Romanian Modernism The Architecture Of Bucharest 1920 1940:

Romanian Modernism Luminita Machedon, Ernest Rowland Scoffham, 1999 Modern architecture flourished in Romania between the two World Wars and is still visible as a neglected and almost forgotten past amid the contradictions of present day Bucharest Much of the text is based on archival research in Bucharest Olivia Manning Deirdre David, 2013-01-10 Olivia Manning A Woman at War is the first literary biography of the twentieth century novelist Olivia Manning It tells the story of a writer whose life and work were shaped by her own fierce ambition and like many of her generation the events and aftermath of the Second World War From the time she left Portsmouth for London in the mid 1930s determined to become a famous writer through her wartime years in the Balkans and the Middle East and until her death in London in 1980 Olivia Manning was a dedicated and hard working author Married to a British Council lecturer stationed in Bucharest Olivia Manning arrived in Romania on the 3rd September 1939 the fateful day when Allied forces declared war on Germany For the duration of World War Two she kept one step ahead of invading German forces as she and her husband fled Romania for Greece and then Greece for the Middle East where they stayed until the end of the war These tumultuous wartime years are the subject of her best known and most transparently autobiographical novels The Balkan Trilogy and The Levant Trilogy Olivia Manning refused to be labelled a feminist but her novels depict with cutting insight and sardonic wit the marginal position of women striving for independent identity in arenas frequently controlled by men whether on the frontlines of war or in the publishing world of the 1950s However she did not just write about World War Two and women s lives Amongst other things Manning published fiction about making do in Britain s post war Age of Austerity about desecration of the environment through uncontrolled development and about the painful adjustment to post war British life for young men As the author of thirteen published novels two volumes of short stories several works of non fiction and a regular reviewer of contemporary fiction she was a visible presence on the British literary scene throughout her life and her work provides a detailed insight into the period Grounded in thorough research and enriched by discussion of previously unexamined manuscripts and letters Olivia Manning A Woman at War is a timely study of Olivia Manning s remarkable life Deirdre David integrates incisive critical analysis of Manning s writing with extensive discussion of the historical contexts of her fiction

Architecture Paulo J. Cruz,2013-06-27 Although the disciplines of architecture and structural engineering have both experienced their own historical development their interaction has resulted in many fascinating and delightful structures To take this interaction to a higher level there is a need to stimulate the inventive and creative design of architectural structures and to persua Saul Steinberg Deirdre Bair,2012-11-20 From National Book Award winner Deirdre Bair the definitive biography of Saul Steinberg one of The New Yorker s most iconic artists The issue date was March 29 1976 The New Yorker cost 75 cents And on the cover unfolded Saul Steinberg s vision of the world New York City the Hudson River and then well it s really just a bunch of stuff you needn t concern yourself with Steinberg s brilliant depiction of the world according to self satisfied New Yorkers placed him squarely in the pantheon of the magazine s and the era s most celebrated artists But if you look beyond the searing wit and stunning artistry you ll find one of the most fascinating lives of the twentieth century Born in Romania Steinberg was educated in Milan and was already famous for his satirical drawings when World War II forced him to immigrate to the United States On a single day Steinberg became a US citizen a commissioned officer in the US Navy and a member of the OSS assigned to spy in China North Africa and Italy After the war ended he returned to America and to his art He quickly gained entree into influential circles that included Saul Bellow Vladimir Nabokov Willem de Kooning and Le Corbusier His wife was the artist Hedda Sterne from whom he separated in 1960 but never divorced and with whom he remained in daily contact for the rest of his life This conveniently freed him up to amass a coterie of young mistresses and lovers But his truly great love was the United States where he traveled extensively by bus train and car drawing observing and writing His body of work is staggering and influential in ways we may not yet even be able to fully grasp quite possibly

because there has not been a full scale biography of him until now Deirdre Bair had access to 177 boxes of documents and more than 400 drawings In addition she conducted several hundred personal interviews Steinberg s curious talent for creating myths about himself did not make her job an easy one but the result is a stunning achievement to admire and enjoy The electronic version of this title does not contain the 35 Saul Steinberg illustrations that are available in the print edition

