Rome The Cosmopolis:

Rome the Cosmopolis Catharine Edwards, Greg Woolf, 2006-11-02 Rome stands today for an empire and for a city The essays gathered in this volume explore some of the many ways in which the two were interwoven Rome was fed beautified and enriched by empire just as it was swollen polluted infected and occupied by it Empire was paraded in the streets of Rome and exhibited in the city s buildings Empire also made the city ineradicably foreign polyglot an alien capital and a focus for un Roman activities The city was where the Roman cosmos was most concentrated and so was most contested Deploying a range of methodologies on materials ranging from Egyptian obelisks to human skeletal remains via Christian art and Latin poetry the contributors to this volume weave a series of pathways through the world city exploring the different kinds of centrality Rome had in the empire The result is a startlingly original picture of both empire and city

Landscape Paradigms and Post-urban Spaces Roberto Pasini, 2018-07-07 This book presents 1 an urban studies panorama on the emergence of a built landscape continuum following the anthropic expansion at the geographic scale and the consequent demise of the city country divide 2 an in depth theoretical analysis of disparate landscape constructs culminating in the proposal of a comprehensive spatial paradigm addressing both manmade and natural contexts 3 the in situ transcription of the proposed spatial paradigm into a landscape installation implementing a territorial narrative in the Sierra Madre Oriental of Mexico Foreword by Peter G Rowe and afterword by Elisa C Cattaneo By virtue of its openness fluidity and volatility fluctuating between heterogeneity and diversity today s built landscape continuum exhibits analogies with distinct notions of landscape The book determines an open ended classification of contemporary space making strategies exceeding the urban and metropolitan ambit through a comparative anatomy of global case studies ranging from hard to soft geotechnics or applied geographies machinic micro ecologies aesthetic prostheses for operative metabolism cybernetic utopias atmospheric assemblages psychic spheres creole horizons semiotic landscapes geopolitical landscapes geophilosophical excavations The proposed spatial paradigm accommodating aggregates of artificial and living systems physical and mental spaces and machinic and cultural landscapes intends to reconcile the traditionally opposed scientific cognitive metabolist and cultural geophilosophical territorialist visions of the landscape The resulting model transcends the

exhausted myths of urban space metropolitanism and their filiations in favor of a new form of urbanity and its attributes Parts of the work were developed in the frame of research projects of Universidad de Monterrey and Parque Ecológico Chipinque and the IDAUP of UniFE and Polis The target audience of the book is researchers teachers and advanced students engaged in landscape and urban studies with a prevalent focus on theory The book can also benefit professional and institutional audiences looking for ethical methodological orientation

Perspectives on Public Space in Rome, from Antiquity to the Present Day Jan Gadeyne, 2016-04-22 This volume provides readers interested in urban history with a collection of essays on the evolution of public space in that paradigmatic western city which is Rome Scholars specialized in different historical periods contributed chapters in order to find common themes which weave their way through one of the most complex urban histories of western civilization Divided into five chronological sections Antiquity Middle Ages Renaissance Baroque Modern and Contemporary the volume opens with the issue of how public space was defined in classical Roman law and how ancient city managers organized the maintenance of these spaces before moving on to explore how this legacy was redefined and reinterpreted during the Middle Ages The third group of essays examines how the imposition of papal order on feuding families during the Renaissance helped introduce a new urban plan which could satisfy both functional and symbolic needs The fourth section shows how modern Rome continued to express strong interest in the control and management of public space the definition of which was necessarily selective in this vastly extensive city The collection ends with an essay on the contemporary debate for revitalizing Rome's eastern periphery Through this long term chronological approach the volume offers a truly unique insight into the urban development of one of Europe's most important cities and concludes with a discussion of the challenges public space faces today after having served for so many centuries as a driving force in urban history

