Roots From Outward Bound To Expeditionary Learning:

Roots Emily Cousins, 2000 this anthology explores Expeditionary Learning's roots in the educational philosophy of Kurt Hahn. The founder of Outward Bound, Hahn started two schools and numerous educational initiatives. Through storytelling, scholarship, and first person accounts, this book describes Hahn's schools, his views on service, challenge, adventure, and the belief that students have more in them than they realize.

Creating Experiential Learning Opportunities for Language Learners Melanie Bloom, Carolyn Gascoigne, 2017-03-08 While much research has been done on experiential learning opportunities in study abroad settings, there are fewer publications devoted to experiential learning in the domestic context. This volume aims to fill that gap by providing a collection of chapters highlighting research-based innovations in experiential learning in domestic settings. The book focuses on three experiential learning contexts: community engagement experiences, professional engagement experiences, and other unique experiential contexts such as language camps and houses. The collection focuses on the US context, but the research projects and curricular innovations described here can serve as models for educators working in other local contexts and will encourage interested practitioners to explore experiential learning opportunities in their local areas. It will also provide the reader with a better understanding of this growing field of inquiry and should appeal to graduate students and researchers who are interested in experiential language learning.

Leadership Lessons from Comprehensive School Reforms Joseph Murphy, Amanda Datnow, 2003 *Leadership Lessons From Comprehensive School Reform* addresses a topic that has received far too little attention in the comprehensive school reform movement: the role of school and district leaders in the reform process. This volume shows how much we've learned about how leaders shape comprehensive reform and how the reform process must shape leadership. Robert Slavin, Co-Director, Center for Research on the Education of Students Placed at Risk, Johns Hopkins University. This volume provides the most thorough, balanced, and informative source available on comprehensive school reform. In addition to insights regarding implementation of many of the most prominent CSR models, the book is a primer on distributed leadership, providing perspectives on the interplay of principals, teacher leaders, central office administrators, and model developers engaged in school and district reform. James Lytle, Superintendent, Trenton New Jersey Public Schools. This book offers well-grounded insights about the leadership practices of educators involved in the implementation of Comprehensive School Reform models. Leaders and leadership scholars will find it a rewarding read. I recommend it highly. Kenneth Leithwood, Ontario Institute for Studies in Education, Ontario, Canada. Discover what we've learned about educational leadership from comprehensive school reforms: models straight from the experts and insiders. Comprehensive School Reform (CSR) is proving to be one of the most promising avenues for improving student achievement. The authors have found that leadership is frequently acknowledged to be a prime factor in the successful implementation of comprehensive school reform. Murphy and Datnow have gathered together a group of CSR insiders and researchers to examine the issue of leadership in CSR for the first time. Contributors

The Cost-Effectiveness of 22 Approaches for Raising Student Achievement Stuart S. Yeh, 2011-03-01 As a consequence of the federal No Child Left Behind NCLB law there is tremendous pressure on school principals teachers school superintendents district staff state departments of education and governors to maximize the increase in student achievement that is obtained with every dollar of expenditure Currently teachers are forced to rely on extremely inefficient approaches that take enormous amounts of time both during the school day and throughout the K 12 learning years This is experienced in terms of the reduced time that is available to teach subjects other than math and reading as schools resort to double periods of math double periods of reading and enormous amounts of remedial instruction that directly reduce the time available for other subjects including science art and music In contrast this book suggests that student achievement may be increased in a way that is not only cost effective in dollar terms but efficient in the sense that it does not rely on unusual investments in the time required to obtain results The book draws upon a wealth of cost effectiveness data to dispel common notions about what works in addressing the achievement gap increased expenditure per pupil charter schools voucher programs increased educational accountability class size reduction comprehensive school reform increased teacher salaries more selective teacher recruitment the use of value added methods to measure and reward teacher performance the use of National Board teacher certification to identify high performing teachers and a host of other approaches

Examining Comprehensive School Reform Daniel K. Aladjem, Kathryn M. Borman, 2006 Urban school reformers for decades have tried to improve educational outcomes for underserved and disadvantaged students with the assistance of constantly evolving federal and state policies In recent years education policies have shifted from targeting individual students to developing universal standards for teaching and learning and comprehensive school reform CSR has emerged as an effective key model The federal CSR program seeks to support the implementation of comprehensive school reform especially in high poverty schools and to improve efforts to help all children meet challenging academic standards Schools that receive federal CSR funds must adopt approaches that comply with the No Child Left Behind Act NCLB This book provides a series of studies and reflections on CSR by leading experts in the field

Facing the Challenges of Whole-School Reform Mark Berends, Susan J. Bodilly, Sheila Nataraj Kirby, 2002-04-03 About a decade ago New American Schools NAS set out to address the perceived lagging performance of American students and the lackluster results of school reform efforts As a private nonprofit organization NAS's mission was and is to help schools and districts raise student achievement levels by using whole school designs and design team assistance during

implementation Since its inception NAS has engaged in a development phase 1992 1993 a demonstration phase 1993 1995 and a scale up phase 1995 present Over the last ten years RAND has been monitoring the progress of the NAS initiative This book is a retrospective on NAS and draws together the findings from RAND research The book underscores the significant contributions made by NAS to comprehensive school reform but also highlights the challenges of trying to reform schools through whole school designs Divided into sections on each research phase the book concludes with an afterword by NAS updating its own strategy for the future This book will interest those who want to better understand comprehensive school reform and its effects on teaching and learning within high stakes accountability environments **Outdoor**
