson,2008-01-31 Nearly every aspect of daily life in the Mediterranean world and Europe during the florescence of the Greek and Roman cultures is relevant to the topics of engineering and technology This volume highlights both the accomplishments of the ancient societies and the remaining research problems and stimulates further progress in the history of ancient technology The subject matter of the book is the technological framework of the Greek and Roman cultures from ca 800 B C through ca A D 500 in the circum Mediterranean world and Northern Europe Each chapter discusses a technology or family of technologies from an analytical rather than descriptive point of view providing a critical summation of our present knowledge of the Greek and Roman accomplishments in the technology concerned and the evolution of their technical capabilities over the chronological period Each presentation reviews the issues and recent contributions and defines the capacities and accomplishments of the technology in the context of the society that used it the available technological shelf and the resources consumed These studies introduce and synthesize the results of excavation or specialized studies The chapters are organized in sections progressing from sources written and representational to primary e g mining metallurgy agriculture and secondary e g woodworking glass production food preparation textile production and leather working production to technologies of social organization and interaction e g roads bridges ships harbors warfare and fortification and finally to studies of general social issues e g writing timekeeping measurement scientific instruments attitudes toward technology and innovation and the relevance of ethnographic methods to the study of classical technology The unrivalled breadth and depth of this volume make it the definitive reference work for students and academics across the spectrum of classical studies **Greek and Roman Technology: A Sourcebook**

Andrew N. Sherwood,Milo Nikolic,John W. Humphrey,John P. Oleson,2003-10-04 In this volume the authors translate and annotate key passages from ancient authors to provide a history and an analysis of the origins and development of technology Among the topics covered are energy basic mechanical devices agriculture food processing and diet mining and metallurgy construction and hydraulic engineering household industry transport and trade military technology The sourcebook presents 150 ancient authors and a diverse range of literary genres such as the encyclopedic Natural Histories of Pliny the Elder the poetry of Homer and Hesiod the philosophy of Plato Aristotle and Lucretius and the agricultural treatise of Varro Humphrey Oleson and Sherwood provide a comprehensive and accessible collection of rich and varied sources to illustrate and elucidate the beginnings of technology Glossaries of technological terminology indices of authors and subjects introductions outlining the general significance of the evidence notes to explain the specific details and a recent bibliography make this volume a valuable research and teaching tool **International Symposium on History of Machines and Mechanisms** Hong-Sen

Yan,Marco Ceccarelli,2009-01-11 The International Symposium on the History of Machines and Mechanisms is the main activity of the Permanent Commission PC for the History of Mechanism and Machine Science HMM of the International Federation for the Promotion of Mechanism and Machine Science IFToMM The first symposium HMM2000 was initiated by Dr Marco Ceccarelli and was held at the University of Cassino Cassino Italy on May 11 13 2000 The second symposium HMM2004 was chaired by Dr Marco Ceccarelli and held at the same venue on May 12 15 2004 The third symposium HMM2008 was chaired by Dr Hong Sen Yan and held at the National Cheng Kung University Tainan Taiwan on November 11 14 2008 The mission of IFToMM is to promote research and development in the field of machines and mechanisms by theoretical and experimental methods along with their practical applications The aim of HMM2008 is to establish an international forum for presenting and discussing historical developments in the field of Mechanism and Machine Science MMS The subject area covers all aspects of the development of HMM such as machine mechanism kinematics design method etc that are related to people events objects anything that assisted in the development of the HMM and presented in the forms of reasoning and arguments demonstration and identification and description and evaluation *Doing Museology Differently*

Duncan Grewcock,2013-09-05 One might believe that museum studies is a stable field of academic inquiry based on a set of familiar institutional forms and functions But as institutions museums have never been stable or singular and neither has the discipline of museum studies Museum studies as a field of academic inquiry has received little critical attention One result of this neglect has arguably been a lack of invention in museum studies another is the distancing of academic museum studies from museum practice *Doing Museology Differently* charts a different course A critical creative reflection on academic practice the book takes the form of a narrative account of museological fieldwork A research story unfolds challenging academic conventions at the level of its own presentation the book combines critical museum visiting with an autobiographical voice The identification of a previously underexplored interdisciplinary space leads the author to experiment with museum studies using contemporary developments in the theory and practice of human geography The new approaches to museological research and representation that emerge from this unique inquiry challenge assumed institutional and intellectual boundaries and act as a call to further creative experimentation **Greek and Roman**