Modernism as Memory Kathleen James-Chakraborty, 2018-01-15 After World War II West Germans and West Berliners found ways of communicating both their recent sufferings and aspirations for stable communities through buildings that fused the ruins of historicist structures with new constructions rooted in the modernism of the 1910s and 20s As *Modernism as Memory* illustrates these postwar practices undergird the approaches later taken in influential structures created or renovated in Berlin following the fall of the Wall including the Jewish Museum and the Reichstag the New Museum and the Topography of Terror While others have characterized contemporary Berlin's museums and memorials as postmodern Kathleen James Chakraborty argues that these environments are examples of an architecture of modern memory that is much older more complex and historically contingent She reveals that churches and museums repaired and designed before 1989 in Dresden Hanover Munich Nuremberg Pforzheim Stuttgart and Weil am Rhein contributed to a modernist precedent for the relationship between German identity and the past developed since then in the Ruhr region and in Berlin *Modernism as Memory* demonstrates that how one remembers can be detached from what one remembers contrasting ruins with recollections of modernism to commemorate German suffering the Holocaust and the industrial revolution as well as new spaces for Islam in the country

Socialist Heritage Emanuela Grama, 2019-12-01 This prize winning study of post WWII Romania examines the fraught relationship between national heritage and Socialist statecraft In *Socialist Heritage* ethnographer and historian Emanuela Grama explores the socialist state's attempt to create its own heritage as well as the ongoing legacy of that project While many argue that the socialist regimes of Central and Eastern Europe aimed to erase the pre war history of the socialist cities Grama shows that the communist state in Romania sought to exploit the past for its own benefit The book traces the transformation of Bucharest's Old Town district from the early twentieth century into the twenty first Under socialism politicians and professionals used the district's historic buildings especially the ruins of a medieval palace to emphasize the city's Romanian past and erase its

ethnically diverse history Since the collapse of socialism the cultural and economic value of the Old Town has become highly contested Its poor residents decry their semi decrepit homes while entrepreneurs see it as a source of easy money Such arguments point to recent negotiations about the meanings of class political participation and ethnic and economic belonging in today s Romania Grama s rich historical and ethnographic research reveals the fundamentally dual nature of heritage every search for an idealized past relies on strategies of differentiation that can lead to further marginalization and exclusion Winner of the 2020 Ed A Hewitt Book Prize **Structural Studies, Repairs and Maintenance of Heritage Architecture**

XI C. A. Brebbia, 2009 This volume contains papers presented at the Twelfth International Conference on Structural Studies Repairs and Maintenance of Heritage Architecture The conference provides an ideal forum for professionals in the area to discuss problems and solutions and exchange opinions and experiences **Urban Phantasmagorias** Iulia Stătică, 2023-11-30 Urban Phantasmagorias examines the legacies of socialist housing in the city of Bucharest during the period of communist rule in Romania The book explores the manner in which the socialist state reconfigured the city through concrete acts of demolition and construction as well as indirectly through legal frameworks aimed at the regulation of women s reproductive agency in an attempt to materialize its idea of modernity It follows the effects of this state agenda with a focus on the period between 1965 and 1989 through an investigation of the transformations representations meanings and uses of domestic spaces The book draws on Walter Benjamin s concept of phantasmagoria which provides a critical framework through which it articulates the dynamic relationship between ideology architecture and everyday practices and reassesses their impact upon individual subjectivity and agency The woman emerges as a central subject of the book upon whom the phantasmagoric effects of the socialist state s modernizing agenda have an acute impact at the level of lived domesticity and everyday life Through a focus on the lived experiences of women the book illuminates the prismatic effect of the state s infrastructural and legal intentions including the ways in which these were subverted through women s lived bodily experiences of the home The book establishes both theoretically and through the concrete case of the city of Bucharest the methodological significance of Benjamin s notion of phantasmagoria as an epistemological approach to a modern communist cityscape Urban Phantasmagorias is an important contribution to scholarship in architectural history and theory urban and gender studies and post socialist and Eastern European studies **Interurban Knowledge Exchange in Southern and Eastern Europe, 1870-1950** Eszter Gantner, Heidi Hein-Kircher, Oliver Hochadel, 2020-10-22 Around 1900 cities in