At the Temple Gates Heidi Wendt, 2016-08-18 In his sixth satire Juvenal speculates about how Roman wives busy themselves while their husbands are away namely by entertaining a revolving door of exotic visitors who include a eunuch of the eastern goddess Bellona an impersonator of Egyptian Anubis a Judean priestess and Chaldean astrologers From these self-proclaimed religious specialists women solicit services ranging from dream interpretation to the coercion of lovers Juvenal's catalogue suggests the popularity of such freelance experts at the turn of the second century and their familiarity to his audience whom he could expect to get the joke Heidi Wendt investigates the backdrop of this enthusiasm for the religion of freelance experts by examining their rise during the first two centuries of the Roman Empire Unlike civic priests and temple personnel freelance experts had to generate their own authority and legitimacy often through demonstrations of skill and learning in the streets in marketplaces and at the temple gates among other locations in the Roman world Wendt argues that these professionals participated in a highly competitive form of religious activity that intersected with multiple areas of specialty particularly philosophy and medicine Over the course of the imperial period freelance experts grew increasingly influential more diverse with respect to their skills and methods and

more assorted in the ethnic coding of their practices Wendt argues that this context engendered many of the innovative forms of religion that flourished in the second and third centuries including phenomena linked with Persian Mithras the Egyptian gods and the Judean Christ The evidence for freelance experts in religion is abundant but scholars of ancient Mediterranean religion have only recently begun to appreciate their impact on the empire's changing religious landscape At the Temple Gates integrates studies of Judaism Christianity mystery cults astrology magic and philosophy to paint a colorful portrait of religious expertise in early Rome *Rome* Stephen L. Dyson, 2010-06-14 Stephen L. Dyson has spent a lifetime studying and teaching the history of ancient Rome That unparalleled knowledge is reflected in his magisterial overview of the Eternal City Rather than look only at the physical development of the city its buildings monuments and urban spaces Dyson also explores its social economic and cultural histories This unique approach situates Rome against a background of comparative urban history and theory allowing Dyson to examine the dynamic society that once thrived there In his personal effort to reconstruct the city Dyson populates its streets with the hurried politicians hawking vendors and animated students that once lived worked and studied there bringing the ancient city to life for a new generation of students and tourists Dyson follows Rome as it developed between the third century BC and the fourth century AD dividing the great megalopolis into distinct neighborhoods and locales He shows how these communities each with its own unique customs and colorful inhabitants eventually grew into the great imperial capital of the Italian Empire Dyson integrates the full range of sources available literary artistic epigraphic and archaeological to create a comprehensive history of the monumental city In doing so he offers a dramatic picture of a complex and changing urban center that despite its flaws flourished for centuries

Polymaths of Islam James Pickett, 2020-09-15 *Polymaths of Islam* analyzes the social and intellectual power of religious leaders who created a shared culture that integrated Central Asia Iran and India from the mid eighteenth century through the early twentieth James Pickett demonstrates that Islamic scholars were simultaneously mystics and administrators judges and occultists physicians and poets This integrated understanding of the world of Islamic scholarship unlocks a different way of thinking about transregional exchange networks Pickett reveals a Persian language cultural sphere that transcended state boundaries and integrated a spectacularly vibrant Eurasia that is invisible from published sources alone Through a high cultural complex that he terms the Persian cosmopolis or Persianate sphere Pickett argues that an intersection of diverse disciplines shaped geographical trajectories across and between political states In *Polymaths of Islam* he paints a comprehensive colorful and often contradictory portrait of mosque and state in the age of empire *Ancient Rome as a Museum* Steven Rutledge, 2012-04-26 *Ancient Rome as a Museum* considers how cultural objects from the Roman Empire came to reflect construct and challenge Roman perceptions of power and identity Rutledge argues that Roman cultural values are indicated in part by what sort of materials Romans deemed worthy of display and how they chose to display view and preserve them **Classical Archaeology** Susan E. Alcock, Robin Osborne, 2012-05-21 The fully revised second edition

of this successful volume includes updates on the latest archaeological research in all chapters and two new essays on Greek and Roman art. The Social Dynamics of Roman Imperial Imagery Amy Russell, Monica Hellström, 2020-11-12 Explores how artists and patrons at all social levels helped form and evolve the visual language of the Roman Empire

The Religious History of the Roman Empire J. A. North, John North, 2023 The Religious History of the Roman Empire The Republican Centuries consists of fourteen chapters all dealing with aspects of the religious life of Republican Rome between c 500 BCE and the fall of the Republican constitution in c 30 BCE

Pompey, Cato, and the Governance of the Roman Empire Kit Morrell, 2017 Leading Romans in the late republic were more concerned about the problems of their empire than is generally recognized. This book challenges the traditional picture by exploring the attempts made at legal and ethical reform in the period 70-50 BC while also shedding new light on collaboration between Pompey and Cato two key arbiters of change