Masterworks of Technology E. E. Lewis,2010-05 In this absorbing exploration of technological creativity throughout the ages E E Lewis professor of mechanical engineering at Northwestern University eloquently tells the story of how science and engineering which had little in common until a few hundred years ago came together to create the technological world of the 21st century Today s technology is the product of a fascinating synergy of science s search for comprehension of the material universe and engineering s drive to build things and make them work In the 20th century this synergy achieved many unprecedented successes the most spectacular of which is arguably the first moon landing of the Apollo program Rocket science now symbolic of humanity s most complex technological endeavors is the culmination of centuries of achievements by architects of pyramids and cathedrals medieval craft guilds and pioneering inventors and scientists from the Renaissance through the Industrial Revolution Melding his own personal experiences from visiting Chartres Cathedral to flying aboard a Boeing 777 with vivid historical vignettes the author skillfully demonstrates the importance of craft tradition scientific method production organization economics and more to the creation of modern technology The many topics that Lewis illuminates include the slow evolution of the wheelwright s craft the background and training of the architect engineers who undertook the construction of medieval cathedrals the importance of patronage and venture capitalists in realizing the big ideas of past and present the increasing use of visualization as seen in Leonardo s notebooks Galileo s immense contribution of bringing science and engineering together the increasing importance of basic science as the seedbed of engineering and design innovations the challenge of attempting unprecedented feats while minimizing risk as exemplified by space flight and much more Whether Lewis is discussing the distribution of weight along flying buttresses the challenges faced by Morse in engineering the telegraph or the Apollo program s monumental team effort the author s deep knowledge of and enthusiasm for his subject and his gift for engaging lively prose make for a fascinating exploration of science and engineering through the ages E E Lewis Evanston IL the former chair of the Department of Mechanical Engineering is professor of mechanical

engineering at the McCormick School of Engineering and Applied Science at Northwestern University He is the author of three engineering textbooks and numerous journal articles **Humans, Animals, and the Craft of Slaughter in Archaeo-Historic Societies** Krish Seetah,2018-10-25 In this book Krish Seetah uses butchery as a point of departure for exploring the changing historical relationships between animal utility symbolism and meat consumption Seetah brings together several bodies of literature on meat cut marks craftspeople and the role of craft in production that have heretofore been considered in isolation from one another Focusing on the activity inherent in butcher he describes the history of knowledge that typifies the craft He also provides anthropological and archaeological case studies which showcase examples of butchery practices in varied contexts that are seldom identified with zooarchaeological research Situating the relationship between practice practitioner material and commodity this imaginative study offers new insights into food production consumption and the craft of cuisine Handbook to Life in Ancient Rome Lesley Adkins,Roy A. Adkins,Both Professional Archaeologists Roy A Adkins,2014-05-14 Describes the people places and events of Ancient Rome describing travel trade language religion economy industry and more from the days of the Republic through the High Empire period and beyond *Technology and the Common Good* Allen Batteau,2022-06-10 Building on the work of Elinor Ostrom Governing the Commons the author examines how the different shared goods of a democratic society are shaped by technology and demonstrates how club goods common pool resources and public goods are supported enhanced and disrupted by technology He further argues that as the common good is undermined by different interests it should be possible to reclaim technology if the members of the society conclude that they have something in common *The Temple Complex at Horvat Omrit* Michael C. Nelson,2015-04-21 Volume One of The Temple Complex at Horvat Omrit presents a detailed examination of the surviving architecture of the three Roman period temple phases at the newly excavated sanctuary at the archaeological site of Omrit in northern Israel All three temples were built according to the Corinthian order and the author describes and illustrates the state of the remains proposes reconstructions of each phase and places each temple in the broader historical context
