Information Systems Security Atul Prakash, 2009-11-16

The management of services and operations in today's organizations are coming increasingly dependent on their enterprise local area network enterprise LAN

An enterprise LAN consists of a set of network zones logical group of network elements corresponding to different departments or sections connected through various interface switches typically Layer 3 switches

The network service accesses between these zones and also with the external network e.g. Internet are governed by a global network security policy of the organization

This global policy is defined as a collection of service access rules across various network zones where the services referred network applications conforming to TCP/IP protocol

For example some of the known network services are ssh, telnet, http, etc.

In reality the security policy may be incompletely specified which explicitly states the permit and deny access rules between specific network zones keeping remaining service access paths as unspecified

The global security policy is realized in the network by configuring the network interfaces with appropriate sets of access control rules ACLs

One of the major challenges in network security management is ensuring the conformation of the distributed security implementations with the global security policy

*Proceedings of the IFIP TC 11 23rd International Information Security Conference* Sushil Jajodia, Pierangela Samarati, Stelvio Cimato, 2008-07-30

These proceedings contain the papers selected for presentation at the 23rd International Information Security Conference SEC 2008 co-located with IFIP World Computer Congress WCC 2008 September 8-10 2008 in Milan Italy

In response to the call for papers 143 papers were submitted to the conference

All papers were evaluated on the basis of their significance novelty and technical quality and reviewed by at least three members of the program committee

Reviewing was blind meaning that the authors were not told which committee members reviewed which papers

The program committee meeting was held electronically holding intensive discussion over a period of three weeks

Of the papers submitted 42 full papers and 11 short papers were selected for presentation at the conference

A conference like this just does not happen it depends on the volunteer efforts of a host of individuals

There is a long list of people who volunteered their time and energy to put together the conference and who deserve acknowledgment

We thank all members of the program committee and the external reviewers for their hard work in the paper evaluation

Due to the large number of submissions program committee members

were required to complete their reviews in a short time frame We are especially thankful to them for the commitment they showed with their active participation in the electronic discussion