Cosmopolitan Imaginaries and International Disorder Aaron C McKeil, 2025-03-26 While the idea of a cosmopolitan order embracing all humankind is ancient after the Cold War it was widely believed to be an emerging future. As global interdependence and interaction through new technologies increased literature of cosmopolitan globalization argued that these changes were setting the stage for a structural transformation of world politics. Yet a revolt against globalism and increasingly divisive and unstable international order has dramatically contradicted this idea. This presents a puzzle for International Relations theory. Why have attempts to construct cosmopolitan order struggled to emerge in the modern global world? *Cosmopolitan Imaginaries and International Disorder* argues that advocacy for cosmopolitan order reform in the modern world has struggled to recognize

the political identities of states and populations and to legitimize its proposed political hierarchies As a result these efforts have been overwhelmed by states shoring up their power and remobilizing exclusionary nationalist identities especially when struggles are intensified in contexts of international instability and economic turmoil In developing a theory to explain these patterns of cosmopolitan politics this book offers insight into the limits and role of cosmopolitanism in a dividing international order after liberal globalism

Deleuze at the End of the World Dorothea E. Olkowski, Julián Ferreyra, 2020-07-15 The philosophy of Deleuze is as relevant to contemporary thought as it is obscure and complex Deleuze at the End of the World guides readers through this maze by exploring the raw material that Deleuze took from thinkers in various fields of knowledge to construct his own concepts some of them well known such as Hegel Kant Husserl Balibar and Blanchot and some widely unexplored Selme Guillaume Bakhtine and Dalcq At the same time readers will gain access to Latin American perspectives on contemporary philosophy Contextualized with an Introduction by one of the pioneers of the Deleuzian Studies at a global level Dorothea Olkowski this book provides both a unique tool for comprehending the philosophy of Deleuze but also insight into to the way it has been read in the periphery of the American and European scholarship where the end of the world means not only a geographical contingency but the encounter of thought with its own limits This collection is both a refreshing approach to Deleuzian philosophy as well as a continuous and innovative experience of thinking

Christ Circumcised Andrew S. Jacobs, 2012-05-28 In the first full length study of the circumcision of Jesus Andrew S Jacobs turns to an unexpected symbol the stereotypical mark of the Jewish covenant on the body of the Christian savior to explore how and why we think about difference and identity in early Christianity Jacobs explores the subject of Christ s circumcision in texts dating from the first through seventh centuries of the Common Era Using a diverse toolkit of approaches including the psychoanalytic postcolonial and poststructuralist he posits that while seeming to desire fixed borders and a clear distinction between self Christian and other Jew pagan and heretic early Christians consistently blurred and destabilized their own religious boundaries He further argues that in this doubled approach to others Christians mimicked the imperial discourse of the Roman Empire which exerted its power through the management not the erasure of difference For Jacobs the circumcision of Christ vividly illustrates a deep seated Christian duality the fear of and longing for an other at once reviled and internalized From his earliest appearance in the Gospel of Luke to the full blown Feast of the Divine Circumcision in the medieval period Christ circumcised represents a new way of imagining Christians and their creation of a new religious culture

Was 70 CE a Watershed in Jewish History? Daniel R. Schwartz, Zeev Weiss, 2011-11-25 These twenty studies ask whether changes in different fields of ancient Jewish culture were caused by the destruction of the Second Temple in 70 CE what changed for other reasons and what did not change despite that event

Pax and the Politics of Peace Hannah Cornwell, 2017 The concept of Roman peace pax did not just denote the absence of war but formed part of a much greater discourse on how Rome conceptualized herself This volume explores its changing meaning from Republic to

Principate arguing that it is fundamental to understanding the shifting balance of power and the creation of the Roman Empire Contested Spaces, Common Ground ,2016-10-11 Spaces are produced and shaped by discourses and in turn produce and shape discourses themselves Space is becoming a significant and complex concept for the encounter between people cultures religions ideologies politics between histories and memories the advantaged and the disadvantaged the powerful and the weak As a result it provides a rich hermeneutical and methodological inventory for mapping interculturality and interreligiosity This volume looks at space as a critical theory and epistemological tool within cultural studies that fosters the analysis of power structures and the deconstruction of representations of identities within our societies that are shaped by power
