Teaching Religion and Healing Linda L. Barnes, Inés M. Talamantez, 2006-10-19 The study of medicine and healing traditions is well developed in the discipline of anthropology Most religious studies scholars however continue to assume that medicine and biomedicine are one and the same and that when religion and medicine are mentioned together the reference is necessarily either to faith healing or bioethics Scholars of religion also have tended to assume that religious healing refers to the practices of only a few groups such as Christian Scientists and pentecostals Most are now aware of the work of physicians who attempt to demonstrate positive health outcomes in relation to religious practice but few seem to realize the

myriad ways in which healing pervades virtually all religious systems This volume is designed to help instructors incorporate discussion of healing into their courses and to encourage the development of courses focused on religion and healing It brings together essays by leading experts in a range of disciplines and addresses the role of healing in many different religious traditions and cultural communities An invaluable resource for faculty in anthropology religious studies American studies sociology and ethnic studies it also addresses the needs of educators training physicians health care professionals and chaplains particularly in relation to what is referred to as cultural competence the ability to work with multicultural and religiously diverse patient populations

Deciphering Ancient Minds: The Mystery of San Bushmen Rock Art David Lewis-Williams, Sam Challis, 2011-06-01 Goes to the heart of contemporary arguments about the primitive and the modern minds and draws new social anthropological and ethnographic conclusions about the nature of ancient societies How did ancient peoples those living before written records think Were their thinking patterns fundamentally different from ours today Researchers over the years have certainly believed so Along with the Aborigines of Australia the indigenous San people of southern Africa among the last hunter gatherer societies on Earth became iconic representatives of all our distant ancestors and were viewed as either irrational fantasists or childlike highly spiritual conservationists Since the 1960s a new wave of research among the San and their world famous rock art has overturned these misconceived ideas Here the great authority David Lewis Williams and his

colleague Sam Challis reveal how analysis of the rock paintings and engravings can be made to yield vital insights into San beliefs and ways of thought This is possible because we possess comprehensive transcriptions made in the nineteenth century of interviews with San informants who were shown copies of the art and gave their interpretations of it Using the analogy of the Rosetta Stone the authors move back and forth between these San texts and the rock art teasing out the subtle meanings behind both The picture that emerges is very different from past analysis this art is not a naive narrative of daily life but rather is imbued with power and religious depth