Southern and Eastern Europe were persistently labeled backward and delayed Allegedly they had no alternative but to follow the role model of the metropolises of London Paris or Vienna This edited volume fundamentally questions this assumption It shows that cities as diverse as Barcelona Berdyansk Budapest Lviv Milan Moscow Prague Warsaw and Zagreb pursued their own agendas of modernization In order to solve their pressing problems with respect to urban planning and public health they searched for best practices abroad The solutions they gleaned from other cities were eclectic to fit the specific needs of

a given urban space and were thus often innovative This applied urban knowledge was generated through interurban networks and multi directional exchanges Yet in the period around 1900 this transnational municipalism often clashed with the forging of urban and national identities highlighting the tensions between the universal and the local This interurban perspective helps to overcome nationalist perspectives in historiography as well as outdated notions of center and periphery This volume will appeal to scholars from a large number of disciplines including urban historians historians of Eastern and Southern Europe historians of science and medicine and scholars interested in transnational connections

German Façade Design Randall Ott, 2016-09-17 German architecture prior to the modern period has received less systemic analytical study than that of Italy France and Britain Scholarly discussion of broad traditions or continuities within Germanic or Central European façade design is even sparser Baroque era studies of the region mostly devote themselves to isolated architects monuments or movements Modernism's advent decisively changed this Germanic architecture enjoyed sudden ascendancy Yet even so study specifically of that region's façades still lagged nothing compares to the dozens of treatments of Le Corbusier's façade systems for example and how these juxtapose with French neoclassical or Italian Renaissance methods Given the paucity of multi period studies one can be

forgiven for believing Germany's effervescence of radical modern works seems unprecedented. This book takes up these multiple quandaries. It identifies and documents a previously unrecognized compositional tradition characterized here as the screen facade and posits it as a counter narrative critiquing the essentialist authentic canon currently dominant in Western architectural history. By crossing evenly over the dividing line between the historical and modern periods it offers valuable insights on indigenous roots underlying some aspects of Germany's invigorating early twentieth century architectural developments. The book chronologically examines 400 years of closely related facades concentrated in Germany but also found in Austria, the Czech Republic, German speaking Switzerland and nearby areas of Central Europe. While nearly 75 buildings are mentioned and illustrated, a dozen are given extensive analysis and the book focuses on the works of three architects: Schinkel, Behrens and Mies. Relationships between examples of these three architects' facades far transcend mere homage amongst masters. Glimmers of the system they eventually codify are apparent as early as at Heidelberg Castle in 1559 and Nürnberg's Rathaus in 1622. The book argues that in Germany northern Gothic affinities for bisection, intense repetition and rote aggregation intersected with southern Classical affinities for symmetry, hierarchy and centrality, thereby spawning a unique hybrid product: the screen facade. Instead of graphic formality, this study is guided by on-site perceptions, propositional contrasts, means of approach, interpretive conflicts and emotion, and it relates the design of these facades to concepts proposed by contemporary philosophers including Novalis, Hegel, Nietzsche, Freud, Adorno and most importantly, Gadamer on hermeneutics.

Architecture, Mentalities and Meaning Patrick Malone, 2017-06-14

In order to function, architectural theory and practice must be shaped to suit current cultural, economic and political forces. Thus, architecture embodies reductive logic that conditions the treatment of human and social processes, which raises the question of how to define objectivity for architectural mentalities that must conform to a set of immediate conditions. This book focuses on meaning and on the physical and mental processes that define life in built environments. The potential to draw knowledge from aesthetics, psychology, political economy, philosophy, geography and sociology is offset by the fact that architectural logic is inevitably reductive, cultural, socio-economic and political. However, despite the duty to conform, it is argued that the treatment of human processes and the understanding of architectural mentalities can benefit from interdisciplinary linkages, small freedoms and cracks in a system of imperatives that can yield the means of greater objectivity. This is valuable reading for students and researchers interested in architectural theory as a working reality and in the relationships between architecture and other fields.
